### 질문 # 21

You are using the Responsive Self Service Procurement application and you want to review the list of current approvers of a requisition pending approval, but these are not displayed.

Which two could be reasons for the approvals not being displayed?

- A. There are errors in retrieving approval details, or there could be any other infrastructure issues.
- B. Only the approvers can view the list of approvers.
- C. The requisition is currently under edit by an approver.
- D. The approvals task flow has been initiated.

정답: A,D

### 설명:

The Responsive Self Service Procurement application allows you to view the list of current approvers of a requisition that's pending approval. However, there are some scenarios where the approvals are not displayed.

One scenario is when the approvals task flow has been initiated, but not yet completed. In this case, the approvals are still being processed and the list of approvers is not yet available. Another scenario is when there are errors in retrieving approval details, or there could be any other infrastructure issues that prevent the display of approvals. In this case, you may see a message that says

"Unable to retrieve approval details" or

"Approval details are not available".

### 질문 # 22

You are implementing Procurement Contracts and, during user acceptance testing, a user wants to create clauses in the Fusion Cloud application similar to what were available in their legacy contract application.

What are two ways to create clauses to meet this requirement?

- A. Create Clauses from the Contracts Work Area page
- B. Import Clauses from the Contracts work area page
- C. Manage Contract Standard Clauses from Functional Setup Manager
- D. Manage Contract Standard Clauses, Templates, and Profiles from Functional Setup Manager

정답: A,B

### 질문 # 23

When creating a negotiation, the category manager wants to send it to all supplier contacts for a supplier.

Which is the most efficient way to achieve this?

- A. Create the negotiation by using a negotiation style with the appropriate supplier control selected.
- B. Create a negotiation by using a negotiation template with each supplier contact added.
- C. Create a negotiation and add each supplier contact to it.
- D. Create a negotiation and send it to the supplier bidder contact for forward distribution.

정답: A

### 설명:

The most efficient way to send a negotiation to all supplier contacts for a supplier is to use a negotiation style that has the supplier control option of "All supplier contacts" enabled. This option allows you to automatically include all the contacts associated with a supplier when you add the supplier to the negotiation. You do not need to manually add each contact or rely on the supplier bidder contact to forward the negotiation. You can also create a negotiation template with this option enabled and use it to create a negotiation.

#### 질문 # 24

You want to send your purchasing documents from a specific organization-wide email address. What task would you use to set this up?

- A. Manage Purchasing Messages
- **B. Manage Purchasing Profile Options**
- C. Manage Purchasing Application Core Messages
- D. Manage Purchasing Value Sets
- E. Manage Purchasing Profile Messaging Options

정답: B

#### 설명:

To send your purchasing documents from a specific organization-wide email address, you need to use the task Manage Purchasing Profile Options. This task allows you to configure various profile options that control the behavior and functionality of the Purchasing application. One of these profile options is PO: Email Sender Address, which specifies the email address that appears in the From field of the email notifications sent to suppliers and internal users. You can set this profile option at the site level to apply it to all business units, or at the product level to apply it to a specific business unit.

#### 질문 # 25

Your client wants to be able to automate the process to ask employees to evaluate their suppliers periodically and enable a touchless process to track supplier performance over time. Which feature do they need to opt in to?

- A. Sourcing Programs
- B. Full Supplier Profile Change Management
- **C. Conduct Internal Surveys for Supplier Qualification**
- D. Assess Supplier Eligibility for Sourcing

정답: C

#### 설명:

The feature that enables the automation of supplier evaluation by employees is Conduct Internal Surveys for Supplier Qualification. This feature allows you to create and publish internal surveys to collect feedback from employees who have interacted with suppliers. You can use predefined or custom questions, assign survey respondents, and schedule survey frequency. The survey responses are automatically captured and aggregated in the supplier qualification work area, where you can view the supplier performance scores and trends over time. This feature helps you to monitor and improve supplier performance, as well as identify potential risks and opportunities.
