

# Microsoft AZ-700 Questions - Say Goodbye To Exam Anxiety

**Top 5 Facts to Rely on Microsoft AZ-700 Practice Tests**

1. You get the actual Microsoft AZ-700 exam experience.
2. Time management becomes easy during the actual exam.
3. Valuable insights offer more improvement scope.
4. Rigorous Practice Makes you perfect about the Microsoft AZ-700 syllabus domains.
5. Self-assessment provides self-satisfaction regarding the AZ-700 exam preparation.

P.S. Free & New AZ-700 dumps are available on Google Drive shared by iPassleader: [https://drive.google.com/open?id=17XmZKxL9Bv6L\\_i7AGUYWIMkUW74X4cd5](https://drive.google.com/open?id=17XmZKxL9Bv6L_i7AGUYWIMkUW74X4cd5)

The advent of our AZ-700 study guide with three versions has helped more than 98 percent of exam candidates get the certificate successfully. Rather than insulating from the requirements of the AZ-700 real exam, our AZ-700 practice materials closely correlated with it. And their degree of customer's satisfaction is escalating. Besides, many exam candidates are looking forward to the advent of new AZ-700 versions in the future.

Microsoft certification can be used in different IT Company and it will be your access to the IT elites. But you may find that the AZ-700 study materials are difficult for you. You need much time to prepare and the cost of the AZ-700 Practice Exam is high, you wonder it will be a great loss for you when fail the exam. It will be bad thing. iPassleader will help you to reduce the loss and save the money and time for you.

**Vce AZ-700 Download & Latest AZ-700 Test Format**

To increase your chances of success, consider utilizing the iPassleader AZ-700 Exam Questions, which are valid, updated, and reflective of the actual AZ-700 exam. Don't miss the opportunity to strengthen your Microsoft AZ-700 exam preparation with these valuable questions. The iPassleader is a leading platform that has been assisting the Microsoft AZ-700 Exam candidates for many years. Over this long time period countless AZ-700 exam candidates have passed their Microsoft AZ-700 certification exam. They got success in Designing and Implementing Microsoft Azure Networking Solutions exam with flying colors and did a job in top world companies.

Microsoft AZ-700 (Designing and Implementing Microsoft Azure Networking Solutions) certification exam is designed for professionals who want to demonstrate their expertise in designing and implementing networking solutions on the Microsoft Azure platform. AZ-700 Exam measures the candidate's ability to design and implement Azure networking solutions, including virtual networks, network security groups, load balancers, and VPN gateways.

## Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q112-Q117):

### NEW QUESTION # 112

You have two Azure App Service instances that host the web apps shown the following table.

Name	Web app URLs
As1.contoso.com	https://app1.contoso.com/ https://app2.contoso.com/
As2.contoso.com	https://app3.contoso.com/ https://app4.contoso.com/

You deploy an Azure application gateway that has one public frontend IP address and two backend pools.

You need to publish all the web apps to the application gateway. Requests must be routed based on the HTTP host headers.

What is the minimum number of listeners and routing rules you should configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Listeners:

Routing rules:

**Answer:**

Explanation:

1, 2

### NEW QUESTION # 113

You have an Azure subscription that contains an Azure VPN gateway named GW1. GW1 provides Point-to Site (P2S) VPN connectivity.

Users connect to GW1 from a Windows 11 device by using an SSTP connection.

You need to ensure that the P2S VPN connections support Microsoft Entra authentication.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Answer Area**

- Register the Microsoft Hybrid Network resource provider.
- For the point-to-site configuration of GW1, set Authentication type to Microsoft Entra and set Tunnel type to OpenVPN (SSL).
- Grant the Azure VPN application admin consent to the Microsoft Entra tenant.
- For the point-to-site configuration of GW1, set Authentication type to Microsoft Entra and set Tunnel type to IKEv2 and SSTP (SSL).
- Download the Azure VPN Client profile configuration package and distribute the package to the users.

