**Testking OGEA-10B Learning Materials | OGEA-10B Latest Exam**

Our OGEA-10B questions pdf is up to date, and we provide user-friendly OGEA-10B practice test software for the OGEA-10B exam. Moreover, we are also providing money back guarantee on all of OGEA-10B test products. If the OGEA-10B braindumps products fail to deliver as promised, then you can get your money back. The OGEA-10B Sample Questions include all the files you need to prepare for the OGEA-10B exam. With the help of the OGEA-10B practice exam questions and test software, you will be able to feel the real OGEA-10B exam scenario, and it will allow you to assess your skills.

## The Open Group TOGAF Enterprise Architecture Bridge Exam (English) Sample Questions (Q11-Q16):

### NEW QUESTION # 11

Complete the sentence The TOGAF standard covers the development of four architecture domains. Business, Data, Technology and \_\_\_\_\_.

- A. Transition
- **B. Application**
- C. Segment
- D. Capability

**Answer: B**

Explanation:

The TOGAF standard covers the development of four architecture domains: Business, Data, Technology and Application. These domains represent different aspects of an enterprise's architecture and provide a consistent way of describing, analyzing, and designing them. Reference: The TOGAF Standard | The Open Group Website, Section 2.2 Architecture Development Method (ADM).

### NEW QUESTION # 12

What component of the Architecture Repository represents architecture requirements agreed with the Architecture Board?

- **A. Architecture Requirements Repository**
- B. Reference Library
- C. Governance Log
- D. Architecture Capability

**Answer: A**

Explanation:

The Architecture Requirements Repository stores all the requirements that are output of the architecture development cycle, as well as the requirements that are input to the architecture development cycle<sup>1</sup>. The Architecture Requirements Repository includes the following types of requirements<sup>1</sup>:

\*Stakeholder Requirements: These are the high-level requirements and expectations of the stakeholders, derived from the business drivers, goals, and objectives. They are captured and refined in the Architecture Vision phase and the Requirements Management phase.

\*Architecture Requirements: These are the detailed requirements that specify what the architecture must do or deliver to meet the stakeholder requirements. They are derived and refined in the Business, Information Systems, and Technology Architecture phases.

\*Implementation and Migration Requirements: These are the detailed requirements that specify what the implementation and migration projects must do or deliver to realize the architecture. They are derived and refined in the Opportunities and Solutions and Migration Planning phases.

The Architecture Requirements Repository is used to manage the architecture requirements throughout the architecture lifecycle, ensuring their traceability, consistency, and compliance<sup>1</sup>. The Architecture Board is the authority that reviews and approves the architecture requirements, as well as the architecture deliverables and artifacts, as part of the architecture governance process<sup>2</sup>.

References: 1: Architecture Requirements Repository 2: Architecture Board

### NEW QUESTION # 13

Which statement about Requirements Management is most correct?

- A. Stakeholder requirements are captured once in Phase A and managed throughout the ADM cycle
- **B. Requirements Management and stakeholder engagement are placed at the center of architecture development**

- C. The purpose of Requirements Management is to process change requests
- D. Requirements Management is a step of all ADM Phases

**Answer: B**

Explanation:

This statement about Requirements Management is most correct because it reflects the central role of Requirements Management and stakeholder engagement in the ADM cycle. Requirements Management is not a step of all ADM Phases, but rather an ongoing process that ensures that all relevant requirements are elicited, analyzed, prioritized, and addressed throughout the architecture development and transition. Stakeholder engagement is also a continuous activity that involves identifying, communicating, and managing stakeholder expectations and concerns. Reference: The TOGAF Standard | The Open Group Website, Section 3.1 Introduction to the ADM.

#### NEW QUESTION # 14

Which phase of the ADM has the purpose to develop an Enterprise Architecture Capability?

- A. Phase A
- **B. Preliminary Phase**
- C. Phase G
- D. Phase B

**Answer: B**

Explanation:

According to the TOGAF Standard, 10th Edition, the Preliminary Phase of the Architecture Development Method (ADM) has the purpose to develop an Enterprise Architecture Capability 1. An Enterprise Architecture Capability is the ability of the organization to perform the activities and tasks related to Enterprise Architecture, such as defining the scope, principles, vision, governance, and stakeholders of the architecture. The Preliminary Phase also establishes the architecture framework, the architecture repository, the architecture tools, and the architecture team 1. The other options are not correct, as they have different purposes in the ADM. Phase G: Implementation Governance has the purpose to ensure that the implementation projects conform to the target architecture 2. Phase A: Architecture Vision has the purpose to define the scope, stakeholders, business drivers, and objectives of the architecture project 3. Phase B: Business Architecture has the purpose to describe the baseline and target business architecture, and to identify the gaps between them. References: 1: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 6: Preliminary Phase. 2: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 18: Phase G: Implementation Governance. 3: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 12: Phase A: Architecture Vision. : TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 13: Phase B: Business Architecture.

#### NEW QUESTION # 15

What provides context for architecture work, by describing the needs and ways of working employed by the enterprise?

- A. Architecture Contracts
- **B. Business principles business goals, and business drivers**
- C. Strategy and vision
- D. Stakeholder needs

**Answer: B**

Explanation:

Business principles business goals, and business drivers provide context for architecture work, by describing the needs and ways of working employed by the enterprise. They define what the enterprise wants to achieve, how it wants to operate, and what factors influence its decisions and actions. Reference: The TOGAF Standard | The Open Group Website, Section 3.2 Preliminary Phase.

#### NEW QUESTION # 16

.....

OGEA-10B latest torrents simulate the real exam environment and does not limit the number of computer installations, which can help you better understand the details of the exam. The online version of OGEA-10B test questions also support multiple devices

and can be used offline permanently after being opened for the first time using the network. On buses or subways, you can use fractional time to test your learning outcomes with OGEA-10B Test Torrent, which will greatly increase your pro forma efficiency.
