

WGU Cloud-Deployment-and-Operations Exam Guide Materials, Cloud-Deployment-and-Operations Valid Test Format

BONUS!!! Download part of NewPassLeader Cloud-Deployment-and-Operations dumps for free: https://drive.google.com/open?id=1p5mG9qdAcwa4aA7-t051O_fRqy8eiEr

If you're still learning from the traditional old ways and silently waiting for the test to come, you should be awake and ready to take the exam in a different way. Study our Cloud-Deployment-and-Operations study materials to write "test data" is the most suitable for your choice, after recent years show that the effect of our Cloud-Deployment-and-Operations Study Materials has become a secret weapon of the examinee through qualification examination, a lot of the users of our Cloud-Deployment-and-Operations study materials can get unexpected results in the examination.

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. We provide timely and free update for you to get more Cloud-Deployment-and-Operations Questions torrent and follow the latest trend. The Cloud-Deployment-and-Operations exam torrent is compiled by the experienced professionals and of great value.

Cloud-Deployment-and-Operations Valid Test Format - Cloud-Deployment-and-Operations Free Exam Dumps

If you fail in the exam, we will refund you in full immediately at one time. After you buy our WGU Cloud Deployment and

Operations exam torrent you have little possibility to fail in exam because our passing rate is very high. You only need 20-30 hours to learn WGU Cloud Deployment and Operations exam torrent and prepare the exam. Many people, especially the in-service staff, are busy in their jobs, learning, family lives and other important things and have little time and energy to learn and prepare the exam. But if you buy our Cloud-Deployment-and-Operations Test Torrent, you can invest your main energy on your most important thing and spare 1-2 hours each day to learn and prepare the exam.

WGU Cloud Deployment and Operations Sample Questions (Q57-Q62):

NEW QUESTION # 57

(A company uses KMS for key management. The company has a requirement to ensure that cryptographic material is not used longer than a year. Which solution should be used to meet this requirement with the least amount of effort?)

- A. Develop a custom key encryption protocol for KMS
- B. Move keys from KMS to CloudHSM
- C. Write a Lambda function to replace keys in KMS
- **D. Enable automatic key rotation in KMS**

Answer: D

Explanation:

Enabling automatic key rotation in AWS Key Management Service (KMS) is the least effort solution to ensure cryptographic material is not used longer than a year. KMS automatically rotates the cryptographic material of symmetric customer master keys (CMKs) every 365 days, meeting the requirement without manual intervention. The WGU Cloud Deployment and Operations Study Guide (Section 6.3, KMS) states,

"Automatic key rotation in KMS rotates the backing key material every year for symmetric CMKs, providing a low-effort way to comply with key usage limits." Moving to CloudHSM, custom protocols, or Lambda functions require more effort and complexity.

NEW QUESTION # 58

(A company has implemented multifactor authentication (MFA) for access to its AWS tenant. Which API call is needed to perform MFA before accessing a resource?)

- A. GetFederationToken
- B. DecodeAuthorizationMessage
- **C. GetSessionToken**
- D. GetCallerIdentity

Answer: C

Explanation:

The 'GetSessionToken' API call is needed to perform MFA before accessing a resource, as it generates temporary security credentials for an IAM user after MFA validation. This ensures secure access to AWS resources. The WGU Cloud Deployment and Operations Study Guide (Section 6.2, IAM and MFA) states,

"The 'GetSessionToken' API is used with MFA to obtain temporary credentials, requiring a valid MFA code to authenticate the user before resource access is granted." GetCallerIdentity, GetFederationToken, and DecodeAuthorizationMessage serve different purposes and do not handle MFA authentication.

NEW QUESTION # 59

(Which two languages are used by CloudFormation to define infrastructure? Choose 2 answers.)

- A. XML
- **B. YAML**
- C. C#
- **D. JSON**

Answer: B,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

AWS CloudFormation uses YAML and JSON languages to define infrastructure as code (IaC) templates, specifying resources,

parameters, and configurations. These formats are human-readable and support the creation of stacks for provisioning AWS resources. The WGU Cloud Deployment and Operations Study Guide (Section 5.3, CloudFormation) states, "CloudFormation templates can be written in YAML or JSON, both of which are supported for defining infrastructure resources like EC2 instances and S3 buckets." XML and C# are not supported languages for CloudFormation templates.

NEW QUESTION # 60

(Which feature should be configured to deploy a static website to AWS?)

- A. RDS Proxy
- **B. Bucket properties**
- C. S3 Versioning
- D. CloudTrail events

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To deploy a static website to AWS, the bucket properties of an Amazon S3 bucket should be configured, specifically enabling static website hosting. This involves setting the bucket policy to allow public read access and configuring the index and error documents. The WGU Cloud Deployment and Operations Study Guide (Section 2.1, S3 Static Website Hosting) states, "Configuring bucket properties for static website hosting in S3 involves enabling the website endpoint, setting an index document (e.g., index.html), and applying a bucket policy for public access, making it suitable for hosting static content." RDS Proxy, S3 Versioning, and CloudTrail events are not relevant to this use case.

NEW QUESTION # 61

(An administrator needs to set up self-managed permissions for AWS CloudFormation StackSet operations.

Which two roles should be created in the administrator account and in the target accounts? Choose 2 answers.)

- A. In each target account, create a service role named `AWSCloudFormationStackSetAdministrationRole` that trusts the administrator account.
- **B. In the administrator account, create an IAM role named `AWSCloudFormationStackSetAdministrationRole`.**
- C. In the administrator account, create an IAM role named `AWSCloudFormationStackSetExecutionRole`.
- **D. In each target account, create a service role named `AWSCloudFormationStackSetExecutionRole` that trusts the administrator account.**

Answer: B,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To set up self-managed permissions for CloudFormation StackSet operations, two roles are required: in the administrator account, create an IAM role named `AWSCloudFormationStackSetAdministrationRole` to manage StackSet operations, and in each target account, create a service role named `AWSCloudFormationStackSetExecutionRole` that trusts the administrator account to execute the stacks. The WGU Cloud Deployment and Operations Study Guide (Section 5.4, StackSets) states, "For self-managed permissions, the administrator account requires the `AWSCloudFormationStackSetAdministrationRole`, while each target account needs the `AWSCloudFormationStackSetExecutionRole` with a trust relationship to the administrator account for stack deployment." Roles B and D are incorrectly named or misplaced.

NEW QUESTION # 62

.....

With the improvement of people's living standards, there are more and more highly educated people. To defeat other people in the more and more fierce competition, one must demonstrate his extraordinary strength. Today, getting Cloud-Deployment-and-Operations certification has become a trend, and Cloud-Deployment-and-Operations exam dump is the best weapon to help you pass certification. We all know that obtaining the Cloud-Deployment-and-Operations certification is very difficult, and students who want to pass the exam often have to spend a lot of time and energy. After years of hard work, the experts finally developed a set of perfect learning materials Cloud-Deployment-and-Operations practice materials that would allow the students to pass the exam

easily. With our study materials, you only need 20-30 hours of study to successfully pass the exam and reach the peak of your career. What are you waiting for? Come and buy it now.
