Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q31-Q36):

NEW QUESTION # 31
In ArcGIS Utility Network, which type of association allows a transformer to connect to a distribution line even if the two features are not spatially coincident?

- A. Containment association
- B. Structural attachment association
- C. Connectivity association

Answer: C

Explanation:
Connectivity associations allow connectivity between non-coincident features, enabling logical rather than spatial connections.

NEW QUESTION # 32
A utility analyst encounters error code 35: "Feature is an unsupported structural attachment relationship." What does this mean, and how can it be fixed?

- A. Subnetwork overlap; fix by tier rank reassignment
- B. An existing structural association is no longer valid; fix by deleting/correcting the attachment
- C. Invalid terminal configuration; fix by resetting terminals

Answer: B

Explanation:
Error 35 occurs when a structural association rule is no longer valid. Fix by deleting the attachment or correcting the feature type.

NEW QUESTION # 33
When creating association roles, what does the restricted deletion semantic enforce?

- A. Deletes all associated features automatically
- B. Prevents deletion of a container if associated network features exist
- C. Allows deletion of a container while leaving features intact

Answer: B

Explanation:
Restricted deletion prevents deleting containers or structures until associated network features are removed.

NEW QUESTION # 34
When configuring valves or switches in ArcGIS Utility Network, are terminals necessary if both sides of the device are equal?

- A. No, terminals are only required when sides differ, multiple ports exist, or flow is directional
- B. Yes, all devices must have terminals
- C. No, terminals are only required if the device is a subnetwork controller

Answer: A

Explanation:
If both sides of a device are identical, terminals are unnecessary. Terminals are used when sides differ or multiple ports exist.

NEW QUESTION # 35
In an enterprise deployment of ArcGIS Utility Network, which architecture is required to allow multiple users to interact with the

network through services?

- A. Service-Oriented Architecture (SOA)
- B. Mesh-based Architecture
- C. Client-Server Architecture

Answer: A

Explanation:
Enterprise deployments requireSOA, enabling services and branch versioning for multi-user workflows.

NEW QUESTION # 36

......
