Free PDF Quiz Cyber AB - Valid CMMC-CCA - Certified CMMC Assessor (CCA) Exam Exam Duration

Are you still worrying about the high difficulty to pass Cyber AB certification CMMC-CCA exam? Are you still sleeplessly endeavoring to review the book in order to pass Cyber AB CMMC-CCA Exam Certification? Do you want to pass Cyber AB CMMC-CCA exam certification faster? Be quick to select our Exams-boost! Having it can quickly fulfill your dreams.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q130-

Q135):

NEW QUESTION # 130

During the planning and preparation discussions, a key member of the C3PAO Assessment Team falls ill and is unavailable for the originally scheduled assessment dates. The OSC is eager to proceed as planned and has expressed willingness to accommodate a smaller assessment team. If the OSC Assessment Official asks the C3PAO for advice on how to proceed, the Lead Assessor, on behalf of the C3PAO, should do which of the following?

- A. Provide sufficient advice and recommendations.
- **B. Politely refuse to provide any advice or recommendations.**
- C. Provide general advice but avoid specific recommendations that could be seen as implementation assistance.
- D. Offer limited advice, but only if the OSC agrees to proceed with the assessment as originally scheduled.

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CoPC prohibits C3PAOs from offering advice or implementation assistance during assessments, making Option B correct.

Options A, C, and D risk crossing this line.

Extract from Official Document (CoPC):

* Paragraph 3.1 - Professionalism (pg. 6): "Under no circumstances shall the C3PAO offer advice or implementation assistance."

References:

CMMC Code of Professional Conduct, Paragraph 3.1.

NEW QUESTION # 131

A contractor plans to bid for a DoD contract and has installed new network file servers to separate their commercial and DoD work. When examining the server documentation, you realize the server has some open ports. Upon further testing, you know that the server has some default features that are not essential for file storage or transfer. The server has a default remote desktop functionality that allows users remote access to the server's desktop environment. Files are transferred by default using FTP which is less secure than Server Message Block (SMB) protocol. However, the contractor's operations do not require remote access capabilities. Although the roles of each system are defined in their configuration management policy, a user can install any application or service they need. After some interviews, you learn that this ensures every employee is comfortable using a system or software they are most conversant with, despite having defined services or software for carrying out specific functions. Upon speaking with the OSC PoC when assessing CM.L2-3.4.6 -Least Functionality, they acknowledge deficiencies, place the practice in a POA&M, and request that you grant conditional certification. How would you respond?

- **A. Politely decline the OSC's request and inform them that CM.L2-3.4.6 - Least Functionality cannot be placed in a POA&M. Also, inform them that granting conditional CMMC certification when they do not meet the requirement is in violation of the CMMC Code of Professional Conduct (CoPC)**
- B. Walk out of the assessment and file a conflict of interest with the CMMC AB
- C. Grant them conditional certification
- D. Offer to provide consulting services to help them meet CM.L2-3.4.6 - Least Functionality quickly

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

CM.L2-3.4.6 (5-point practice) requires "configuring systems to provide only essential capabilities." Open ports, unnecessary features, and user-installed software violate this. Per the CMMC Assessment Process (CAP), 5-point practices cannot be placed in a POA&M for conditional certification-they must be fully met.

Granting conditional certification (D) violates the CoPC. Consulting (A) or walking out (C) aren't appropriate assessor responses. B aligns with CMMC rules.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), CM.L2-3.4.6: "No POA&M for 5-point practices."

* CAP v5.6.1: "5-point practices must be Met for certification."

NEW QUESTION # 132

You are on-site with an Assessment Team at a medium-sized organization. When discussing how they protect their company's information from malware, spyware, etc., the administrator you are interviewing offers to show you the entire process from start to finish since she had that on her to-do list for the day. She opens the machine, turns it on, and installs what she says is anti-malware software. She also demonstrates how their deployed Next Generation Firewall (NGFW) works. You have never heard of this software, so you ask her where it was purchased. You later learn it is an open-source solution. Based on the scenario and the requirements of CMMC practice SI.L2-3.14.6 - Monitor Communications for Attacks, what is your likely determination?

