SAP C-BCBTM-2509参考書勉強は主要材料 & C-BCBTM-2509 SAP Certified Associate - Positioning SAP Business Transformation Management Solutions

GoShiken SAPのC-BCBTM-2509試験問題集は実践の検査に合格しますから、広い研究と実際に基づいている経験を提供できます。GoShikenはIT領域の10年以上の認定経験を持っていますから、問題と解答に含まれています。C-BCBTM-2509試験に準備するためにインターネットで色々なトレーニングツールを見つけることができますが、GoShikenのC-BCBTM-2509試験資料は最も良いトレーニング資料です。、弊社は最全面的な認証試験問題と解答を提供するだけでなく、一年間の無料更新サービスも提供いたします。

SAP C-BCBTM-2509 認定試験の出題範囲：

トピック	出題範囲
トピック 1	Positioning SAP Business Transformation Management Solutions: This section of the exam measures the skills of SAP Solution Consultants and focuses on understanding how to position SAP Business Transformation Management solutions within diverse enterprise environments. It covers identifying the value proposition of these solutions, aligning them with customer transformation strategies, and demonstrating how they support business agility and operational excellence through data-driven insights and process optimization.

トピック 2	Understanding Business Transformation: This section of the exam evaluates the abilities of Business Transformation Advisors and covers the fundamental principles of business transformation in the digital age. It emphasizes recognizing transformation drivers, defining strategic objectives, and integrating technological innovations into organizational change processes. Candidates are expected to understand how SAP tools and methodologies enable efficient transformation planning, execution, and sustainability across various industries.
トピック 3	Understanding SAP Signavio and SAP LeanIX Solutions: This section of the exam measures the expertise of Enterprise Architects and focuses on the core concepts of SAP Signavio and SAP LeanIX. It includes understanding how these solutions enhance enterprise architecture management, process intelligence, and business process transformation. Learners explore how SAP Signavio provides visibility into business processes and how SAP LeanIX supports IT landscape transparency, allowing organizations to improve alignment between business goals and IT systems.
トピック 4	Understanding WalkMe: This section of the exam evaluates the competencies of Digital Adoption Specialists and covers the role of WalkMe within the SAP ecosystem. It focuses on how WalkMe enhances user experience, drives digital adoption, and simplifies workflows across SAP solutions. Candidates learn how WalkMe guidance and automation tools support end-users in navigating complex SAP applications, ultimately improving productivity, engagement, and system utilization.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions 認定 C-BCBTM-2509 試験問題 (Q20-Q25):

質問 # 20

What are typical challenges SAP customers face in an ERP transformation?

(Note: There are 3 correct answers to this question.)

- A. Lack of transparency into processes and system landscapes
- B. Inability to generate financial reports due to a lack of data analytics capabilities
- C. Alignment between business and IT
- D. Not knowing how and where to start their transformation journey
- E. Significant reduction in product quality

正解: A、C、D

解説:

According to SAP's Business Transformation Management (BTMP) and SAP Signavio Transformation Framework, the most common ERP transformation challenges are strategic alignment, starting complexity, and lack of visibility across business and IT landscapes.

"Organizations often face difficulties with aligning business and IT, defining where to start transformation efforts, and gaining transparency across processes and systems." Reference:

A - Alignment between Business and IT:

Misalignment leads to inconsistent objectives between operations and technology strategy.

"Achieving alignment between IT capabilities and business goals remains one of the biggest barriers to transformation." B - Not Knowing Where to Start:

Many organizations lack clarity on prioritization and readiness assessment.

"Determining the starting point and sequencing of transformation steps is a recurring challenge in ERP modernization projects." C - Lack of Transparency:

Without visibility into existing processes, companies struggle to identify inefficiencies or dependencies.

"Insufficient transparency across processes and system landscapes hinders effective transformation planning and execution."

Incorrect Options:

D: Financial reporting challenges are typically ERP operational issues, not transformation barriers.

E: Product quality reduction is not a standard ERP transformation issue.

Verified Correct Answers: A, B, and C.

質問 # 21

How does the integration between SAP Signavio and SAP LeanIX enhance IT and business alignment?

- A. The integration allows linking of business applications to business processes.
- B. Integration solely enhances reporting capabilities.
- C. Business processes are directly controlled by SAP LeanIX applications.
- D. The tools only provide visualization without actionable insights.

正解: A

解説:

The integration between SAP Signavio and SAP LeanIX provides a unified view of business and IT, allowing companies to connect business processes (Signavio) with IT applications and systems (LeanIX). This integration bridges operational and architectural perspectives, ensuring full alignment between business goals and IT capabilities.

"Through the SAP Signavio and SAP LeanIX integration, organizations can link business processes to supporting IT applications, creating a shared view that strengthens IT-business alignment." Reference:

This integration supports transformation governance by combining process intelligence (what the business does) with enterprise architecture insights (how IT supports it).

