We promise you that if you fail to pass your exam after using SAFe-RTE exam materials, we will give you refund. We are pass guarantee and money back guarantee. Moreover, SAFe-RTE training materials cover most of knowledge points for the exam, and you can master the major knowledge points as well as improve your professional ability after practicing. SAFe-RTE Exam Materials contain both questions and answers, and it's convenient for you to have a quickly check after practicing. We also have online and offline chat service, if you have any questions about SAFe-RTE exam dumps, you can consult us.

Scaled Agile Framework (SAFe) is a widely adopted framework for large-scale agile software development. It provides a structured and scalable approach to agile development, which enables organizations to deliver high-quality software in a consistent and predictable manner. One of the critical roles in SAFe is the Release Train Engineer (RTE). The RTE is responsible for coordinating and facilitating the activities of a SAFe release train, which is a group of agile teams that work together to deliver a common solution.

The SAFe-RTE certification program is a comprehensive exam that covers a wide range of topics, including Agile release train planning, execution, and delivery. It equips candidates with the necessary knowledge and skills to manage the entire lifecycle of an Agile release train, from planning to delivery. SAFe Release Train Engineer certification program is designed to validate the candidate's understanding of the SAFe framework and their ability to apply it in a real-world setting. By acquiring the SAFe-RTE Certification, professionals can demonstrate their expertise in managing and coordinating Agile teams while delivering value to the enterprise.

Cert Scaled Agile SAFe-RTE Exam - SAFe-RTE Valid Test Format

Nowadays, everyone lives so busy every day, and we believe that you are no exception. If you want to save your time, it will be the best choice for you to buy our SAFe-RTE study torrent. Because the greatest advantage of our study materials is the high effectiveness. As a powerful tool for a lot of workers to walk forward a higher self-improvement, VCE4Plus continue to pursue our passion for advanced performance and human-centric technology. We aimed to help some candidates who have trouble in pass their SAFe-RTE Exam and only need few hours can grasp all content of the exam. In recent years, our test torrent has been well received and have reached 99% pass rate with all our dedication.

Scaled Agile SAFe Release Train Engineer Sample Questions (Q202-Q207):

NEW QUESTION # 202

Which responsibility belongs to the Product Owner?

- A. Testing Features
- **B. Prioritizing the Team Backlog**
- C. Assigning PI Objectives

Answer: B

Explanation:

The Product Owner (PO) is a key role within the Agile team, primarily responsible for maximizing the value delivered by the team. This is achieved by ensuring that the Team Backlog is aligned with customer and stakeholder needs. The PO's responsibilities include:

* Defining and prioritizing the Team Backlog: The PO is responsible for building, editing, and maintaining the Team Backlog, which includes writing stories, refining them, and prioritizing them1.

* Balancing demands: The PO must balance the needs of various stakeholders, including customers, business owners, and the development team, to ensure that the team is working on the most valuable work items1.

* Participating in team events: The PO actively participates in team events such as Iteration Planning, Iteration Review, and Iteration Retrospective, where they collaborate with the team to refine and prioritize backlog items1.

* Collaborating with Product Management: The PO works closely with Product Management to ensure that the team's work aligns with the overall product strategy and roadmap1.

* Representing the customer: As the 'voice of the customer,' the PO ensures that the team understands and works towards the customer's needs and preferences1.

In summary, the PO's role is crucial in maintaining the flow of value through the prioritization and refinement of the Team Backlog, ensuring that the team consistently delivers features and improvements that meet the customer's needs and align with the strategic goals of the organization1.

NEW QUESTION # 203

What action can result in reduced collaboration between teams during the Program Increment (PI) Planning event?

- A. Overprepare for PI Planning
- B. Include inexperienced team members
- C. Skip the Inspect and Adapt event
- **D. Start the Agile Release Train without a System Team in place**

Answer: D

Explanation:

Starting an Agile Release Train (ART) without a System Team in place can lead to reduced collaboration between teams during the Program Increment (PI) Planning event. The System Team plays a vital role in supporting the ART by addressing system-level issues and enabling integration across different teams.

Without this support, teams may face challenges in integrating their work with others, leading to silos and reduced collaboration. The presence of a System Team is essential for facilitating effective communication and collaboration during PI Planning, ensuring that teams can work together efficiently and that dependencies are managed properly12.

NEW QUESTION # 204

The Release Train Engineer ensures that Business Owners assign business value to what during Program Increment (PI) Planning?

- A. Program-level PI Objectives
- B. Stories
- **C. Team-level PI Objectives**
- D. Features

Answer: C

Explanation:

During PI Planning, the RTE works with Business Owners to ensure they assign business value scores to each team's PI Objective:

* Quantifying Value: Assigning a numerical score to objectives allows for objective measurement of the value delivered at the end of the PI.

* Prioritization and Decision-Making: Business value scores help teams and stakeholders understand the relative importance of objectives, informing decision-making processes.

Scaled Agile Framework (SAFe) Program Increment and PI Planning Articles: Both articles outline the involvement of Business Owners and the quantitative scoring of PI Objectives. <https://www.scaledagileframework.com/pi-planning/>

NEW QUESTION # 205

What is one way Kanbans are used in SAFe?

- A. To manage runway cadence
- B. To manage Program Increment (PI) Objectives
- **C. To manage queue length**

Answer: C

Explanation:

Kanban is a visual management tool used in SAFe to help Agile teams visualize their workflow and manage the status of work items at various stages of development. One of the primary ways Kanban is utilized within SAFe is to manage Work-In-Progress (WIP) limits. By doing so, teams can effectively control the queue length, ensuring that work items are processed in a timely manner and that the flow of work is optimized for efficiency². This method aligns with the Lean-Agile principles of SAFe, which emphasize the importance of visualizing work, limiting WIP, and achieving a sustainable pace for the team's work³.

NEW QUESTION # 206

What is one recommended practice when planning across large time zone differences?

- **A. Allow for overlapping hours**
- B. Choose the time zone with the most team members
- C. Plan by time zone, then consolidate the plans
- D. Choose one time zone for planning, then rotate for the next PI

Answer: A

Explanation:

One recommended practice when planning across large time zone differences is to allow for overlapping hours. This approach acknowledges the challenges posed by multiple time zones and seeks to find a common time window where all team members can actively participate in the planning process. By doing so, it ensures that everyone has the opportunity to contribute to the discussions and decision-making, which is crucial for alignment and collaboration in a distributed environment¹. This practice is part of creating a working agreement that accommodates time zone differences and supports effective communication and coordination among remote team members².

NEW QUESTION # 207

.....

The content of our SAFe-RTE practice engine is chosen so carefully that all the questions for the SAFe-RTE exam are contained. And our SAFe-RTE study materials have three formats which help you to read, test and study anytime, anywhere. This means with our products you can prepare for exams efficiently and at the same time you will get 100% success for sure. If you desire a SAFe-

RTE Certification, our products are your best choice.
