Hot VMCE_v12 Latest Test Questions | Efficient VMCE_v12 Online Exam: Veeam Certified Engineer v12 100% Pass

With the increasing marketization, the VMCE_v12 study guide experience marketing has been praised by the consumer market. Attract users interested in product marketing to know just the first step, the most important is to be designed to allow the user to try before buying the VMCE_v12 study training materials, so we provide free pre-sale experience to help users to better understand our VMCE_v12 Exam Questions. The user only needs to submit his E-mail address and apply for free trial online, and our system will soon send free demonstration research materials of VMCE_v12 latest questions to download.

Veeam Certified Engineer v12 Sample Questions (Q84-Q89):

NEW QUESTION # 84

A request to protect some new domain controllers has been submitted in the ticketing system.

The engineer creates a backup job with the following steps:

1. Right-clicks on the Jobs navigation item on the left
2. Selects VMware vSphere from the menu
3. Enters a name for the job.
4. Selects workloads to protect.
5. Defines a job schedule.
6. Clicks the Finish button.

When testing restores, the engineer finds that the backups are crash-consistent. Which set of steps should the engineer use to avoid crash-consistent backups for the domain controllers?

- **A. Launch the New Backup Job Wizard. Enter a name for the job. Select workloads to protect. Choose a destination. Enable the Application-Aware checkbox and configure settings. Define a job schedule. Click the Finish button.**
- B. Launch the New Backup Job Wizard Enter a name or description for the job. Select the vSphere environment to protect. Choose the Default Backup Repository Check the box labelled 'Run the job when I click Finish'. Specify Guest Processing settings. Define a job schedule.
- C. Launch the New Backup Job Wizard Enter a name for the job Specify a backup repository. Specify Guest Processing settings. Define a job schedule Click the Finish button.
- D. Launch the New Backup Job Wizard. Enter a name and a description. Select a resource pool to protect. Specify a backup repository with copy-mode enabled. Define a job schedule. Click the Finish button.

Answer: A

Explanation:

Application-aware processing is a feature in Veeam Backup & Replication that creates transactionally consistent backup images of VMs. For domain controllers, this feature ensures that backups are consistent with the applications running on the VM, like Active Directory services. To avoid crash-consistent backups and ensure application consistency, the engineer must enable the Application-Aware Processing option during the job configuration.

NEW QUESTION # 85

What is the main purpose of the planned failover feature?

- A. Test the VM in a sandbox without impacting the production environment
- **B. Proactively switch from running the regular VM to the replica VM**
- C. Initiate a disaster recovery procedure when the main site is down
- D. Test a disaster recovery scenario without any downtime on the VM

Answer: B

Explanation:

NEW QUESTION # 86

A photography company provides online purchase of photographs. The core of the business operates from an Oracle database that stores all company images. New photos are continuously added to the database at widely variable intervals. Company policy only requires the database to be protected. Which Veeam Feature will provide complete backup and recovery for this database?

- A. Use the Veeam Agent. Back up the entire server including the database with Consistent Server Backup feature
- **B. Use the Veeam Plug-in for Oracle RMAN Back up the database daily Back up the archived redo logs at 15-minute intervals.**
- C. Use the Veeam Plug-in for Oracle RMAN Back up the entire host server including the database and logs daily.
- D. Use the Veeam Explorer to Identify and backup the database and logs daily along with the log backup set to 15-minute interval.

Answer: B

Explanation:

The Veeam Plug-in for Oracle RMAN is designed specifically for efficient backup and recovery of Oracle databases. It allows for direct integration with Oracle RMAN (Recovery Manager), ensuring that the backups are consistent and reliable. For a photography

company that relies heavily on an Oracle database with new photos being continuously added, this feature provides an ideal solution. The daily backup of the database ensures that all new content is secured regularly, while the 15-minute interval for archived redo logs ensures that any recent transactions are also protected. This approach aligns well with the company's requirement to protect only the database.

NEW QUESTION # 87

What can Veeam Service Providers deploy in the Veeam Service Provider Console v7.0?

- A. Veeam One
- **B. Veeam backup agents**
- C. Enterprise plugins
- D. Veeam Backup for Microsoft 365

Answer: B

Explanation:

Veeam Service Provider Console allows service providers to deploy Veeam backup agents to protect physical and virtual environments, including workstations, servers, and cloud instances.

NEW QUESTION # 88

What data sources can be connected to Veeam ONE? (Choose two.)

- A. Veeam Backup & Replication agents
- B. Amazon Web Services EC2 instances
- **C. Veeam Backup & Replication servers**
- D. Microsoft Azure VMs
- **E. Microsoft Hyper-V servers**

Answer: C,E

Explanation:
