CPRE-FL_Syll_3.0 Test Practice | CPRE-FL_Syll_3.0 Latest Exam Camp

Testing yourself is an effective way to enhance your knowledge and become familiar with the CPRE-FL_Syll_3.0 exam format. Rather than viewing the CPRE-FL_Syll_3.0 test as a potentially intimidating event, Real4test IREB Certified Professional for Requirements Engineering, Foundation Level (CPRE-FL_Syll_3.0) desktop and web-based practice exams help candidates assess and improve their knowledge. If your CPRE-FL_Syll_3.0 Practice Exams (desktop and web-based) results aren't ideal, it's better to experience that shock during a mock exam rather than the CPRE-FL_Syll_3.0 actual test.

ISQI IREB Certified Professional for Requirements Engineering, Foundation Level Sample Questions (Q87-Q92):

NEW QUESTION # 87

Choose the options that present a gathering technique for elicitation.

- A. Scenarios and storyboards
- B. Apprenticing
- C. Workshops
- D. Analogy technique
- E. Brainstorming

Answer: B,C

NEW QUESTION # 88

Which of the following are principles of Requirements Engineering? (Select 2 answers.)

- A. Changing requirements are the exception, not the normal case.
- B. Requirements should be viewed as means to an end, not the end in itself.
- C. Requirements Engineering is about satisfying only users' needs.
- D. Systems should be isolated from proper understanding.
- E. Non-validated requirements are worthless.

Answer: B,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

IREB defines a set of RE principles. Principle 1 states that requirements are a means to an end (such as reduced risk and successful systems), not an end in themselves; they support achieving project and business goals. Principle 6 states that non-validated requirements are worthless because unvalidated statements may be incorrect, incomplete, inconsistent or misaligned with stakeholder needs. Requirements normally change over time; change is expected, not exceptional. Systems cannot be understood in isolation from their environment, and RE must consider all relevant stakeholders, not only users. Hence options A and D reflect official principles; the others contradict them.

NEW QUESTION # 89

In regard to the quality criteria for requirements and work products, which of the following sentences are correct?

- A. "Non-redundant" is a quality criteria for single requirements.
- B. "Consistent" is a quality criteria for work products covering multiple requirements.
- C. "Conformant" is a quality criteria for work products covering multiple requirements.
- D. "Traceable" is a quality criteria for single requirements.

Answer: B,C

NEW QUESTION # 90

In regard to the quality criteria for requirements, which statement is correct?

- A. Single requirements and specifications should adhere to the same quality criteria.
- B. Requirements have to fully adhere to all quality criteria.

- C. All quality criteria have the same relative importance.
- D. All the other options are wrong

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

CPRE presents multiple quality criteria (adequate, understandable, complete, necessary, consistent, traceable, etc.) and distinguishes those for single requirements from those for work products containing many requirements (e.g., non-redundant, conformant, consistent, traceable). Not every requirement must perfectly satisfy all criteria; instead, a value-oriented approach is recommended where critical requirements receive more scrutiny. Adequate and understandable are considered most important; others may be relaxed in low-risk areas. Therefore A, B and C are incorrect generalizations, leaving D as the only correct choice.

NEW QUESTION # 91

The template "The <system name> shall <system response>" is suited for:

- A. Event-driven requirements
- B. State-driven requirements
- C. Unwanted behaviour
- D. Ubiquitous requirements

Answer: D

NEW QUESTION # 92

.....
