# Free C_S4EWM_2023 Vce Dumps, C_S4EWM_2023 Valid Exam Vce

This type of SAP C_S4EWM_2023 actual exam simulation helps to calm your exam anxiety. Since the software keeps a record of your attempts, you can overcome mistakes before the SAP C_S4EWM_2023 final exam attempt. Knowing the style of the SAP C_S4EWM_2023 examination is a great help to pass the test and this feature is one of the perks you will get in the desktop practice exam software.

SAP C_S4EWM_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Warehouse Structure, Resource Management and SAP EWM Master Data: This topic encompasses defining the warehouse structure and setting up resource management, along with creating SAP EWM master data like storage bins and products, packaging specifications, supply chain units, and business partners.
Topic 2	• Internal processing (Physical Inventory, Replenishment): This topic involves defining physical inventory processes and setting up and executing replenishment.
Topic 3	• Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.
Topic 4	• Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.
Topic 5	• Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).
Topic 6	• Warehouse Management (Monitor - Cockpit): This topic involves monitoring warehouse activities using the Warehouse Management Monitor, Warehouse Cockpit, and analytical apps.
Topic 7	• Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.
Topic 8	• Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.

Topic 9	• Managing Clean Core: It covers evaluating and applying clean core principles to ERP to maximize business process agility, reduce adaptation efforts, and accelerate innovation.

C_S4EWM_2023 Valid Exam Vce - C_S4EWM_2023 Latest Exam Forum

Due to lots of same products in the market, maybe you have difficulty in choosing the C_S4EWM_2023 guide test. We can confidently tell you that our products are excellent in all aspects. You can directly select our products. Firstly, we have free trials of the C_S4EWM_2023 exam study materials to help you know our products. One of the great advantages is that you will soon get a feedback after you finish the exercises. So you are able to adjust your learning plan of the C_S4EWM_2023 Guide test flexibly. We hope that our new design can make study more interesting and colorful. You also can send us good suggestions about developing the study material.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q36-Q41):

NEW QUESTION # 36
You have maintained several process types that should all use the same storage type search sequence for putaway. You want to minimize customizing efforts and create only one entry for these process types. What can you use to achieve this goal?

- A. Activity assigned to process type
- B. Storage process
- C. Putaway control indicator
- D. Process type group

Answer: D

Explanation:
To minimize customization efforts and maintain a single entry for process types with the same storage type search sequence:
* A. Process Type Group:
* A process type group allows multiple process types to share the same storage type search sequence.
* This reduces redundancy and simplifies the configuration.
Incorrect Options:
* B: Storage processes define step-by-step handling of goods but do not group process types.
* C: Putaway control indicators are used for specific material handling but are not related to process type grouping.
* D: Activities define warehouse tasks, not the grouping of process types.
References:
* SAP Help Portal: Process Type Group Configuration

NEW QUESTION # 37
What is defined with the preparation time in the warehouse order creation rule?

- A. The time required by the system for the picking strategy
- B. The time required by an employee to prepare the processing of the warehouse order
- C. The time required by the resource until it reaches the storage type
- D. The time required by the wave for the creation process

Answer: B

Explanation:
Preparation Time in Warehouse Order Creation Rule
* Employee Preparation Time (D): Reflects the time required for workers to get ready for processing the warehouse order, such as collecting tools or moving to the work area.
Excluded Options
* A (Resource Reach Time): Preparation time does not directly account for the time taken to reach storage types.

* B (System Picking Time): Picking strategy time is separate from preparation time.
* C (Wave Creation Time): Wave processing time is managed independently.
SAP S/4HANA Cloud Private Edition Reference
* Check Warehouse Order Creation Rules and Parameters in SAP EWM documentation.

NEW QUESTION # 38
To which of the following objects can you assign external process steps? Note: There are 2 correct answers to this question.

- A. Packaging specification
- B. Delivery item type
- C. Work center
- D. Handling unit type

Answer: C,D

NEW QUESTION # 39
Which of the following actions can you perform from the shipping cockpit? Note: There are 2 correct answers to this question.

- A. Create waves and assign doors
- B. Create and check in transportation units
- C. Assign outbound delivery orders and inbound deliveries to transportation units
- D. Create Pick HUs

Answer: A,B

Explanation:
Comprehensive and Detailed In-Depth Explanation:
The shipping cockpit (/SCWM/SHCO) in SAP EWM manages outbound processes. Option A ("Create waves and assign doors") is correct as it supports wave creation and door assignment, and option D ("Create and check in transportation units") is correct for TU management, both available in the cockpit. Option B is transportation management-specific, and option C (Pick HUs) is done during picking, not in the cockpit.

NEW QUESTION # 40
Using embedded EWM, what options do you have for the goods receipt posting for external procurement?
Note: There are 2 correct answers to this question.

- A. Use synchronous goods receipt where you post the GR in EWM.
- B. Use the EWM Inbound Delivery to post goods receipt.
- C. Use synchronous goods receipt where you post the GR in ERP.
- D. Use the ERP Inbound Delivery to post goods receipt.

Answer: B,D

Explanation:
Comprehensive and Detailed In-Depth Explanation:
In embedded EWM within SAP S/4HANA Cloud, Private Edition, goods receipt (GR) for external procurement can be posted using two primary methods. Option B ("Use the ERP Inbound Delivery to post goods receipt") is correct because the ERP inbound delivery (created in SAP ERP/S/4HANA MM) serves as the reference document, which is then replicated to EWM for warehouse processing. Option C ("Use the EWM Inbound Delivery to post goods receipt") is also correct because the inbound delivery in EWM, derived from the ERP document, is where the actual GR is confirmed and posted back to ERP via integration.
Synchronous GR (options A and D) is not a standard feature in embedded EWM for external procurement, as the process relies on asynchronous communication between ERP and EWM via queued remote function calls (qRFC). The GR posting is finalized in ERP based on EWM confirmation, ensuring inventory alignment.

NEW QUESTION # 41