- A. Find the OSC's implementation of the practice as Met
- B. Find the OSC's implementation as partially Met as they are achieving several objectives required of this practice
- C. Request for more information
- D. Fail the OSC's implementation of the practice

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

SI.L2-3.14.6 requires "monitoring organizational communications for attacks or indicators of potential attacks." The NGFW supports this, but the unvetted open-source anti-malware raises concerns about reliability and effectiveness, which could impact overall monitoring. Without further details on vetting, configuration, and monitoring processes, a definitive score isn't possible. "Request more information" (D) is appropriate to assess compliance fully, per the CMMC guide's emphasis on evidence sufficiency.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), SI.L2-3.14.6: "Examine tools and processes for monitoring; assess reliability of solutions."

* NIST SP 800-171A, 3.14.6: "Interview and examine to verify monitoring effectiveness." Resources:

[0_FINAL_202112016_508.pdf](https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.0_FINAL_202112016_508.pdf)

NEW QUESTION # 133

Dwayne is the Lead Assessor for a C3PAO Assessment Team conducting an assessment for an OSC. During the evaluation, he learns that the OSC recently won a lucrative contract with the Department of Defense, a significant milestone for the organization. Impressed by the OSC's accomplishment, Dwayne begins to view the organization more favorably and is inclined to interpret the evidence gathered during the assessment in a way that would enable the OSC to achieve the desired CMMC certification level. What is the primary reason Dwayne's assessment of the OSC may be influenced?

- A. Lack of experience
- B. Time constraints
- C. Incomplete understanding of the CMMC requirements
- D. Bias

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Dwayne's favorable view of the OSC due to its recent DoD contract success exemplifies positive bias, a key concern in the CMMC Assessment Process (CAP). Bias influences how evidence is interpreted, potentially leading to overly favorable assessments that overlook noncompliances. The CAP requires assessors to evaluate practices objectively within the OSC's context, free from external factors like contract wins, to maintain assessment integrity.

Option A (incomplete understanding) assumes a knowledge gap not indicated here. Option B (time constraints) and Option C (lack of experience) are unrelated to Dwayne's described behavior. Option D (bias) directly addresses the influence of his positive perception, making it the correct answer per CAP guidelines.

Reference Extract:

* CMMC Assessment Process (CAP) v1.0, Section 2.3: "Personal biases, whether positive or negative, can shape evidence interpretation, leading to potential inaccuracies." Resources: <https://cyberab.org/Portals/0/Documents/Process-Documents/CMMC-Assessment-Process-CAP-v1.0.pdf>

NEW QUESTION # 134

A defense contractor retains your services to assess their information systems for CMMC compliance, particularly configuration management. The contractor uses CFEngine 3 for automated configuration and maintenance of its computer systems and networks.

While chatting with the network's system admins, you realize they have deployed a modern compliance checking and monitoring tool. However, when examining their configuration management policy, you notice the contractor uses different security configurations than those recommended by product vendors. The system administrator informs you they do this to meet the minimum configuration baselines required to achieve compliance and align with organizational policy. When examining the contractor's security configuration checklists, which of the following parameters are you not likely to find?

- A. The contractor's assessment readiness status
- B. Network configuration and port management
- C. Protocol usage and application allowlisting
- D. File and directory permissions

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

CM.L2-3.4.2 involves "enforcing security configuration settings." Checklists typically include technical parameters like permissions (B), protocols (C), and network settings (D), per CMMC guidance. Assessment readiness status (A) is an administrative metric, not a config setting, and belongs in a CA-RR checklist, not security configs.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), CM.L2-3.4.2: "Checklists include permissions, protocols, network settings; readiness status separate."

* NIST SP 800-171A, 3.4.2: "Examine technical config parameters."

Resources:

* https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.0_FINAL_202112016_508.pdf

NEW QUESTION # 135

.....

If you want to get a better job and relieve your employment pressure, it is essential for you to get the CMMC-CCA certification. However, due to the severe employment situation, more and more people have been crazy for passing the CMMC-CCA exam by taking examinations, the exam has also been more and more difficult to pass. Our CMMC-CCA test guide has become more and more popular in the world. Of course, if you decide to buy our CMMC-CCA latest question, we can make sure that it will be very easy for you to pass CMMC-CCA exam torrent that you can learn and practice it. Then you just need 20-30 hours to practice our study materials that you can attend your exam. It is really spend your little time and energy.