"SAP enables enterprises to visualize dependencies between processes and applications, ensuring coordinated decision-making and improved transformation outcomes." Incorrect Options:

A: Reporting is a secondary feature; integration focuses on alignment, not reporting alone.

B: Both tools provide actionable insights via analytics and process intelligence.

C: LeanIX does not "control" processes; it maps IT dependencies and applications.

Verified Correct answer: D: The integration allows linking of business applications to business processes.

質問 # 22

What are the key functional categories of WalkMe's capabilities in the new pricing model?

- A. Workflow Automation, User Engagement, Security & Privacy
- B. Data & Analytics, Action & Experience, Platform & Admin
- C. Content Creation, Deployment, Analytics & Insights
- D. Digital Adoption, Process Optimization, Compliance Management

正解: B

解説:

In WalkMe's new pricing and capability model, its platform capabilities are structured into three primary functional categories: Data & Analytics, Action & Experience, and Platform & Admin.

These categories align with WalkMe's enterprise focus on digital adoption, measurement, and governance.

"WalkMe's new pricing model organizes core capabilities into Data & Analytics, Action & Experience, and Platform & Admin, ensuring clarity, scalability, and measurable outcomes for enterprise customers." Reference:

Data & Analytics provide insights into user behavior and adoption.

Action & Experience focuses on guidance, automation, and in-app user experiences.

Platform & Admin manages security, governance, and deployment administration.

"These capability pillars ensure organizations can measure adoption, act to improve user journeys, and govern platform usage effectively." Incorrect Options:

A: Content creation and deployment are part of "Action & Experience," but not the complete categorization.

C & D: These describe solution outcomes, not the functional capability categories.

Verified Correct answer: B: Data & Analytics, Action & Experience, Platform & Admin.

質問 # 23

What primary issue does WalkMe's solution aim to solve for customers?

- A. High employee turnover rates
- B. Difficulty in maintaining accurate financial records
- C. Need for upgrading physical infrastructure in organizations
- D. Challenges in adopting and effectively using digital tools

正解: D

解説:

The WalkMe Digital Adoption Platform (DAP), which is integrated into SAP's Business Transformation Management (BTM)

solutions, primarily addresses the challenge of digital adoption - helping users effectively utilize enterprise software and workflows. "WalkMe is designed to eliminate user friction with digital systems by providing contextual, in-application guidance and automation that accelerates digital adoption." Reference:

The main problem WalkMe solves is difficulty in adopting and effectively using digital tools, which directly impacts productivity, process efficiency, and transformation success.

"Organizations struggle with the complexity of modern applications; WalkMe's solution enables users to navigate and complete digital processes successfully without training dependency." Options B, C, and D do not represent the platform's focus:

WalkMe is not an HR solution to reduce turnover (B).

It does not manage physical infrastructure (C).

It does not handle financial record accuracy (D).

The central goal, as reinforced in SAP BTM documentation, is to bridge the gap between technology implementation and effective user adoption - making A the correct and verified answer.

質問 # 24

What roles do SAP Business Transformation Management solutions play in transformation scenarios?

(Note: There are 2 correct answers to this question.)

- A. They support change management.
- B. They analyze as-is processes and IT landscapes only.
- C. They provide a data-driven approach for Enterprise Observability.
- D. They are limited to the operate phase of transformations.

正解: A、C

解説:

SAP Business Transformation Management (BTM) Solutions are designed to guide organizations through the complete transformation lifecycle, from strategy and planning to implementation and adoption. They combine process analysis, enterprise architecture management, and user adoption capabilities through solutions such as SAP Signavio, SAP LeanIX, and WalkMe.

"SAP's Business Transformation Management Solutions deliver an integrated, data-driven foundation that provides visibility, transparency, and governance across all phases of business transformation while supporting organizational change management."

Reference:

Supporting Change Management (Answer B):

A core objective of SAP BTM solutions is to enable and sustain change across people, processes, and technology. Through SAP Signavio's collaborative design tools and WalkMe's adoption capabilities, organizations can manage stakeholder engagement, communication, and behavior alignment effectively.

"BTM Solutions provide tools to manage the human side of transformation, ensuring that employees adapt successfully to new processes and technologies." Providing a Data-Driven Approach for Enterprise Observability (Answer C):

BTM Solutions deliver data-based visibility into business and IT landscapes through SAP LeanIX and SAP Signavio integration. This allows organizations to observe and measure transformation progress, dependencies, and business value using live data.

"SAP BTM Solutions integrate business process intelligence with enterprise architecture management, providing a data-driven approach to enterprise observability for informed transformation decisions." Why Other Options Are Incorrect:

A: Incorrect - BTM Solutions are not limited to the operate phase; they span discover, design, deliver, and run phases of transformation.

D: Incorrect - They analyze both as-is and to-be states to enable continuous improvement and future-state optimization.

Therefore, the verified and correct answers according to SAP BTM documentation are:

B: They support change management.

C: They provide a data-driven approach for Enterprise Observability.
