## Salesforce Certified Education Cloud Consultant Sample Questions (Q213-Q218):

### NEW QUESTION # 213

The Dean of the Business school has a dashboard that displays the application yield by program, geographic distribution of applicants, and recruitment pipeline. The Dean wants the same reports for program directors. Sharing settings have been configured so program directors can only see recruitment and application information for their own program. How can the consultant meet the business requirement?

- A. Set View Dashboard As to the Dean and share it with program directors.
- B. Set View Dashboard As to the dashboard viewer and share it with program directors.
- C. Check the Let Dashboard Viewers Choose Whom They View the Dashboard As on the Dean's dashboard.
- D. Add a dashboard filter to the Dean's dashboard and save it to All Folders.

**Answer: B**

Explanation:

The consultant can meet the business requirement by setting View Dashboard As to the dashboard viewer and sharing it with program directors. This will allow the program directors to see the same reports as the Dean, but filtered by their own program, based on the sharing settings. Checking the Let Dashboard Viewers Choose Whom They View the Dashboard As on the Dean's dashboard, setting View Dashboard As to the Dean and sharing it with program directors, and adding a dashboard filter to the Dean's dashboard and saving it to All Folders are not options that can meet the business requirement. **NEW QUESTION # 214**

Where can a customer access the open-source common sprint project code repositories?

- A. Partner Community
- B. GitHub
- C. Trailblazer Community

**Answer: B**

Explanation:

GitHub is a web-based platform that hosts open-source code repositories for developers to collaborate on projects<sup>1</sup>. Customers can access the common sprint project code repositories on GitHub by visiting the Salesforce.org Open Source Commons organization page<sup>2</sup>. There, they can find various community projects stemming from Salesforce.org Open Source Community Sprints, such as Data Generation Toolkit, Outbound Funds Module, and Membership Schema and Benefits<sup>2</sup>. These projects are compatible with Education Cloud and can be used to extend its functionality and features. Reference:

1: What is GitHub? - GitHub Docs<sup>3</sup>

2: Salesforce.org Open Source Commons - Community Sprint Projects<sup>4</sup>

**NEW QUESTION # 215**

A large online university uses Salesforce with the Education Data Architecture (EDA) to manage its operations. Its Salesforce environment has a large volume of records and it takes a long time to search and generate list views.

Which feature should the consultant use to resolve the issue?

- A. Custom Index
- B. Data Loader error logs
- C. Table-Driven Trigger Management
- D. MuleSoft Anypoint Platform

**Answer: A**

Explanation:

The consultant should use a custom index to resolve the issue of taking a long time to search and generate list views for the large online university's Salesforce environment that has a large volume of records and uses EDA. A custom index is a feature that allows users to create an index on a field that is not indexed by default, such as a custom field, a long text area field, or a multi-select picklist field. A custom index can help improve the performance and speed of queries and list views that use the indexed field as a filter. The consultant should identify the fields that are frequently used in searches and list views, and request Salesforce Support to create a custom index on them. MuleSoft Anypoint Platform, Data Loader error logs, and Table-Driven Trigger Management are not features that can resolve the issue of taking a long time to search and generate list views for the large online university's Salesforce environment that has a large volume of records and uses EDA. **NEW QUESTION # 216**

A school wants to use the K-12 Architecture Kit to track elementary students and their parents. Which consideration about the K-12 Architecture Kit should the consultant discuss with the school?

- A. It is built on the Education Data Architecture.
- **B. It is built on Nonprofit Success Pack.**
- C. It requires Experience Cloud.

**Answer: B**

Explanation:

The consultant should discuss with the school that K-12 Architecture Kit is built on Nonprofit Success Pack as a consideration about K-12 Architecture Kit when using it to track elementary students and their parents. K-12 Architecture Kit is a product that provides a flexible and scalable data architecture for K-12 schools to manage their student lifecycle. K-12 Architecture Kit is built on Nonprofit Success Pack, which is a product that provides a data architecture for nonprofit organizations to manage their constituents and donors. K-12 Architecture Kit extends Nonprofit Success Pack by adding objects and features such as Contacts, Accounts, Relationships, Affiliations, Attendance Events, or Behavior Responses. The consultant should discuss with the school that K-12 Architecture Kit is built on Nonprofit Success Pack as a consideration about K-12 Architecture Kit when using it to track elementary students and their parents by explaining the benefits and challenges of using Nonprofit Success Pack for a K-12 school, such as data model, terminology, or configuration. It requires Experience Cloud, it is built on EDA, or it is built on Admissions Connect are not considerations about K-12 Architecture Kit that the consultant should discuss with the school when using it to track elementary students and their parents. **NEW QUESTION # 217**

A small college plans to use Salesforce for its student services. A part-time system admin has been working with a program coordinator who has previous Salesforce experience and is eager to work on the project.

What should the consultant recommend?

- A. The program coordinator's role should be on top of the role hierarchy.
- **B. The program coordinator should be a Salesforce power user.**
- C. The program coordinator should be assigned the System Admin profile.

**Answer: B**

Explanation:

The consultant should recommend that the program coordinator should be a Salesforce power user for the small college that plans to use Salesforce for its student services and has a part-time system admin who has been working with a program coordinator who has previous Salesforce experience and is eager to work on the project. A Salesforce power user is a user who has advanced knowledge and skills in using Salesforce and can perform tasks such as creating reports, dashboards, or workflows. The program coordinator should be a Salesforce power user for the small college that plans to use Salesforce for its student services and has a part-time system admin who has been working with a program coordinator who has previous Salesforce experience and is eager to work on the project by leveraging their Salesforce experience and eagerness to work on the project to support the part-time system admin and contribute to the project's success. The program coordinator should not be assigned the System Admin profile, the program coordinator's role should not be on top of the role hierarchy, or the program coordinator should not be a Salesforce end user for the small college that plans to use Salesforce for its student services and has a part-time system admin who has been working with a program coordinator who has previous Salesforce experience and is eager to work on the project.