**Answer:**

**Explanation:**

The screenshot shows a Microsoft Learn console interface. On the left, under 'Actions', there are five steps: 1. Register the Microsoft.HybridNetwork resource provider. 2. For the point-to-site configuration of GW1, set Authentication type to Microsoft Entra and set Tunnel type to OpenVPN (SSL). 3. Grant the Azure VPN application admin consent to the Microsoft Entra tenant. 4. For the point-to-site configuration of GW1, set Authentication type to Microsoft Entra and set Tunnel type to IKEv2 and SSTP (SSL). 5. Download the Azure VPN Client profile configuration package and distribute the package to the users. On the right, under 'Answer Area', there are three steps: 1. Grant the Azure VPN application admin consent to the Microsoft Entra tenant. 2. For the point-to-site configuration of GW1, set Authentication type to Microsoft Entra and set Tunnel type to IKEv2 and SSTP (SSL). 3. Download the Azure VPN Client profile configuration package and distribute the package to the users.

**Explanation:**

The screenshot shows a Microsoft Learn console interface. On the left, under 'Actions', there are two steps: 1. Register the Microsoft.HybridNetwork resource provider. 2. For the point-to-site configuration of GW1, set Authentication type to Microsoft Entra and set Tunnel type to OpenVPN (SSL). On the right, under 'Answer Area', there are three steps: 1. Grant the Azure VPN application admin consent to the Microsoft Entra tenant. 2. For the point-to-site configuration of GW1, set Authentication type to Microsoft Entra and set Tunnel type to IKEv2 and SSTP (SSL). 3. Download the Azure VPN Client profile configuration package and distribute the package to the users.

**NEW QUESTION # 114**

Your company has offices in London, Tokyo, and New York.

The company has a web app named App1 that has the Azure Traffic Manager profile shown in the following table.

Parameter	Value	Azure region
DNS Name	app1.trafficmanager.net	Not applicable
Endpoint	app1-asia.azurewebsites.net	East Asia
Endpoint	app1-na.azurewebsites.net	East US
Endpoint	app1-na.azurewebsites.net	UK South
Routing method	Geographic	Not applicable

In Asia, you plan to deploy an additional endpoint that will host an updated version of App1.

You need to route 10 percent of the traffic from the Tokyo office to the new endpoint during testing.

What should you configure in Traffic Manager?

- A. two profiles and five endpoints
- **B. two profiles and four endpoints**
- C. three profiles and four endpoints
- D. one profile and five endpoints

**Answer: B**

**Explanation:**

Need two profiles. Add one Child profile using Weighted routing. One additional trial endpoint, to the existing three, for the Child Profile is needed.

Note 1: Each Traffic Manager profile specifies a single traffic-routing method. However, there are scenarios that require more sophisticated traffic routing than the routing provided by a single Traffic Manager profile. You can nest Traffic Manager profiles to combine the benefits of more than one traffic-routing method.

Note 2: Weighted routing: Select Weighted routing when you want to distribute traffic across a set of endpoints based on their weight. Set the weight the same to distribute evenly across all endpoints.

Reference:

<https://docs.microsoft.com/en-us/azure/traffic-manager/traffic-manager-nested-profiles>

<https://docs.microsoft.com/en-us/azure/traffic-manager/traffic-manager-routing-methods>

**NEW QUESTION # 115**

You have an Azure subscription that contains the virtual machines shown in the following table.

