GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q20-Q25):

NEW QUESTION # 20
For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Heating
- B. Electrolysis
- C. Lighting
- D. Turning a motor

Answer: B

Explanation:
Explanation
Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.
Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

NEW QUESTION # 21
Which one of the following uses sensors such as laser beams or touch sensor?

- A. CCTV

CDCS-001 Reliable Test Vce CDCS-001 Books PDF

our company made our CDCS-001 practice guide with accountability. Our CDCS-001 training dumps are made by our CDCS-001 exam questions responsible company which means you can gain many other benefits as well. We offer free demos of our for your reference, and send you the new updates if our experts make them freely. What is more, we give some favorable discount on our CDCS-001 Study Materials from time to time, which mean that you can have more preferable price to buy our products.

The number of questions of the CDCS-001 study materials you have done has a great influence on your passing rate. As for our study materials, we have prepared abundant exercises for you to do. You can take part in the real CDCS-001 exam after you have memorized all questions and answers accurately. Also, we just pick out the most important knowledge to learn. Through large numbers of practices, you will soon master the core knowledge of the CDCS-001 Exam. It is important to review the questions you always choose mistakenly. You should concentrate on finishing all exercises once you are determined to pass the CDCS-001 exam

CDCS-001 Reliable Exam Tutorial & Latest CDCS-001 Exam Question

If you purchasing our CDCS-001 simulating questions, you will get a comfortable package services afforded by our considerate after-sales services. We respect your needs toward the useful CDCS-001 practice materials by recommending our CDCS-001 Guide preparations for you. And we give you kind and professional supports by 24/7, as long as you can have problems on our CDCS-001 study guide, then you can contact with us.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q40-Q45):

NEW QUESTION # 40

A grounding wire is connected to the metal case of an appliance.

- A. False
- B. True

Answer: B

NEW QUESTION # 41

What is a Data Center?

- A. A building or portion of a building whose primary function is to research new data.
- B. A building or a portion of a building whose primary function is to house a computer room and its related support areas
- C. A room in a building dedicated to monitoring data and information.
- D. A building or a portion of a building where debugging takes place

Answer: B

Explanation:

Explanation

A building or a portion of a building whose primary function is to house a computer room and its related support areas. A Data Center is a secure, temperature-controlled environment that houses computer systems, equipment, and associated components. It is typically used to store, process, and distribute large amounts of data and information. Data Centers typically include server racks, storage arrays, network switches, firewalls, and other components necessary for the operation of computer systems.

NEW QUESTION # 42

The distance that a signal's energy can travel in the time it takes for one cycle to occur is called the signal's:

- A. amplitude
- B. frequency
- C. period
- D. wavelength

Answer: D

Explanation:

Wavelength is a measure of the distance that a signal's energy can travel in the time it takes for one cycle of the signal to occur. It is calculated by dividing the speed of light by the frequency of the signal. Wavelength is generally expressed in meters (m).

NEW QUESTION # 43

Which power distribution component is commonly used when multiple electrical devices are located in close proximity, particularly for audio, video, and computer equipment?

- A. Power distribution units (PDU) (Selected)
- B. Outlet strips
