71301T対応受験 & 71301T資料的中率

Tech4Exam平時では、Avaya専門試験の審査に数か月から1年かかることもありますが、71301T試験ガイドを使用

すれば、試験の前に20~30時間かけて復習し、71301T学習教材を使用すれば、71301T学習資料にはすべての重要なテストポイントが既に含まれているため、他のレビュー資料は不要になります。同時に、71301T学習教材は、復習するためのまったく新しい学習方法を提供します-演習の過程で知識を習得しましょう。Avaya Aura Communication Applications Implement試験に簡単かつゆっくりと合格します。

Avaya Aura Communication Applications Implement 認定 71301T 試験問題 (Q138-Q143):

質問 # 138

Which event triggers a Survivable Communication Manager (CM) to accept IP phones registration requests, and put the configured IP trunks in a working condition?

- A. a lack of a response to an outbound SIP INVITE
- **B. a heartbeat failure of the main CM**
- C. a failed IP phone registration attempt
- D. availability of DSP resources from either an Avaya Aura Media Server (AAMS) and/or a G-series Media Gateway

正解: B

解説:

In an Avaya Aura survivability architecture, the Survivable CM remains in a "standby" or "LSP" mode as long as it can successfully communicate with the main, core Communication Manager.

The Heartbeat (Keep-Alive): The Survivable CM (LSP) and the main CM constantly exchange heartbeat signals to monitor network health.

Failure Detection: If the network link between the branch and the core is severed, or if the main CM becomes unreachable, the Survivable CM stops receiving these heartbeats.

Activation: Once the threshold for a "heartbeat failure" is reached (the LSP determines that the main CM is truly down), the LSP automatically activates itself. It then begins:

Accepting registration requests from IP phones that are configured to failover to it.

Taking its configured IP trunks "in-service" to allow the branch to continue placing and receiving calls over the public network or alternate PSTN gateways.

質問 # 139

Which statement about the Avaya Aura Presence Services snap-in licensing is true?

- A. An instance license is required.
- B. A per-user license is an entitlement on its own.
- **C. User licenses are an entitlement as part of the Avaya Aura suite licensing.**
- D. A single license file for all users is required.

正解: C

解説:

In Avaya Aura Presence Services, presence capabilities are not licensed separately on a standalone per-user basis. Instead, the user licenses for Presence Services are bundled as an entitlement within the broader Avaya Aura suite licensing (such as the Avaya Aura Communication Manager or Collaboration licenses). This means organizations that have the appropriate Avaya Aura suite licenses automatically receive the entitlement to use Presence Services for their licensed users, rather than needing to purchase a separate, independent license file or per-user add-on.

質問 # 140

Which three steps are necessary to make a successful Implementation of Avaya Breeze WebRTC Snap-in? (Choose three.)

- **A. Install the Snap-in.**
- B. Busy and Release the WebRTC snap-in.
- **C. Load the Snap-in.**
- **D. Download and Install WebRTC License file.**
- E. Manually configure the WebLM IP address in the WebRTC configuration attributes.

正解: A、C、D

解説:

Step 1: Download and install the license file

Procedure

0. Download the snap-in license file from PLDS.

1. On System Manager navigate to Home > Services > Licenses.

2. Select Install License.

3. Browse to the location of the snap-in license.

4. Select the license file and click Open.

5. Click Accept the License Terms & Conditions and click Install.

The system installs the license file.

In the left navigation pane, the system displays the snap-in under Licensed Products.

Step 2: Load the snap-in

Step 3: Install the snap-in

質問 # 141

In Avaya Aura Messaging (AAM) 6.3, how many Call Answering Ports can one Application Server support?

- A. up to 10 Ports
- B. up to 1000 Ports
- C. up to 100 Ports
- D. up to 10000 Ports

正解: C

解説:

The Call Answer Ports range is 2?00.

質問 # 142

On Avaya Session Border Controller for Enterprise (SBCE), where do you access the tool that displays SIP messages, in real time, as they pass through the SBCE?

- A. from the SBCE Server command line via SSH session, using PuTTY
- B. from Avaya Aura System Manager, navigate to "Session Border Controller for Enterprise>; SBCE Administration" menu
- C. from the traceSIP client installed on a local PC
- D. from the SBCE EMS Web Console

正解: A

解説:

Stat the tue Tracing Tools, TraceSM, SSH to Session Manager

1. Launch PuTTY (or similar client application) for a SSH session to Session Manager (port 22).

Use the Session Manager IP Address (172.16.255.107).

2. Log in.

3. At the Session Manager command line type traceSM -x and press Enter.

Note: The traceSM tool shows the SIP call flow in Session Manager.

It gives insight into Session Manager's decisions.

Benefit: can filter certain types of SIP messages

* Shows the state of the dialog

* Displays changes in real time
