CompTIA Project+ Certification Exam Sample Questions (Q142-Q147):

NEW QUESTION # 142

Which of the following BEST identifies the intent and purpose of a project closeout report?

- A. To release resources and terminate all access rights
- B. To document variances from the initial project baseline
- C. To provide documentation of lessons learned
- **D. To validate that a project has been successfully completed**

Answer: D

Explanation:

To validate that a project has been successfully completed. The intent and purpose of a project closeout report is to validate that a project has been successfully completed and to summarize the goals, objectives, and outcomes of the project, as well as the lessons learned and the feedback from stakeholders. A project closeout report is a document that is submitted at the end of a project to officially conclude it and release the resources and contracts involved. It is useful for evaluating the project's success and improving the performance of future projects¹²

NEW QUESTION # 143

During the project execution, the sponsor would like to have a visual representation indicating the progress of the project. The project is being managed using agile methodologies. Which of the following tools would best help the sponsor with the request?

- A. Velocity chart
- B. Milestone chart
- **C. Burndown chart**
- D. Task board

Answer: C

NEW QUESTION # 144

Which of the following offers administrators more direct control over operating systems?

- A. Functions as a service
- B. Software as a service
- C. Platform as a service
- **D. Infrastructure as a service**

Answer: D

Explanation:

Explanation

Infrastructure as a service (IaaS) offers administrators more direct control over operating systems than other cloud service models. IaaS is a type of cloud computing service that provides virtualized computing resources such as servers, storage, network, and operating systems over the internet. IaaS allows users to rent or lease infrastructure resources on demand and pay only for what they use. IaaS gives users more flexibility and control over their infrastructure resources and enables them to configure, manage, and customize their operating systems according to their needs and preferences.

NEW QUESTION # 145

Participant attendance has been poor at the last few weekly meetings. The project manager wants to validate who the participants should be, how often the meetings should occur, and on which day and at what time the meeting should be held. Which of the following is the best place to validate this information?

- A. Project management plan
- B. Project business case
- C. Project schedule
- **D. Project communication plan**

Answer: D
