Axis ANVE Certification Exam is designed to help professionals enhance their knowledge and skills in network video technology. It is an excellent opportunity to demonstrate your expertise to potential employers, clients, and colleagues. By passing the exam, you can differentiate yourself from your peers and gain a competitive edge in the job market.

Axis Network Video Exam Sample Questions (Q171-Q176):

NEW QUESTION # 171

Two cameras are streaming 6 Mbit/s each. Approximately how much storage is required to record one hour of video from both streams?

- A. 5.4 GB
- B. 11.4 GB
- C. 2.6 GB
- D. 24.2 GB

Answer: A

Explanation:

To calculate the storage required to record one hour of video from two cameras streaming at 6 Mbit/s each, we use the following steps:

- * Total bitrate for both cameras: $6 \text{ Mbit/s} \times 2 = 12 \text{ Mbit/s}$
 - * Convert Mbit/s to Mbyte/s: $12 \text{ Mbit/s} \div 8 = 1.5 \text{ Mbyte/s}$
 - * Calculate the total data for one hour: $1.5 \text{ Mbyte/s} \times 3600 \text{ seconds} = 5400 \text{ Mbytes}$
 - * Convert Mbytes to Gbytes: $5400 \text{ Mbytes} \div 1024 = 5.27 \text{ Gbytes}$
- Approximately, the storage required is 5.4 GB.

NEW QUESTION # 172

For AXIS P3247-LVE, the last digit represents

- A. the number of channels.
- B. the camera type (PTZ).
- C. the camera series.
- D. the camera resolution.

Answer: D

Explanation:

For AXIS P3247-LVE, the last digit '7' indicates the camera resolution. Axis uses a numerical system where the last digit often denotes the resolution of the camera. In this case, '7' represents a camera with a resolution of 5 MP (megapixels), providing high-quality video surveillance suitable for detailed monitoring.

NEW QUESTION # 173

What is the main purpose of the Arctic Temperature Control functionality?

- A. To protect the camera power
- B. To protect the camera electronics
- C. To protect the camera mechanics
- D. To protect the camera lens

Answer: B

Explanation:

The Arctic Temperature Control functionality in Axis cameras is designed to protect the camera electronics by ensuring the device can operate in extremely cold temperatures. This feature helps maintain the internal temperature of the camera, preventing the electronics from freezing and ensuring reliable performance in harsh environments. Detailed information on Arctic Temperature Control can be found in Axis Communications product specifications and user manuals.

NEW QUESTION # 174

Which of the following conditions has to be met to use multicast streaming?

- A. The client has to support streaming over RTSP
- B. The network infrastructure has to support multicast

- C. The client has to run AXIS Camera Management or AXIS Camera Station
- D. The video device needs to run on firmware version 5.20 or higher

Answer: B

NEW QUESTION # 175

IP51 and IP52 means that the camera

- A. Is resistant to dust and dripping water.
- B. Is designed for tough environments.
- C. Can be placed in or outdoors.
- D. Is vandal resistant.

Answer: A

Explanation:

The IP51 and IP52 ratings indicate that the camera is protected against dust and dripping water. IP51 means the camera is protected against dust ingress to a level that would interfere with the operation and against vertically dripping water. IP52 offers the same dust protection but also protects against dripping water when tilted up to 15 degrees. These ratings make the cameras suitable for indoor use where dust and minor water exposure might occur. Axis Network Video documentation specifies the IP rating system and the levels of protection provided by different ratings.
