

Updated Plat-Dev-210 Pdf Vce - Plat-Dev-210 Latest Torrent & Plat-Dev-210 Valid Questions

What's more, part of that Dumps4PDF Plat-Dev-210 dumps now are free: <https://drive.google.com/open?id=14XoiAMoMHWIDrjPr0AXaPjUOHlPjUN>

Desktop-based Plat-Dev-210 practice exam software is the first format that Dumps4PDF provides to its customers. It helps track the progress of the candidate from beginning to end and provides a progress report that is easily accessible. This Salesforce Plat-Dev-210 Practice Questions is customizable and mimics the real Plat-Dev-210 exam, with the same format, and is easy to use on Windows-based computers. The product support staff is available to assist with any issues that may arise.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Omniscritps: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.
Topic 2	<ul style="list-style-type: none">• Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.
Topic 3	<ul style="list-style-type: none">• Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.

2026 Fantastic Salesforce Plat-Dev-210: Salesforce Certified Omnistudio Developer Reliable Exam Bootcamp

A free demo of any Salesforce Plat-Dev-210 exam dumps format will be provided by Dumps4PDF to the one who wants to assess before purchasing. The desktop Customer Experience Plat-Dev-210 Practice Exam software is compatible with windows based computers. There is a 24/7 customer support team of Dumps4PDF always to fix any problems.

Salesforce Certified Omnistudio Developer Sample Questions (Q72-Q77):

NEW QUESTION # 72

A developer needs to use the COUNTIF function to process data entered by the user in an OmniScript. The output of the function needs to be displayed to the user immediately in the current step. Based on best practice, which element should the developer use this function in?

- A. Set Values element
- B. Range element
- C. Formula element

Answer: C

Explanation:

In OmniScripts, if you need to apply a function (like COUNTIF) to dynamic data and show the result immediately, the Formula element is the correct choice.

* B. Formula element - The Formula element supports real-time calculation using OmniStudio expression functions (like COUNTIF, SUM, etc.) and updates values instantly on the screen without the need for server calls.

Incorrect Options:

* A. Set Values element is used to set static or conditional values but doesn't support formula evaluation.

* C. Range element is used for value comparisons and conditions, not for calculations.

:

Salesforce Omnistudio Developer Guide # OmniScript Formula Element

NEW QUESTION # 73

Refer to the following row-versioned calculation matrix.

Input	Input	Output	RowStartDate	RowEndDate
State	County	Code		
CA	San Francisco	CA-SF	Jan011980	Jun301980
CA	San Mateo	CA-SM	Jan011980	Jun301980

Input	Input	Output	RowStartDate	RowEndDate
State	County	Code		
CA	San Francisco	CA-SF	Jan011980	Jun301980
CA	San Mateo	CA-SM	Jan011980	Jun301980
CA	Mountain View	CA-MV	Jul011980	Dec311980

Input	Input	Output	RowStartDate	RowEndDate
State	County	Code		
CA	San Francisco	CA-SF	Jan011980	Jun301980
CA	San Mateo	CA-SM	Jan011980	Jun301980
CA	Mountain View	CA-MV	Jul011980	Dec311980
CA	San Carlos	CA-SC	Jul011980	Dec311980

Color Yellow - represents the rows that are shared across versions.

The developer needs to delete the row that contains the Code CA-SF.
If the developer deletes that row in Version 3, what is the result?

- A. The row is deleted in Versions 2 and 3 but will remain in Version 1.
- B. The row is deleted in all versions
- **C. The row is deleted only in Version 3.**
- D. The row is deleted in Version 3 and Version 1.

Answer: C

Explanation:

Deleting a row in Version 3 will only affect that version, not any previous or future versions. The row that contains the Code CA-SF will remain in Versions 1 and 2, as well as any versions created after Version 3. The other options are incorrect because they imply that deleting a row in one version will affect other versions as well.

NEW QUESTION # 74

Which calculation procedure version in the list would execute on 2/15/2020 at 12:00 PM?

The screenshot shows a table titled "Velocity Calculation Procedure Versions" with 4 items. The table has columns for Calculation Procedure Version Name, Version Number, Enabled, Start Date Time, End Date Time, and Priority. A blue cloud logo with the word "salesforce" is overlaid on the table.

Calculation Procedure Version Name	Version Number	Enabled	Start Date Time	End Date Time	Priority
BundlePriceQuote v1	1	✓	1/1/2020, 12:00 AM	4/1/2020, 12:00 AM	1
BundlePriceQuote v2	2	✓	2/1/2020, 12:00 AM	3/1/2020, 12:00 AM	2
BundlePriceQuote v3	3	✓	3/1/2020, 12:00 AM	4/1/2020, 12:00 AM	4
BundlePriceQuote v4	4	✓	1/1/2020, 12:00 AM	1/1/2020, 12:00 AM	3

- A. Version Number 3
- B. Version Number 1
- C. Version Number 2
- **D. Version Number 4**

Answer: D

Explanation:

the calculation procedure version that would execute on 2/15/2020 at 12:00 PM is the one that has the start date time and end date time that include that date and time, and also has the highest priority among the enabled versions. In this case, only version number 4 meets these criteria, as it has a start date time of 2/1/2020 12:00 AM, an end date time of 4/1/2020 12:00 AM, a priority of 1, and is enabled. The other versions either have a different start or end date time, a lower priority, or are not enabled.

NEW QUESTION # 75

A developer creates an Integration Procedure with a Set values and a DataRaptor Extract Action that requires AccountId as a key. When the developer previews the Integration Procedure, the developer enters the AccountId correctly and executes the preview. The developer sees the data extracted by the DataRaptor in the Debug Log, but the response is empty. What is the likely cause of this issue?

- A. The Response cannot be previewed directly.
- B. The AccountId used for the preview is invalid.
- **C. The DataRaptor Action did not have the Add Response To Response JSON property set to true.**
- D. A Response Action was not added to the Integration Procedure.

Answer: C

Explanation:

The Add Response To Response JSON property on the DataRaptor Action indicates that the output of the DataRaptor should be added to the response JSON of the Integration Procedure. If this property is not set to true, the response will be empty even if the

DataRaptor extracts data successfully.

NEW QUESTION # 76

A healthcare company wants to enable its subscribers to add, edit, or delete dependents related to their policy Community portal. The developer on the project decides to use an MiniScript.

How should the developer configure the OmniScript to provide this functionality?

- A. Use an Input Block element and a DataRaptor Post Action element.
- **B. Use an Edit Block element configured with Remote Actions.**
- C. Use a Text Block element and a Remote Action element.
- D. Use an Edit Block element configured with SOQL statements.

Answer: B

Explanation:

An Edit Block element configured with Remote Actions allows the developer to create a dynamic table that can display, add, edit, or delete records from a Salesforce object. The Remote Actions can be configured to perform CRUD operations on the object using SOQL or Apex.

NEW QUESTION # 77

.....

Plat-Dev-210 exam materials provide you the best learning prospects, by employing minimum exertions through the results are satisfyingly surprising, beyond your expectations. Despite the intricate nominal concepts, Plat-Dev-210 exam dumps questions have been streamlined to the level of average candidates, pretense no obstacles in accepting the various ideas. The combination of Plat-Dev-210 Exam Practice software and PDF Questions and Answers make the preparation easier and increase the chances to get higher score in the Plat-Dev-210 exam.
