PCEP-30-02 Review Guide & PCEP-30-02 Exam Tutorials

The Python Institute market has become so competitive and tough with time. To satisfy this task the professionals have to analyze new in-name for skills and improve their expertise. With the Python Institute PCEP-30-02 certification exam they could do that activity fast and well. Your examination training with Python Institute Certification Questions is our top priority at PracticeVCE. To do this they just join up in PCEP - Certified Entry-Level Python Programmer (PCEP-30-02) certification exam and show a few firm dedication and self-discipline and prepare well to crack the PCEP-30-02 examination.

Python Institute PCEP - Certified Entry-Level Python Programmer Sample Questions (Q11-Q16):

NEW QUESTION # 11

A set of rules which defines the ways in which words can be coupled in sentences is called:

- A. dictionary
- B. lexis
- C. semantics
- D. syntax

Answer: D

Explanation:

Syntax is the branch of linguistics that studies the structure and rules of sentences in natural languages. Lexis is the vocabulary of a language. Semantics is the study of meaning in language. A dictionary is a collection of words and their definitions, synonyms, pronunciations, etc.

NEW QUESTION # 12

Drag and drop the conditional expressions to obtain a code which outputs * to the screen.

(Note: some code boxes will not be used.)

Answer:

Explanation:

Explanation

One possible way to drag and drop the conditional expressions to obtain a code which outputs * to the screen is:

```
if pool > 0:
```

```
    print('*')
```

```
elif pool < 0:
```

```
    print('**')
```

```
else:
```

```
    print('***')
```

This code uses the if, elif, and else keywords to create a conditional statement that checks the value of the variable pool. Depending on whether the value is greater than, less than, or equal to zero, the code will print a different pattern of asterisks to the screen. The print function is used to display the output. The code is indented to show the blocks of code that belong to each condition. The code will output * if the value of pool is positive, ** if the value of pool is negative, and *** if the value of pool is zero.

You can find more information about the conditional statements and the print function in Python in the following references:

[Python Print Function]

[Python Basic Syntax]

NEW QUESTION # 13

Insert the code boxes in the correct positions in order to build a line of code which asks the user for an Integer value and assigns it to the counter variable.

(Note: some code boxes will not be used.)

Answer:

Explanation:

NEW QUESTION # 14

What is the expected output of the following code?

- A. 0
- B. ('Ampere*', '2021', 'False')
- **C. 1**
- D. The code raises an unhandled exception.

Answer: C

NEW QUESTION # 15

Insert the code boxes in the correct positions in order to build a line of code which asks the user for a float value and assigns it to the mass variable.

(Note: some code boxes will not be used.)

□

Answer:

Explanation:

□

Explanation:

□

One possible way to insert the code boxes in the correct positions in order to build a line of code that asks the user for a float value and assigns it to the mass variable is:

```
mass = float(input("Enter the mass: "))
```

This line of code uses the input function to prompt the user for a string value, and then uses the float function to convert that string value into a floating-point number. The result is then assigned to the variable mass.

You can find more information about the input and float functions in Python in the following references:

* [Python input() Function]

* [Python float() Function]

NEW QUESTION # 16

.....

Our PCEP-30-02 learning quiz has accompanied many people on their way to success and they will help you for sure. And you will learn about some of the advantages of our PCEP-30-02 training prep if you just free download the demos to have a check. You will understand that this is really a successful PCEP-30-02 Exam Questions that allows you to do more with less. With our PCEP-30-02 study materials for 20 to 30 hours, we can claim that you will pass the exam and get what you want.

PCEP-30-02 Review Guide: <https://www.practicevce.com/Python-Institute/PCEP-30-02-practice-exam-dumps.html>
