Training Salesforce AP-211 Tools & AP-211 Latest Exam Labs

Candidates can benefit a lot if they can get the certificate of the exam: they can get a better job in a big company, and the wage will also promote. Our AP-211 Training Material will help you to get the certificate easily by provide you the answers and questions. The questions and answers of the practicing materials is correct and the updated one, we will also update the version for you regularly, therefore, you can know the latest changes for the exam.

Salesforce Health Cloud Accredited Professional Sample Questions (Q85-Q90):

NEW QUESTION # 85

Care managers at Bloomington Caregivers call patients after they are discharged from a hospital to ask a series of questions, which the care manager enters into Health Cloud. The patient is then automatically assigned a personalized care plan based on the answers they provided.

Which two capabilities should a consultant leverage together to fulfill this requirement?

Choose 2 answers

- A. Integrated Care Management
- B. Care Programs
- C. Discovery Framework
- D. Salesforce Surveys

Answer: C,D

Explanation:

The scenario involves collecting structured information (series of questions) from patients and automatically assigning a personalized care plan based on their answers.

Step-by-Step Reference:

Salesforce Surveys can be used to gather responses from patients post-discharge.

Extract:

"With Salesforce Surveys, care managers can send and record responses directly within Health Cloud, allowing structured data capture from patients." (Source: Administer Health Cloud - Surveys) Discovery Framework processes responses and triggers automated care plan assignments based on responses.

Extract:

"The Discovery Framework in Health Cloud enables dynamic question flows and recommendations, such as assigning care plans based on patient answers." (Source: Administer Health Cloud - Discovery Framework) Combining these, care managers can capture structured data (Surveys) and drive workflow automation and personalization (Discovery Framework).

NEW QUESTION # 86

An agent at a MedTech company requires a UI component that displays customer data and contains a link to create a new order. Once clicked, the link starts a process to build a new order and displays the available products for purchase.

Which three OmniStudio capabilities are required to solve this use case?

Choose 3 answers

- A. Integration Procedures
- B. Flexcards
- C. Document Generation
- D. DataRaptors
- E. OmniScript

Answer: B,D,E

Explanation:

The use case describes:

A UI component to display customer data → FlexCards

A link to start a process (build a new order) → OmniScript

Retrieving and displaying available products → DataRaptors (and often Integration Procedures if orchestration is needed).

Let's map it step by step:

D . FlexCards → Used to display contextual customer data on the UI and provide clickable actions (like "Create New Order").

E . OmniScript → Guides the user through the order creation process, step by step (product selection, details, confirmation).

A . DataRaptors → Extract and load Salesforce data (e.g., retrieving available products, saving the order).

These three are the core capabilities needed.

Why not the others?

B . Integration Procedures - Helpful if the solution requires multiple data sources or orchestration, but the question doesn't explicitly state external integration or complex orchestration. If data is all within Salesforce, DataRaptors are enough.

C . Document Generation - Used to create documents (PDFs, Word, etc.), which isn't part of this order creation flow.

Salesforce Health Cloud / OmniStudio Reference:

Salesforce OmniStudio Developer Guide

"FlexCards present contextual information and actions in a UI component."

"Use OmniScripts to guide users through business processes such as creating orders."

"DataRaptors retrieve, transform, and save Salesforce data for use in OmniScripts and FlexCards."

NEW QUESTION # 87

Users need to analyze their patient or member referrals through a prebuilt dashboard that includes reports on important aspects of their referral management.

What should a consultant do in this case?

- A. Upload a Provider Referral Dashboard Template and enable the action bar so that users can generate a Patient Referral Management report.
- B. Add extra picklist values to Account record type and add fields on the page layout for patient referral data for CRM Analytics to generate a Patient Referral Management report.
- C. Install the add-on package that delivers Health Cloud Reports for Utilization Management and Health Cloud for Patient Referral Management.
- **D. Install the unmanaged extension package that delivers Health Cloud Reports for Patient Referral Management.**

Answer: D

NEW QUESTION # 88

Bloomington Caregivers uses Health Cloud and has an integration setup with an external payer system.

Which three business level APIs should a consultant recommend to help the payer organization electronically receive requests for care services?

Choose 3 answers

- **A. Referral Request**
- B. Care Services
- C. Admission, Discharge, and Transfer (ADT)
- **D. Benefit Verification**
- **E. Prior Authorization**

Answer: A,D,E

NEW QUESTION # 89

Bloomington Caregivers is implementing Virtual Care in Health Cloud.

Which three steps are required as part of the setup?

Choose 3 answers

- **A. Install the Virtual Care unmanaged package.**
- **B. Assign Health Cloud Video Calls permission set.**
- C. Configure Provider Search,
- D. Connect to an external electronic health record (EHR) scheduling system.
- **E. Set up and configure Salesforce Scheduler.**

Answer: A,B,E

NEW QUESTION # 90

.....