Name	Connected to
VM1	Vnet1/Subnet1
VM2	Vnet1/Subnet2

Subnet1 and Subnet2 are associated to a network security group (NSG) named NSG1 that has the following outbound rule:

Priority: 100

Port: Any

Protocol: Any

Source: Any

Destination: Storage

Action: Deny

You create a private endpoint that has the following settings:

Name: Private1

Resource type: Microsoft.Storage/storageAccounts

Resource: storage1

Target sub-resource: blob

Virtual network: Vnet1

Subnet: Subnet1

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
From VM2, you can create a container in storage1	<input type="radio"/>	<input type="radio"/>
From VM1, you can upload data to a blob storage container in storage1	<input type="radio"/>	<input type="radio"/>
From VM2, you can upload data to a blob storage container in storage1	<input type="radio"/>	<input type="radio"/>

**Answer:**

Explanation:

Statements	Yes	No
From VM2, you can create a container in storage1	<input type="radio"/>	<input checked="" type="radio"/>
From VM1, you can upload data to a blob storage container in storage1	<input checked="" type="radio"/>	<input type="radio"/>
From VM2, you can upload data to a blob storage container in storage1	<input type="radio"/>	<input checked="" type="radio"/>

Explanation

Yes, Yes, Yes

NSG rules applied to the subnet hosting the private endpoint are not applied to the private endpoint. So the NSG1 doesn't limit storage access from either VM1 or VM2.

<https://docs.microsoft.com/en-us/azure/storage/common/storage-private-endpoints#network-security-group-rules>

**NEW QUESTION # 116**

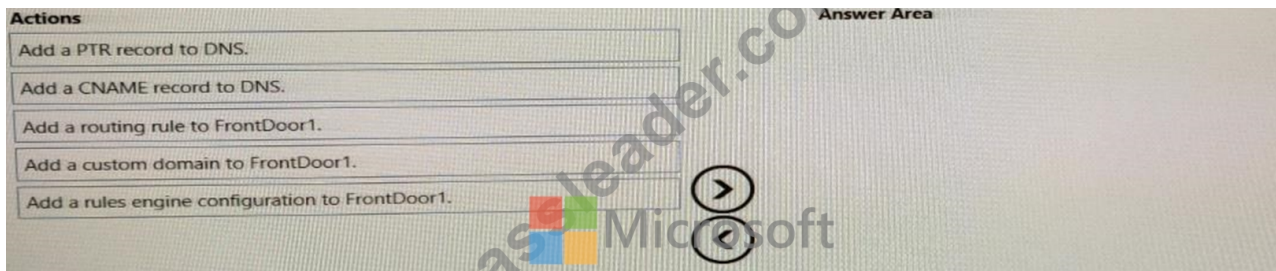

You have an Azure Front Door instance named FrontDoor1.

You deploy two instances of an Azure web app to different Azure regions.

You plan to provide access to the web app through FrontDoor1 by using the name app1.contoso.com.

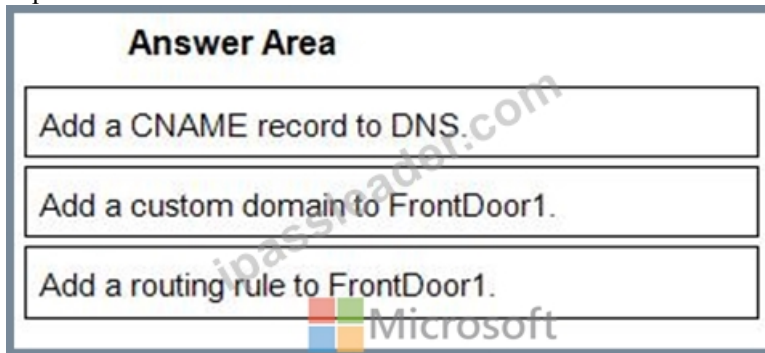

You need to ensure that FrontDoor1 is the entry point for requests that use app1.contoso.com.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

- 1 - Add a CNAME record to DNS.
- 2 - Add a custom domain to FrontDoor1.
- 3 - Add a routing rule to FrontDoor1.

#### NEW QUESTION # 117

.....

We have compiled the AZ-700 test guide for these candidates who are trouble in this exam, in order help they pass it easily, and we deeply believe that our AZ-700 exam questions can help you solve your problem. Believe it or not, if you buy our study materials and take it seriously consideration, we can promise that you will easily get the certification that you have always dreamed of. We believe that you will never regret to buy and practice our AZ-700 latest question.
