process of using our AZ-400 Exam Questions. Also, if you have better suggestions to utilize our study materials, we will be glad to take it seriously.

## Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q470-Q475):

### NEW QUESTION # 470

Your company uses Azure DevOps.

Only users who have accounts in Azure Active Directory can access the Azure DevOps environment.

You need to ensure that only devices that are connected to the on-premises network can access the Azure DevOps environment.

What should you do?

- A. In Azure DevOps, configure Security in Project Settings.
- **B. In Azure Active Directory, configure conditional access.**
- C. In Azure Active Directory, configure risky sign-ins.
- D. Assign the Stakeholder access level all users.

**Answer: B**

Explanation:

Explanation/Reference:

Explanation:

Conditional Access is a capability of Azure Active Directory. With Conditional Access, you can implement automated access control decisions for accessing your cloud apps that are based on conditions.

Conditional Access policies are enforced after the first-factor authentication has been completed.

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview>

### NEW QUESTION # 471

Your company uses Azure DevOps to deploy infrastructures to Azure.

Pipelines are developed by using YAML.

You execute a pipeline and receive the results in the web portal for Azure Pipelines as shown in the following exhibit.

□ Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation:

### NEW QUESTION # 472

Your company is building a new web application.

You plan to collect feedback from pilot users on the features being delivered.

All the pilot users have a corporate computer that has Google Chrome and the Microsoft Test & Feedback extension installed. The pilot users will test the application by using Chrome.

You need to identify which access levels are required to ensure that developers can request and gather feedback from the pilot users. The solution must use the principle of least privilege.

Which access levels in Azure DevOps should you identify? To answer, select the appropriate options in the answer area NOTE:

Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation

□

#### Box 1: Basic

Assign Basic to users with a TFS CAL, with a Visual Studio Professional subscription, and to users for whom you are paying for Azure Boards & Repos in an organization.

#### Box 2: Stakeholder

Assign Stakeholders to users with no license or subscriptions who need access to a limited set of features.

Note:

You assign users or groups of users to one of the following access levels:

Basic: provides access to most features

VS Enterprise: provides access to premium features

Stakeholders: provides partial access, can be assigned to unlimited users for free References: <https://docs.microsoft.com/en-us/azure/devops/organizations/security/access-levels?view=vsts>

#### NEW QUESTION # 473

Your company has a project in Azure DevOps named Project1.

All the developers at the company have Windows 10 devices.

You need to create a Git repository for Project1. The solution must meet the following requirements:

- \* Support large binary files.
- \* Store binary files outside of the repository.
- \* Use a standard Git workflow to maintain the metadata of the binary files by using commits to the repository.

**Answer:**

Explanation:

- 1 - Perform a custom installation of Git for Windows that includes Git Large File Storage (LFS).
- 2 - Configure SSH key-based authentication.
- 3 - Configure Git Large File Storage (LFS) file tracking.

#### NEW QUESTION # 474

Your company implements an Agile development methodology.

You plan to implement retrospectives at the end of each sprint.

Which three questions should you include? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Who performed well?
- B. Who should have performed better?
- C. What should we try next?
- D. What could have gone better?
- E. What went well?

**Answer: B,C,D**

Explanation:

Sprint retrospective meetings

The sprint retrospective meeting typically occurs on the last day of the sprint, after the sprint review meeting. In this meeting, your team explores its execution of Scrum and what might need tweaking.

Based on discussions, your team might decide to change one or more processes to improve its own effectiveness, productivity, quality, and satisfaction. This meeting and the resulting improvements are critical to the agile principle of self-organization.

Look to address these areas during your team sprint retrospectives:

- \* Issues that affected your team's general effectiveness, productivity, and quality.
- \* Elements that impacted your team's overall satisfaction and project flow.
- \* What happened to cause incomplete backlog items? What actions will the team take to prevent these issues in the future?
