New C-S4EWM-2023 Test Tips & C-S4EWM-2023 Instant Discount

The latest technologies have been applied to our C-S4EWM-2023 actual exam as well since we are at the most leading position in this field. You can get a complete new and pleasant study experience with our C-S4EWM-2023 study materials. Besides, you have varied choices for there are three versions of our C-S4EWM-2023 practice materials. At the same time, you are bound to pass the exam and get your desired certification for the validity and accuracy of our C-S4EWM-2023 training guide.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which of the following can you include in a storage type search sequence for stock removal? Note: There are 2 correct answers to this question.

- A. A list of storage types
- B. A list of storage sections
- C. A list of storage type groups
- D. A list of storage bin types

Answer: A,B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The storage type search sequence in SAP EWM defines the order for stock removal (e.g., picking). Option C ("A list of storage sections") is correct as sections within a storage type can be prioritized, and option D ("A list of storage types") is correct because multiple storage types (e.g., high rack, picking area) are sequenced, both configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Strategies > Define Storage Type Search Sequence. Option A (storage type groups) is used for putaway, not removal, and option B (bin types) is too granular for this sequence.

NEW QUESTION # 67

When you create a direct outbound delivery order, where can availability checks happen? Note: There are 2 correct answers to this question.

- A. In SAP CRM

- B. In SAP APO
- C. In SAP TM
- D. In SAP EWM

Answer: B,D

Explanation:

When creating a direct outbound delivery order, availability checks can occur in the following systems:

- * A. In SAP EWM:
- * Availability checks can occur in EWM for determining stock levels within the warehouse.
- * C. In SAP APO:
- * Advanced availability checks can be performed in SAP APO (Advanced Planning and Optimization) for global ATP (Available-to-Promise) and supply chain planning.

Incorrect Options:

- * B: SAP TM (Transportation Management) focuses on transport planning, not stock availability checks.
- * D: SAP CRM (Customer Relationship Management) is not used for availability checks in this scenario.

References:

- * SAP Help Portal: Availability Check in Direct Outbound Delivery Orders
- * SAP EWM Documentation: Integration with APO and Availability Checking

NEW QUESTION # 68

What are some requirements for automatic wave creation? Note: There are 2 correct answers to this question.

- A. Conditions and condition records exist
- B. Wave templates with one or more options are defined
- C. Job for automatic release is scheduled
- D. Wave templates with release method "Automatic" are defined

Answer: A,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Automatic wave creation in SAP EWM groups outbound tasks. Option C ("Wave templates with release method 'Automatic'") is correct as it triggers wave creation automatically, and option D ("Conditions and condition records exist") is correct because conditions (e.g., time, volume) determine when waves are created, both configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Wave Management. Option A (job) is for release, not creation, and option B is too vague.

NEW QUESTION # 69

Which of the following actions are possible based on a value-added service (VAS) order? Note: There are 3 correct answers to this question.

- A. Capture costs
- B. Perform quality inspection
- C. Capture time required
- D. Assemble a kit
- E. Consume auxiliary products

Answer: C,D,E

Explanation:

Comprehensive and Detailed In-Depth Explanation:

A VAS order in SAP EWM supports additional services during processing. Option A ("Assemble a kit") is correct as kitting is a common VAS activity. Option B ("Consume auxiliary products") is correct because VAS often uses materials like packaging, and option D ("Capture time required") is correct as Labor Management tracks VAS execution time, all configured in SPRO: SCM Extended Warehouse Management > Value-Added Services. Option C (quality inspection) is a separate QM process, and option E (costs) is tracked indirectly, not directly via VAS orders.

NEW QUESTION # 70

What is required to perform explicit counting using the Quality Inspection Engine? Note: There are 2 correct answers to this question.

- A. QM integration
- **B. Work center**
- C. Sampling procedure
- **D. Inspection rule**

Answer: B,D

Explanation:

To perform explicit counting using the Quality Inspection Engine (QIE) in SAP Extended Warehouse Management (EWM) on SAP S/4HANA Cloud, Private Edition, the following elements are required:

* Inspection Rule (A)

* An inspection rule defines the criteria for triggering a quality inspection within the warehouse.

* It is essential to configure the inspection rule in EWM to specify the characteristics of the inspection, such as document type, item category, and relevance to counting.

* This rule acts as the basis for initiating explicit counting as part of quality management integration.

* Work Center (C)

* A work center in EWM is the physical or logical location where quality inspection activities occur.

* For explicit counting, the work center must be configured to handle QIE tasks.

* It serves as the location where warehouse staff can access and perform counting tasks, such as verifying quantities of materials against quality requirements.

Additional Considerations:

* QM Integration (B): While quality management (QM) integration ensures alignment with quality standards, it is not a mandatory requirement for explicit counting in QIE but can enhance the overall quality process.

* Sampling Procedure (D): Sampling procedures are used to define how samples are drawn for inspection but are not specifically required for explicit counting in this context.

References from SAP S/4HANA Cloud Private Edition, EWM Documentation:

* SAP Help Portal: EWM Quality Inspection Integration

* SAP Best Practices for EWM: Configuration Guide for Quality Inspection Engine

* SAP Learning Hub: Extended Warehouse Management Quality Processes

These references provide detailed insights into configuring and utilizing the QIE for explicit counting in SAP EWM.

NEW QUESTION # 71

.....

TestPDF is one of the leading platforms that has been helping SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management exam candidates for many years. Over this long time period we have helped C-S4EWM-2023 exam candidates in their preparation.
