## **EC-COUNCIL Certified SOC Analyst (CSA) Sample Questions (Q104-Q109):**

### **NEW QUESTION # 104**

Mike is an incident handler for PNP Infosystems Inc. One day, there was a ticket raised regarding a critical incident and Mike was assigned to handle the incident. During the process of incident handling, at one stage, he has performed incident analysis and validation to check whether the incident is a true incident or a false positive.

Identify the stage in which he is currently in.

- A. Incident Recording and Assignment
- **B. Incident Triage**
- C. Incident Disclosure
- D. Post-Incident Activities

**Answer: B**

Explanation:

□

#### NEW QUESTION # 105

The Syslog message severity levels are labelled from level 0 to level 7. What does level 0 indicate?

- A. Alert
- B. Debugging
- **C. Emergency**
- D. Notification

**Answer: C**

Explanation:

In the Syslog protocol, severity levels are categorized from 0 to 7, with level 0 being the most severe. Level 0 indicates an "Emergency" situation which means the system is unusable. This level of severity is used for the most critical messages, often indicating a complete service or system shutdown.

References:

\* EC-Council's Certified SOC Analyst (CSA) course materials, which cover the Syslog severity levels as part of the training1.

\* InfraExam 2024, Certified SOC Analyst Part 01, which includes details on Syslog severity levels2.

□

#### NEW QUESTION # 106

An attacker, in an attempt to exploit the vulnerability in the dynamically generated welcome page, inserted code at the end of the company's URL as follows:

`http://technosoft.com.com/<script>alert("WARNING: The application has encountered an error");</script>`.

Identify the attack demonstrated in the above scenario.

- A. Session Attack
- B. Denial-of-Service Attack
- **C. Cross-site Scripting Attack**
- D. SQL Injection Attack

**Answer: C**

Explanation:

The attack demonstrated in the scenario is a Cross-site Scripting (XSS) attack. This is evident from the attacker's action of inserting a `<script>` tag into the URL, which is a common technique used in XSS attacks to execute malicious scripts in the context of the victim's browser. The script in the URL is designed to display an alert box with a warning message, which is a typical behavior of XSS to show that the attacker can execute JavaScript in the user's browser session.

References The answer can be verified through EC-Council's Certified SOC Analyst (CSA) course materials and study guides, which cover various types of cyber attacks, including XSS, and their characteristics.

□

#### NEW QUESTION # 107

What type of event is recorded when an application driver loads successfully in Windows?

- **A. Information**
- B. Warning
- C. Error
- D. Success Audit

**Answer: A**

Explanation:

In Windows, when an application driver loads successfully, it is recorded as an "Information" event in the Event Viewer. This type of event indicates the successful operation of an application or system component, which in this case is the loading of a driver. Information events are typically used to log the normal operations of software and hardware, providing a record that can be useful for troubleshooting and monitoring system activity.

References: The EC-Council's Certified SOC Analyst (C|SA) program covers the types of events recorded in Windows systems, including the significance of Information events. This knowledge is essential for SOC analysts who monitor and analyze logs as part of their role in identifying and responding to security incidents. The details about event types and their implications are included in the official EC-Council SOC Analyst study guides and courses<sup>1234</sup>.

### NEW QUESTION # 108

In which log collection mechanism, the system or application sends log records either on the local disk or over the network.

- A. rule-based
- B. pull-based
- C. signature-based
- D. push-based

**Answer: A**

### NEW QUESTION # 109
