SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q68-Q73):

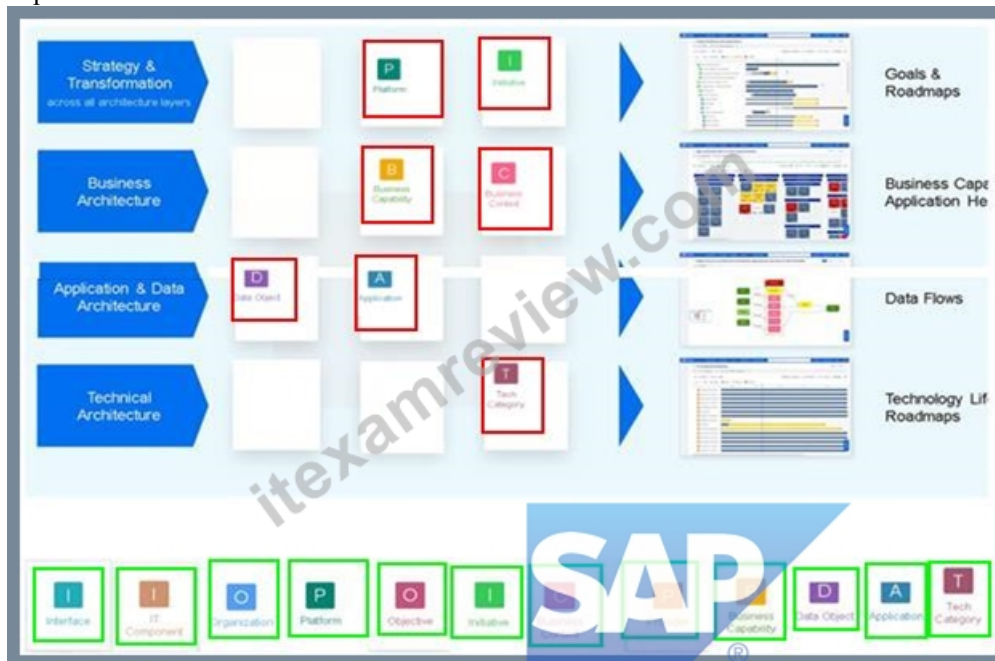

NEW QUESTION # 68

Drag and drop the elements at the bottom to the architecture layers of the SAP LeanIX meta model.

Answer:

Explanation:

NEW QUESTION # 69

Which AI-driven tools are available in SAP S/4HANA? Note: There are 2 correct answers to this question.

- A. Manual risk assessment
- B. Predictive analytics for financial forecasting
- C. Isolated financial processes without AI
- D. AI-powered invoice processing

Answer: B,D

Explanation:

SAP S/4HANA embeds advanced AI capabilities to optimize financial and operational processes, with AI- powered invoice processing and predictive analytics for financial forecasting being key tools explicitly documented as core functionalities.

SAP's official materials state: "SAP Cash Application revolutionizes payment advice processing by intelligently extracting key payment details from unstructured PDF documents and seamlessly integrating them into SAP S/4HANA Cloud." This describes AI- powered invoice processing, which minimizes manual data entry and enhances accuracy. Additionally, SAP S/4HANA leverages predictive analytics to "forecast expected incoming payments" and support financial forecasting, enabling organizations to optimize cash flow and make data-driven decisions. For instance, SAP Collections Management uses AI to "automatically determine, evaluate, and prioritize customers based on defined criteria," showcasing predictive analytics in financial processes.

The incorrect options-manual risk assessment and isolated financial processes without AI-are not AI- driven. Manual risk assessment contradicts SAP's automation focus, and isolated financial processes without AI are not part of SAP S/4HANA's integrated, AI-enhanced architecture. SAP documentation emphasizes that AI-driven tools in S/4HANA replace manual processes with intelligent automation, rendering these options invalid.

NEW QUESTION # 70

How does SAP AI contribute to personalized marketing campaigns?

There are 2 correct answers to this question.

Response:

- A. AI-driven customer segmentation
- B. Manual campaign execution
- C. Predictive analytics for targeted marketing
- D. Automated payroll processing

Answer: A,C

NEW QUESTION # 71

Which component of SAP AI is responsible for automating routine business tasks?

Please choose the correct answer.

Response:

- A. SAP S/4HANA Cloud
- B. SAP AI Core
- C. SAP Intelligent RPA
- D. SAP Conversational AI

Answer: C

NEW QUESTION # 72

What are the benefits of SAP AI-driven predictive analytics? Note: There are 3 correct answers to this question.

- A. Real-time decision-making insights
- B. Future trend forecasting
- C. Manual invoice processing
- D. Automated anomaly detection
- E. Increased manual data entry

Answer: A,B,D

Explanation:

SAP AI-driven predictive analytics provides significant benefits by enabling organizations to anticipate trends, make informed decisions, and automate anomaly detection. The correct answers are future trend forecasting, real-time decision-making insights, and automated anomaly detection, as these are core benefits documented in SAP's AI portfolio.

SAP documentation states: "SAP Business AI offers predictive analytics to enhance decision-making, provide personalized insights, and improve business processes. It supports future trend forecasting, real-time decision- making, and automated anomaly detection across functions like finance, supply chain, and marketing." Future trend forecasting allows organizations to "predict customer demand, financial trends, and operational risks," as seen in SAP S/4HANA's forecasting of incoming payments. Real-time decision-

making insights enable

"proactive responses to market changes" by analyzing live data, such as in SAP Integrated Business Planning.

Automated anomaly detection identifies "unusual patterns in financial transactions or supply chain operations," enhancing security and efficiency, as exemplified by SAP AI Business Services' fraud detection capabilities.

The incorrect options-increased manual data entry and manual invoice processing-are contrary to SAP's automation focus.

Predictive analytics aims to reduce manual efforts, not increase them, and manual invoice processing is replaced by solutions like SAP Cash Application. SAP's emphasis on AI-driven automation and insights, as seen in case studies like Henkel's supply chain optimization, confirms the selected benefits.

NEW QUESTION # 73

.....

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite exam practice questions play a crucial role in SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite C-BCBAI-2502 exam preparation and give you insights SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite exam view. You are aware of the SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite C-BCBAI-2502 exam topics, structure, and a number of the questions that you will face in the upcoming SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite C-BCBAI-2502 Exam.
