Please choose the best CompTIA Linux+ Certification Exam (XK0-006) exam questions format and download it quickly and start this journey today.

CompTIA Linux+ Certification Exam Sample Questions (Q68-Q73):

NEW QUESTION # 68

Which of the following commands should an administrator use to see a full hardware inventory of a Linux system?

- A. dmidecode
- B. lsmod
- C. lscpu
- D. dmesg

Answer: A

Explanation:

dmidecode retrieves detailed hardware information from the system's DMI/SMBIOS, including BIOS, CPU, memory, and motherboard details, providing a full hardware inventory.

NEW QUESTION # 69

A Linux user runs the following command:

```
nohup ping compia.com &
```

Which of the following commands should the user execute to attach the process to the current terminal?

- A. jobs
- B. renice
- C. fg
- D. exec

Answer: C

Explanation:

The fg command brings a background job to the foreground, attaching it to the current terminal.

Since the ping process was started in the background with &, fg is the correct way to reattach it.

NEW QUESTION # 70

Users report that a Linux system is unresponsive and simple commands take too long to complete. The Linux administrator logs in to the system and sees the following:

Which of the following is the system experiencing?

- A. High uptime
- B. High latency
- C. High CPU load
- D. High I/O wait times

Answer: C

Explanation:

The load averages (8.71, 8.24, 7.71) are well above the number of CPUs (4), showing CPU saturation. Additionally, Output 2 indicates very high CPU usage (65.88% usr, 20.54% sys) with

0% idle, confirming the system is under heavy CPU load, which explains the unresponsiveness.

NEW QUESTION # 71

A systems administrator is configuring new Linux systems and needs to enable passwordless authentication between two of the servers. Which of the following commands should the administrator use?

- A. `ssh-add -t rsa $$ scp -rp ~/.ssh john@server2`
- B. `ssh-agent -i rsa $$ ssh-copy-id ~/.ssh/key john@server2`
- C. `ssh-keyscan -t rsa $$ ssh-copy-id john@server2 -i ~/.ssh/key`
- D. `ssh-keygen -t rsa $$ ssh-copy-id -i ~/.ssh/id_rsa.pub john@server2`

Answer: D

Explanation:

`ssh-keygen -t rsa` generates an RSA key pair.

`ssh-copy-id -i ~/.ssh/id_rsa.pub john@server2` copies the public key to the remote server's `authorized_keys`, enabling passwordless login.

NEW QUESTION # 72

A Linux systems administrator is resolving a privileged access issue for users who are members of an admin group. Which of the following configuration files should the administrator update so the users in the admin group will have root privileged access to the Linux system?

- A. `/etc/sudoers`
- B. `/etc/login.defs`
- C. `/etc/shadow`
- D. `/etc/group`

Answer: A

Explanation:

The /etc/sudoers file controls which users and groups can elevate privileges via sudo. By adding a line such as %admin ALL=(ALL) ALL to /etc/sudoers, members of the admin group gain root-level access.

NEW QUESTION # 73

.....

The exam outline will be changed according to the new policy every year, and the XK0-006 questions torrent and other teaching software, after the new exam outline, we will change according to the syllabus and the latest developments in theory and practice and revision of the corresponding changes, highly agree with outline.
