HPE7-A01考題套裝，HPE7-A01最新題庫資源

VCESoft始終致力於為客戶提供高品質的學習資料，來提高考生一次性通過HP HPE7-A01考試的概率，這是考生獲取認證最佳捷徑。我們的HPE7-A01認證PDF和軟件版本具有最新更新的問題解答，涵蓋了所有考試題目和課題大綱，在線測試引擎測試可以幫助您準備并熟悉實際考試情況。在您決定購買我們產品之前，您可以先免費嘗試HP HPE7-A01 PDF版本的DEMO，此外，我們還提供全天24/7的在線支持，以便為客戶提供最好的便利服務。

最新的 Aruba Certified Professional HPE7-A01 免費考試真題 (Q54-Q59):

問題 #54

Which method is used to onboard a new UXI in an existing environment with 802.1X authentication?
(The sensor has no cellular connection)

- A. Use the UXI app on your smartphone and connect the UXI via Bluetooth
- B. Use the Aruba installer app on your smartphone to scan the barcode
- C. Connect the new UXI from an already installed one and adjust the initial configuration.
- D. Use the CLI via the serial cable and adjust the initial configuration.

答案: A

解題說明:

To onboard a new UXI in an existing environment with 802.1X authentication, you need to use the UXI app on your smartphone and connect the UXI via Bluetooth. The UXI app allows you to scan the QR code on the UXI sensor and configure its network settings, such as SSID, password, IP address, etc.

The Bluetooth connection allows you to communicate with the UXI sensor without requiring any network access or cellular connection. The other options are incorrect because they either do not use the UXI app or do not use Bluetooth.

問題 #55

What is an Aruba-recommended best practice for hardening that only applies to Aruba CX 6300 series switches with dedicated management ports?

- A. Implement a control plane ACL to limit access to approved IPs and/or subnets
- B. Manually enable Enhanced Security Mode from a console session.
- C. Create a dedicated management VRF, and assign the management port to it.
- D. Disable all management services on the default VRF.

答案： C

解題說明：

This is an Aruba-recommended best practice for hardening that only applies to Aruba CX 6300 series switches with dedicated management ports. A dedicated management port is a physical port that is used exclusively for out-of-band management access to the switch. A dedicated management VRF is a virtual routing and forwarding instance that isolates the management traffic from other traffic on the switch. By creating a dedicated management VRF and assigning the management port to it, the administrator can enhance the security and performance of the management access to the switch. The other options are incorrect because they either do not apply to switches with dedicated management ports or do not follow Aruba-recommended best practices. Reference:

問題 #56

A customer wants to provide wired security as close to the source as possible. The wired security must meet the following requirements:

- allow ping from the IT management VLAN to the user VLAN
- deny ping sourcing from the user VLAN to the IT management VLAN

The customer is using Aruba CX 6300s

What is the correct way to implement these requirements?

- A. Apply an outbound ACL on the user VLAN denying icmp echo traffic toward the IT management VLAN
- B. Apply an inbound ACL on the user VLAN allowing icmp echo-reply traffic toward the IT management VLAN
- C. Apply an outbound ACL on the user VLAN allowing icmp echo-reply traffic toward the IT management VLAN
- D. Apply an inbound ACL on the user VLAN denying icmp echo traffic toward the IT management VLAN

答案： D

解題說明：

An inbound ACL is applied to traffic entering a port or VLAN. An outbound ACL is applied to traffic leaving a port or VLAN. To deny ping sourcing from the user VLAN to the IT management VLAN, an inbound ACL on the user VLAN should be used to filter icmp echo traffic toward the IT management VLAN. Icmp echo-reply traffic is not needed to be allowed because it is already permitted by default. References:

問題 #57

List the WPA 4-Way Handshake functions in the correct order.

答案：

解題說明：

- * Proves knowledge of the PMK
- * Exchanges messages for generating PTK
- * Distributes an encrypted GTK to the client
- * Sets first initialization vector (IV)

問題 #58

Due to a shipping error, five (5) Aruba AP-515S and one (1) Aruba CX 6300 were sent directly to your new branch office. You have configured a new group persona for the new branch office devices in Central, but you do not know their MAC addresses or serial numbers. The office manager is instructed via text message on their smartphone to onboard all the new hardware into Aruba

Central What application must the office manager use on their phone to complete this task?

- A. Aruba installer App
- B. Aruba CX Mobile App
- C. Aruba Central App
- D. Aruba Onboard App

答案：A

解題說明：

Explanation

Aruba Installer App is a mobile app that simplifies site installations and enables network connectivity for Aruba devices. The app allows the user to scan the barcode of the device and add it to the network using Aruba Central. The app also automates importing Aruba devices into Aruba NetEdit for intelligent configuration management and continuous conformance validation
