EMC Dell Avamar Deploy 2023 Sample Questions (Q36-Q41):

NEW QUESTION # 36

Which of the following is a best practice when using an Avamar Desktop/Laptop Client?

- A. Examine the impact of backups on weekly operational schedules
- B. Include maintenance hours in Override Daily Backup Schedule
- C. Bring clients online in larger groups
- D. Regularly monitor the amount of used backup storage

Answer: D

NEW QUESTION # 37

GSAN just went down on the EMC Avamar server and is currently the backup window. EMC Support has indicated that the Avamar server will need to be rolled back. The checkpoints in the environment are completed automatically.

By default, to which time period can GSAN be rolled back?

- A. During the last maintenance window
- B. During the last backup window
- C. When GSAN went down

- D. Immediately after the last backup ran

Answer: A

NEW QUESTION # 38

An Dell Avamar server is integrated with an Dell Data Domain system. A backup has expired on the Avamar server and garbage collection runs.

What is the impact to the backup stored on the Data Domain system?

- **A. The backup is deleted from the Data Domain system**
- B. The backup is immediately replicated to another Data Domain
- C. HFS check is run on the backup on the Data Domain
- D. The backup is deleted based on Data Domain retention policies

Answer: A

Explanation:

Explanation/Reference:

Server maintenance activity monitoring

Avamar performs the system maintenance operations for backup data on the Data Domain system, including HFS checks, checkpoints, rollbacks, garbage collection, and secure backup deletion.

The ddrmaint utility implements all required operations on the Data Domain system for the Avamar server.

The ddrmaint utility is installed on the utility node of a multi-node server, or the single node of a single-node server, during Avamar server installation. The ddrmaint utility is not installed on the data nodes of the Avamar server.

The ddrmaint utility logs all maintenance activities on the Avamar server in the ddrmaint.log file. The following directory on either the utility node of a multi-node server or the single node of a single-node server contains the log file:

/usr/local/avamar/var/ddrmaintlogs/ddrmaint.log

The ddrmaint.log file is rotated when it reaches 25 MB in size.

NEW QUESTION # 39

An organization is looking for Dell AVE as a backup solution for their remote site. They have two file servers with a daily change rate of 2 GB. They have three SQL servers with a daily change rate of 7 GB.

Which AVE capacity edition should they use, assuming typical retention?

- A. 4.0 TB
- B. 2.0 TB
- **C. 1.0 TB**
- D. 0.5 TB

Answer: C

Explanation:

Explanation/Reference:

Table 2 Maximum change rates AVE supports for file server and mixed environments

Configuration	File server data	Mixed data
0.5 TB AVE	Less than 2 GB per day	Less than 5 GB per day
1 TB AVE	Less than 4 GB per day	Less than 10 GB per day
2 TB AVE	Less than 8 GB per day	Less than 20 GB per day
4 TB AVE	Less than 20 GB per day	Less than 20 GB per day

NEW QUESTION # 40

Answer: C

- ### NEW QUESTION # 41
