Valid NEX Valid Braindumps Files Offers Candidates Latest-updated Actual NLN Nursing Entrance Exam (Math, Science and Verbal) Exam Products

Our company is a professional certificate exam materials provider, we have occupied in this field for years, and we have rich experiences. NEX exam cram is edited by professional experts, and they are quite familiar with the exam center, and therefore, the quality can be guaranteed. In addition, NEX training materials contain both questions and answers, and it also has certain quantity, and it's enough for you to pass the exam. In order to strengthen your confidence for NEX Training Materials, we are pass guarantee and money back guarantee, if you fail to pass the exam we will give you full refund, and no other questions will be asked.

NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q22-Q27):

NEW QUESTION # 22

A financial counselor is reviewing the annual tax refunds received by a group of clients. The refunds are shown below:
\$500, \$857, \$1,500, \$500, \$6,753, \$2,500, \$3,000

What is the median tax refund?

- A. \$1,665
- B. \$1,500
- C. \$2,230
- D. \$500

Answer: B

Explanation:

This question assesses understanding of the median, which is the middle value when data are ordered from least to greatest. First, list the refunds in ascending order:

\$500, \$500, \$857, \$1,500, \$2,500, \$3,000, \$6,753.

There are seven values total, so the median is the fourth value in the ordered list. The fourth value is \$1,500.

Therefore, option D is correct. Option B represents the mode (most frequent value), not the median. Options A and C are averages or midpoints that do not correspond to the true median position. On the NEX exam, students are frequently tested on distinguishing mean, median, and mode, so remembering that the median is strictly positional-not calculated-is essential.

NEW QUESTION # 23

In the human male, which of these structures produces sperm cells?

- A. Prostate gland
- B. Epididymis
- C. Cowper's glands
- D. Testes

Answer: D

Explanation:

Sperm cells are produced in the testes, specifically within tightly coiled structures called seminiferous tubules.

The process of sperm production is known as spermatogenesis and requires hormones such as testosterone.

Cowper's glands and the prostate gland do not produce sperm; instead, they secrete fluids that contribute to semen and help protect and nourish sperm cells. The epididymis is responsible for sperm maturation and storage but does not produce sperm. The NEX

Science exam often tests reproductive anatomy by asking students to distinguish between sperm production, maturation, and transport. Understanding the specific role of each male reproductive structure is essential. Since only the testes are responsible for the formation of sperm cells, option C is the correct answer.

NEW QUESTION # 24

A car travels 15.6 miles on

3

4

4

3

of a gallon of gas. How many miles can the car travel on 5 gallons of gas?

- A. 20.8 miles
- B. 78 miles
- C. 104 miles
- D. 58.5 miles

Answer: C

Explanation:

This is a rate and proportion problem. First, determine how many miles the car travels per gallon. Since the car travels 15.6 miles on 3
4
4
3

of a gallon, divide: $15.6 \div 0.75 = 20.8$ miles per gallon. Next, multiply this rate by the total number of gallons: $20.8 \times 5 = 104$ miles. Therefore, option C is correct. Option A represents miles per gallon, not total distance.

Option B is a partial multiplication error. Option D results from multiplying before finding the correct rate.

NEX questions frequently assess whether students can correctly identify unit rates before scaling up.

NEW QUESTION # 25

Which statement best explains why a child may resemble one parent more than the other?

- A. One set of genes had more dominant characteristics.
- B. Older genetic material is weaker.
- C. The genes of the dominant parent are expressed more vigorously.
- D. Larger eggs contain more genetic material.

Answer: A

Explanation:

Dominant traits are more likely to be expressed when present. If one parent contributes more dominant alleles, the child may resemble that parent more closely. Dominance does not mean stronger genes, just that they mask recessive traits. The NEX Science exam emphasizes basic Mendelian inheritance and dominance relationships.

NEW QUESTION # 26

Word Knowledge

The word "precaution" most nearly means:

- A. Preventive measure
- B. Risk
- C. Warning
- D. Emergency

Answer: A

Explanation:

A precaution is an action taken to prevent harm or reduce risk. Option C best matches this meaning. NEX questions frequently use safety-related vocabulary.

NEW QUESTION # 27

.....

Real NLN NEX test questions provide the necessary knowledge and skills to clear the test in a short time. When applicants don't prepare with the latest Nursing Entrance Exam (Math, Science and Verbal) (NEX) exam questions they fail and lose money. DumpsTorrent provides valid NEX practice test material for applicants who want to pass the NEX exam quickly.
