- B. Remove the default certificate from the global settings and manually assign certificates to each individual learning entity.
- C. Edit the global default certificate to include the custom branding and criteria, ensuring consistency across all courses.
- **D. Create and assign the custom certificate directly to the specific course, leaving the global default certificate unchanged for other items and programs.**

Answer: D

Explanation:

Step by Step Explanation with exact Extract from SAP SuccessFactors Learning documents:

* Understanding Certificates in SAP SuccessFactors Learning:

* Certificates are awarded to learners upon course completion. Administrators can use a global default certificate or assign custom certificates to specific courses.

* Custom Certificate Assignment (B):

* To apply a custom certificate to a specific course without affecting others, administrators create and assign it directly to the course, preserving the global default.

* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Certificate Management):

"To assign a custom certificate to a specific course, create the certificate in System Administration > Content > Certificates, then assign it to the course in Learning Activities > Items > [Item] > Certificate tab. This leaves the global default certificate unchanged for other items and programs."

* This confirms option B, as it allows targeted certificate assignment.

* How to Configure a Custom Certificate:

* Create the certificate with custom branding, then link it to the course via the item's Certificate tab, ensuring the global default remains intact.

* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Certificate Configuration):

"Custom certificates can be assigned to specific items by selecting the certificate in the item's Certificate tab.

The global default certificate, set in System Administration > Configuration > Global Application Settings, remains unaffected."

* Why Other Options are Incorrect:

* Option A (Remove default certificate): Removing the global default disrupts other courses.

"Removing the global default certificate affects all courses without a specific certificate" (SAP SuccessFactors Learning Admin Guide).

* Option C (Copy and edit default): Making a copy the new global default affects all courses.

"Editing the global default certificate applies changes to all courses using it" (SAP SuccessFactors Learning Admin Guide).

* Option D (Edit global default): Editing the global default changes certificates system-wide.

"Changes to the global default certificate impact all items and programs without custom certificates" (SAP SuccessFactors Learning Admin Guide).

* Conclusion:

* The Administrator should create and assign a custom certificate to the specific course, leaving the global default unchanged, as specified in option B.
