Updated CCSK Examcollection Dumps Offer You The Best Accurate Answers | Certificate of Cloud Security Knowledge v5 (CCSKv5.0)

Exam   :   CCSK

Title   :   Certificate of Cloud Security
              Knowledge

https://www.passcert.com/CCSK.html

A considerable amount of effort goes into our products. So in most cases our CCSK study materials are truly your best friend. On one hand, our CCSK study materials are the combination of the latest knowledge and the newest technology, which could constantly inspire your interest of study. On the other hand, our CCSK Study Materials can predicate the exam correctly. Therefore you can handle the questions in the real exam like a cork. Through highly effective learning method and easily understanding explanation, you will pass the CCSK exam with no difficulty.

Cloud Security Alliance CCSK (Certificate of Cloud Security Knowledge) Certification Exam is a globally recognized certification for cloud security. CCSK exam is designed to test candidates' knowledge and skills in cloud security, including the key concepts, principles, and best practices for securing cloud environments. The CCSK Certification is vendor-neutral and is recognized by many organizations worldwide as a standard for cloud security.

CCSK Accurate Answers & Latest CCSK Exam Questions Vce

The CCSK exam materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the CCSK training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our CCSK study engine.

Cloud Security Alliance (CSA) is a non-profit organization that is dedicated to promoting best practices and education in cloud computing security. The CSA has developed the Certificate of Cloud Security Knowledge (CCSK) as a way to validate the expertise and knowledge of individuals in cloud security. The CCSK is recognized globally as a standard for cloud security certification.

Cloud Security Alliance CCSK (Certificate of Cloud Security Knowledge) Exam is designed to measure an individual's knowledge of cloud security. It is a vendor-neutral certification that is recognized globally and demonstrates an individual's understanding of cloud security issues and best practices. Certificate of Cloud Security Knowledge v5 (CCSKv5.0) certification is designed for IT professionals, security managers, and executives who are looking to improve their knowledge of cloud security.

Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q26-Q31):

NEW QUESTION # 26
APIs and web services require extensive hardening and must assume attacks from authenticated and unauthenticated adversaries.

- A. False
- B. True

Answer: B

NEW QUESTION # 27
Database as a Service is an example of :

- A. Platform as a Service(PaaS)
- B. Infrastructure as a Service(IaaS)
- C. Software as a Service(SaaS)
- D. Program as a Service(PaaS)

Answer: A

Explanation:
One option. frequently seen in the real world and illustrated in our model. is to build a platform on top of IaaS. A layer of integration and middleware is built on IaaS. then pooled together. orchestrated. and exposed to customers using APIs as PaaS. For example, a Database as a Service could be built by deploying modified database management system software on instances running in IaaS. The customer manages the database via API (and a web console) and accesses it either through the normal database network protocols, or, again, via API.

NEW QUESTION # 28
Which of the following cloud computing models primarily provides storage and computing resources to the users?

- A. Function as a Service (FaaS)
- B. Software as a Service (SaaS)
- C. Platform as a Service (PaaS)
- D. Infrastructure as a Service (Iaa

Answer: D

Explanation:
Infrastructure as a Service (IaaS) primarily provides users with storage, computing resources, and networking capabilities. In the IaaS model, cloud providers offer virtualized computing resources over the internet. Users can rent servers, storage, and networking equipment without needing to manage the physical hardware themselves. This allows for flexible scaling and resource management according to the users' needs.

FaaS focuses on serverless computing where users run code in response to events. PaaS provides a platform that allows users to develop, run, and manage applications without worrying about the underlying infrastructure. SaaS delivers fully managed applications over the internet, where users access software without managing the infrastructure.

NEW QUESTION # 29

Which of the following statements best reflects the responsibility of organizations regarding cloud security and data ownership?

- A. Data ownership rights are solely determined by the cloud provider, leaving organizations with no control or accountability over their data.
- B. Cloud providers are responsible for everything under the 'limited O responsibilities clauses.' The customer and the provider have joint accountability.
- C. Cloud providers assume full responsibility for the security obligations, and cloud customers are accountable for overall compliance.
- D. Organizations are accountable for the security and compliance of their data and systems, even though they may lack full visibility into their cloud provider's infrastructure.

Answer: D

Explanation:
TheShared Responsibility Modelin cloud computing establishes that:
Cloud providersare responsible for securing the underlyinginfrastructure, networking, and hardware.
Customers (organizations)are responsible for securingdata, identity and access management (IAM), encryption, and complianceobligations.
Data ownershipremainswith the customer, even though visibility into cloud infrastructure may belimited.
The major security challenge in cloud computing is thatorganizations lack full control over cloud infrastructurebut must still ensure that security policies align withregulatory requirements (e.g., GDPR, HIPAA, PCI DSS).
This principle is outlined in:
CCSK v5 - Security Guidance v4.0, Domain 2 (Governance and Enterprise Risk Management) Cloud Security Alliance's (CSA) Cloud Controls Matrix (CCM) - Data Security and Governance.

NEW QUESTION # 30

An incident in which sensitive, protected or confidential information is released, viewed, stolen or used by an individual who is not authorized to do so, is called:

- A. Data Breach
- B. Data Disclosure
- C. Data Dispersion
- D. Data Denial

Answer: A

Explanation:
It is the definition of Data breach. It should not be confused with data disclosure. The incident can lead to information disclosure but incident, itself, will be termed as Data Breach.
