

Visual SC-401 Cert Exam & Practice SC-401 Exams

P.S. Free 2026 Microsoft SC-401 dumps are available on Google Drive shared by TestkingPass: <https://drive.google.com/open?id=17PCjtby-4h4ilhWY1xgwwUVKfFHLHk8f>

A lot of people are dreaming to pass the SC-401 exam. Also, you can start your own business after you totally master the skills of the SC-401 preparation exam expertly. Quickly, you will become the millionaire. Then it is time for others to envy your luxury life. All in all, our SC-401 Exam Prep is worth for investing. After all, you are the main beneficiary. Please follow your hearts and begin your new challenges bravely.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 2	<ul style="list-style-type: none"> • Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 3	<ul style="list-style-type: none"> • Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 4	<ul style="list-style-type: none"> • Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

HOT Visual SC-401 Cert Exam - Microsoft Administering Information Security in Microsoft 365 - High-quality Practice SC-401 Exams

The pass rate is 98.65% for the SC-401 exam torrent, and we also pass guarantee and money back guarantee if you fail to pass the exam. We have received many good feedbacks from our customers, and they think highly of our SC-401 exam torrent. Besides, we provide you with free demo for you to try before purchasing. We also have free update for SC-401 Exam Dumps for one year after buying. And the update version for SC-401 exam torrent will send to your email automatically. If you have any other questions just contact with us through online service or by email, and we will give a reply to you as quickly as possible.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q228-Q233):

NEW QUESTION # 228

You create a label that encrypts email data.

Users report that they cannot use the label in Outlook on the web to protect the email messages they send.

You need to ensure that the users can use the new label to protect their email.

What should you do?

- A. Modify the priority order of label policies.
- B. Create a new sensitive information type.
- C. Wait six hours and ask the users to try again.
- **D. Create a label policy.**

Answer: D

Explanation:

Admin has to publish labels by creating label policy.

NEW QUESTION # 229

You have a Microsoft 365 £5 subscription that contains the groups shown in the following table.

The subscription contains the users shown in the following table.

You create the mail flow rules shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 230

You are creating a custom trainable classifier to identify organizational product codes referenced in Microsoft 365 content.

You identify 300 files to use as seed content.

Where should you store the seed content?

- A. an Azure file share
- B. a Microsoft Exchange Online shared mailbox
- C. a Microsoft OneDrive folder
- **D. a Microsoft SharePoint Online folder**

Answer: D

Explanation:

Seed content files for a custom trainable classifier should be stored in a SharePoint Online folder (or folders) that is dedicated to holding only that seed content. You'll need to create a separate folder for positive examples and another for negative examples. After placing the files, make note of the full URL of the SharePoint site, library, and folder for each set of content.

Note: How to create a trainable classifier: The following process automates the testing of trainable classifiers and shortens the creation workflow from 12 days to two days. In some cases, the process can take only a few hours.

1. Collect between 50 and 500 seed content items that strongly represent the data you want the classifier to positively identify as being in the category. For a list of supported file types, see Default crawled file name extensions and parsed file types in SharePoint Server.
2. Collect a second set of seed content (from 150 to 1,500 items) that represents data that don't belong in the category.
3. Place the positive and negative seed content in separate SharePoint folders. Each folder must be dedicated to holding only the seed content. Make note of the site, library, and folder URL for each set.
4. Sign in to the Microsoft Purview portal with either Compliance admin or Security admin role access and navigate to Data loss prevention > Data classification > Classifiers.

NEW QUESTION # 231

You have two Microsoft 365 subscriptions named Contoso and Fabrikam. The subscriptions contain the users shown in the following table.

You have a sensitivity label named Sensitivity1 as shown in the exhibit. (Click the Exhibit tab) you have the files shown in the following table.

For each of the following statements, select yes if the statement is true. Otherwise select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Yes , Yes, No

To determine whether each statement is true or false, let's analyze the provided information step by step based on the sensitivity label settings and the user permissions associated with the files.

Given Information:

Users and Subscriptions:

User1: Contoso subscription, email: user1@contoso.com

User2: Contoso subscription, email: user2@contoso.com

User3: Fabrikam subscription, email: user3@fabrikam.com

User4: Fabrikam subscription, email: user4@fabrikam.com

Files and Sensitivity Label Application:

File1: Automatically applied Sensitivity1 using an auto-labeling policy File2: Applied by User2 File3: Applied by User1 Sensitivity

Label (Sensitivity1) Assumptions: Since the exhibit for the sensitivity label is not fully detailed, we need to make reasonable assumptions based on typical Microsoft 365 sensitivity label behavior.

Sensitivity labels can restrict access based on user permissions, subscription boundaries, or specific configurations (e.g., allowing only users within the same organization to edit or view). Given the context of two separate subscriptions (Contoso and Fabrikam), it's likely that Sensitivity1 restricts access to users within the same subscription unless explicitly configured otherwise. A common default for such labels is to allow editing and other rights only to users within the applying user's organization, with possible restrictions for cross-subscription access.

Key Assumptions:

Sensitivity1 likely encrypts the files and restricts editing rights to users within the same subscription as the user who applied the label or where the auto-labeling policy is configured.

File1 (auto-applied) would inherit permissions based on the policy, likely restricting access to Contoso users if the policy is set up within the Contoso subscription.

File2 (applied by User2 from Contoso) would restrict access to Contoso users.

File3 (applied by User1 from Contoso) would also restrict access to Contoso users.

Users from Fabrikam (User3, User4) would not have edit rights unless explicitly granted, which is unlikely given the separation of subscriptions.

Statement Analysis:

User1 can edit rights for File1.

File1 was automatically applied with Sensitivity1 using an auto-labeling policy. Since the policy is likely configured within the Contoso subscription (where User1 resides), User1, as a Contoso user, should have edit rights unless the policy explicitly restricts this. Given User1's affiliation with Contoso, this is typically allowed.

answer: Yes

User2 can edit rights for File3.

File3 was applied by User1, who is from the Contoso subscription. Since User2 is also from the Contoso subscription, they should have edit rights unless the label configuration explicitly denies this for other users within the same subscription. Typically, users within the same organization can edit files labeled by another user from the same organization.

answer: Yes

User3 can print File2.

File2 was applied by User2, who is from the Contoso subscription. Sensitivity1 likely restricts access to Contoso users only. User3 is from the Fabrikam subscription, which is a separate entity. Unless cross-sub Answer : No

NEW QUESTION # 232

You implement Microsoft 365 Endpoint data loss prevention (Endpoint DLP).

You have computers that run Windows 11 and have Microsoft 365 Apps installed. The computers are joined to a Microsoft Entra tenant. You need to ensure that Endpoint DLP policies can protect content on the computers.

Solution: You deploy the Endpoint DLP configuration package to the computers.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

NEW QUESTION # 233

.....

In order to meet the demands of all the customers, we can promise that we will provide all customers with three different versions of the SC-401 study materials: PDF version, Soft version and APP version. In addition, we can make sure that we are going to offer high quality SC-401 practice study materials with reasonable prices but various benefits for all customers. It is our sincere hope to help you pass SC-401 exam by the help of our SC-401 certification guide. Just come and buy our SC-401 learning prep!
