EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q98-Q103):

NEW QUESTION # 98

Which of the following policies to help define what users can and should do to use the network and organization of computer equipment?

- A. user policy
- B. general policy
- C. IT policy
- D. None
- E. remote access policy

Answer: A

NEW QUESTION # 99

Which of the following is true regarding any attack surface?

- A. Decrease in risk exposures increases the attack surface
- B. Increase in vulnerabilities decreases the attack surface
- C. Decrease in vulnerabilities increases the attack surface
- D. Decrease in vulnerabilities decreases the attack surface

Answer: D

NEW QUESTION # 100

Which of the following standards does a cloud service provider has to comply with, to protect the privacy of its customer's personal information?

- A. ISO/IEC 27021
- B. ISO/IEC 27019
- C. ISO/IEC 27020
- D. ISO/IEC 27018

Answer: D

Explanation:

ISO/IEC 27018 is a code of practice for cloud service providers that handle personally identifiable information (PII). It provides a framework for protecting the privacy of PII in the cloud, consistent with the privacy principles in ISO/IEC 29100 for the public

cloud computing environment. This standard is particularly relevant for cloud service providers needing to demonstrate they have implemented effective privacy controls to protect their customers' data. The adoption of ISO/IEC 27018 by a cloud service provider is a strong indication of compliance with privacy laws and regulations, ensuring the protection of personal information in the cloud.

NEW QUESTION # 101

Which of the following is designed to detect unwanted changes by observing the flame of the environment associated with combustion?

- A. Fire extinguishing system
- B. sprinkler
- C. None
- **D. Smoke alarm system**
- E. Gaseous fire-extinguishing systems

Answer: D

NEW QUESTION # 102

A CCTV camera, which can be accessed on the smartphone from a remote location, is an example of _____

- **A. Device-to-Cloud communication model**
- B. Device-to-Gateway communication model
- C. Back-End Data-Sharing communication model
- D. Device-to-Device communication model

Answer: A

Explanation:

A CCTV camera that can be accessed on a smartphone from a remote location typically uses the Device-to-Cloud communication model. This model involves devices that connect directly to the cloud where data is stored and processed. Users can access this data through an application on their smartphones, allowing for remote monitoring and control. This setup is common for IP cameras that transmit data over the internet, enabling users to view live footage or recordings from anywhere with an internet connection¹²³.
