## XK0-006 Vce Test Simulator | XK0-006 Answers Real Questions

The CompTIA Linux+ Certification Exam (XK0-006) PDF dumps format can be accessed from any smart device such as laptops, tablets, and smartphones. Fast2test regularly updates the XK0-006 PDF Questions to reflect the latest CompTIA XK0-006 exam content. All test questions in the XK0-006 exam PDF format are real and latest.

## CompTIA Linux+ Certification Exam Sample Questions (Q83-Q88):

### NEW QUESTION # 83

While hardening a system, an administrator runs a port scan with Nmap, which returned the following output:

```
# nmap 104.21.75.76
Starting Nmap 7.80 ( https://nmap.org ) at 2024-07-09 18:09 UTC
Nmap scan report for 104.21.75.76
Host is up (0.00087s latency).
Not shown: 996 closed ports
PORT      STATE SERVICE
23/tcp    open  telnet
80/tcp    open  http
443/tcp   open  https
8080/tcp  open  http-proxy

Nmap done: 1 IP address (1 host up) scanned in 4.93 seconds
```

Which of the following is the best way to address this security issue?

- A. Closing port 80 on the network switch to block traffic
- B. Changing the systems administrator's password to prevent unauthorized access
- C. **Disabling and removing the Telnet service on the server**
- D. Configuring a firewall to block traffic on port 23 on the server

**Answer: C**

Explanation:

Port 23/tcp indicates Telnet, which is insecure because it transmits data in plaintext. The best hardening approach is to disable and remove the Telnet service entirely, eliminating the vulnerability rather than just blocking it at the firewall. Secure alternatives like SSH should be used instead.

### NEW QUESTION # 84

Which of the following utilities supports the automation of security compliance and vulnerability management?

- A. **OpenSCAP**
- B. SELinux
- C. Nmap
- D. AIDE

**Answer: A**

Explanation:

OpenSCAP is a framework that automates security compliance checking and vulnerability management by using standardized security content (SCAP). It helps administrators enforce policies and detect vulnerabilities.

### NEW QUESTION # 85

An administrator thinks that the user Joe may be running an unauthorized process on a Linux server. Which of the following commands should the administrator run to confirm this idea?

- A. ps -ax 'Joe'
- B. lsof -p 'Joe'
- C. jobs -n 'Joe'
- D. **top -u 'Joe'**

**Answer: D**

### Explanation:

top -u Joe filters the process display to only show processes owned by user Joe, allowing the administrator to see if Joe is running any unauthorized processes.

### NEW QUESTION # 86

An administrator receives reports that a web service is not responding. The administrator reviews the following outputs:

```
$ echo $PWD
/etc/pki/nginx

$ ls -lRt
.:
total 8
drwxr-xr-x. 2 root root 6 Jul 10 10:57 private
-rw-r--r--. 1 root root 895 Jul 10 10:56 server.crt
-rw-----. 1 root root 227 Jul 10 10:56 server.key
./private:
total 0

$ sudo systemctl status nginx
nginx.service - The nginx HTTP and reverse proxy server
   Loaded: loaded (/usr/lib/systemd/system/nginx.service; disabled; preset: disabled)
     Active: failed (Result: exit-code) since Wed 2023-11-01 06:56:51 EDT; 6s ago
       Process: 110551 ExecStartPre=/usr/bin/rm -f /run/nginx.pid (code=exited, status=0/SUCCESS)
       Process: 110552 ExecStartPre=/usr/sbin/nginx -t (code=exited, status=1/FAILURE)
         CPU: 144ms

Nov 01 06:56:51 webserver systemd[1]: Starting nginx.service - The nginx HTTP and reverse proxy server...
Nov 01 06:56:51 webserver nginx[110552]: nginx: [emerg] cannot load certificate key "/etc/pki/nginx/private/server.key": BIO_new_file() failed (SSL: error:80000002:system
library::no such file or directory)@0
Nov 01 06:56:51 webserver nginx[110552]: nginx: configuration file /etc/nginx/nginx.conf test failed
Nov 01 06:56:51 webserver systemd[1]: nginx.service: control process exited, code=exited, status=1/FAILURE
Nov 01 06:56:51 webserver systemd[1]: Failed with result 'exit-code'.
Nov 01 06:56:51 webserver systemd[1]: Failed to start nginx.service - The nginx HTTP and reverse proxy server.
```

Which of the following is the reason the web service is not responding?

- A. The private key has the incorrect permissions and should be changed to 0755 for the service.
- B. The private key is not in the correct location and needs to be moved to the correct directory.
- C. The private key does not match the public key, and both keys should be replaced.
- D. The private key needs to be renamed from server.crt to server.key so the service can find it.

### Answer: B

### Explanation:

The error log shows "cannot load certificate key /etc/pki/nginx/private/server.key", but the listing reveals that server.key is located in /etc/pki/nginx/ rather than the expected /etc/pki/nginx/private/ directory. Since the file exists but not where Nginx is configured to look, moving it to the correct directory resolves the issue.

### NEW QUESTION # 87

Users cannot access an application that is running inside containers. The administrator wants to validate whether the containers are running. Which of the following commands should the administrator use?

- A. docker run
- B. docker ps
- C. docker start
- D. docker images

### Answer: B

### Explanation:

The docker ps command lists all running containers, allowing the administrator to verify whether the application's containers are active.

### NEW QUESTION # 88

.....

Fast2test was established in 2008, now we are the leading position in this field as we have good reputation of high-pass-rate XK0-006 guide torrent materials. Our XK0-006 exam questions are followed by many peers many years but never surpassed. We build a mature and complete XK0-006 learning guide R&D system, customers' information safety system & customer service system since past 10 years. Every candidate who purchases our valid XK0-006 Preparation materials will enjoy our high-quality guide torrent, information safety and golden customer service.

**XK0-006 Vce Test Simulator:** <https://www.fast2test.com/XK0-006-premium-file.html>

By using our XK0-006 exam braindumps, it will be your habitual act to learn something with efficiency. What is more, our research center has formed a group of professional experts responsible for researching new technology of the XK0-006 study materials. Many applicants, however, struggle to obtain up-to-date and genuine CompTIA XK0-006 exam questions in order to successfully prepare for the exam. So Fast2test's newest exam practice questions and answers about CompTIA certification XK0-006 exam are so popular among the candidates participating in the CompTIA certification XK0-006 exam.

The onPrepare event fires in the preparation phase. Programs XK0-006 such as Photoshop, Balsamiq, xScope, and others are critical components of the interface-building process.

By using our XK0-006 Exam Braindumps, it will be your habitual act to learn something with efficiency. What is more, our research center has formed a group of professional experts responsible for researching new technology of the XK0-006 study materials.

## **Quiz CompTIA - XK0-006 - Perfect Useful CompTIA Linux+ Certification Exam Dumps**

Many applicants, however, struggle to obtain up-to-date and genuine CompTIA XK0-006 exam questions in order to successfully prepare for the exam. So Fast2test's newest exam practice questions and answers about CompTIA certification XK0-006 exam are so popular among the candidates participating in the CompTIA certification XK0-006 exam.

Our XK0-006 exam questions are able to solve all your problems of preparing the exam.
