

Latest JN0-105 Test Preparation | JN0-105 Relevant Answers

BONUS!!! Download part of VCEPrep JN0-105 dumps for free: <https://drive.google.com/open?id=1zSkPMuTt6UVVLYVqV1Ybvjyr-QP029oW>

We have applied the latest technologies to the design of our JN0-105 exam prep not only on the content but also on the displays. As a consequence you are able to keep pace with the changeable world and remain your advantages with our JN0-105 training braindumps. Besides, you can consolidate important knowledge for you personally and design customized study schedule or to-do list on a daily basis. As long as you follow with our JN0-105 Study Guide, you are doomed to achieve your success.

All questions in our JN0-105 pass guide are at here to help you prepare for the certification exam. We have developed our learning materials with accurate JN0-105 exam answers and detailed explanations to ensure you pass test in your first try. Our PDF files are printable that you can share your JN0-105 free demo with your friends and classmates. You can practice JN0-105 real questions and review our study guide anywhere and anytime.

Juniper JN0-105 PDF Questions-Turn Your Exam Fear Into Confidence

It is an important process that filling in the correct mail address in order that it is easier for us to send our JN0-105 study guide to you after purchase, therefore, this personal message is particularly important. We are selling virtual JN0-105 learning dumps, and the order of our JN0-105 training materials will be immediately automatically sent to each purchaser's mailbox according to our system. It is very fast and convenient to have our JN0-105 practice questions.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.
Topic 2	<ul style="list-style-type: none">Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.
Topic 3	<ul style="list-style-type: none">Junos OS Fundamentals: It covers concepts, benefits, and functionality of the core elements of the Junos OS.
Topic 4	<ul style="list-style-type: none">Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which two statements are true about the PFE? (Choose two.)

- A. The PFE handles all processes that control the chassis components.
- **B. The PFE implements various services such as policing, stateless firewall filtering, and class of service.**
- C. The PFE is responsible for performing protocol updates and system management.
- **D. The PFE uses Layer 2 and Layer 3 forwarding tables to forward traffic toward its destination.**

Answer: B,D

Explanation:

The Packet Forwarding Engine (PFE) in Juniper Networks devices is the heart of the data plane, handling the actual forwarding of packets based on pre-computed forwarding tables. It provides several critical services to manage and control traffic flow, including policing (to enforce bandwidth limits for certain traffic types), stateless firewall filtering (to permit or deny traffic based on predefined criteria), and Class of Service (CoS) (to prioritize traffic to ensure quality of service for critical applications). The PFE utilizes both Layer 2 (MAC addresses) and Layer 3 (IP addresses) forwarding tables to make intelligent forwarding decisions, ensuring that packets are efficiently routed toward their final destination.

NEW QUESTION # 53

What will the request system configuration rescue save command do?

- A. It activates the rescue configuration.
- B. It saves the candidate configuration as the rescue configuration.
- C. It saves a configuration version prior to the configuration most recently committed as the rescue configuration.
- **D. It saves the most recently committed configuration as the rescue configuration.**

Answer: D

Explanation:

The request system configuration rescue save command in Junos OS saves the most recently committed configuration as the rescue configuration. This rescue configuration can be used to recover the device if future configurations cause issues. It ensures there is a stable, known-good configuration to fall back on, which is crucial in network management and troubleshooting.

Reference:

"rescue : save configurations as the rescue: request system configuration save(saves the current configs as a rescue configs)" from Useful Juniper Commands.txt.

Juniper official documentation: Configuring and Activating a Rescue Configuration.

NEW QUESTION # 54

What are two examples of exception traffic? (Choose two.)

- **A. routing updates**
- B. transit packets
- **C. log messages**
- D. ping to the local device

Answer: A,C

Explanation:

Exception traffic includes traffic that is not simply forwarded by the router but requires special handling, such as routing updates (B) and log messages (C). These types of traffic are processed by the router's control plane rather than just being forwarded through the data plane.

NEW QUESTION # 55

You need to recover the root password on a Junos router without losing the current configuration settings. Which three statements describe what you should perform in this scenario? (Choose three.)

- A. Load the factory-default configuration.
- B. Upgrade the Junos OS to the latest version.
- C. Hit the space bar and enter recovery when prompted.
- D. Use a console connection to reboot the device.
- E. Enter and commit the new root password.

Answer: C,D,E

Explanation:

To recover the root password on a Junos router without losing the configuration, you should (A) enter and commit the new root password once you have gained access to the system, (D) hit the space bar to interrupt the boot process and enter recovery mode when prompted during the boot process, and (E) use a console connection to reboot the device and access the bootloader prompt. These steps allow you to reset the root password while preserving the existing configuration.

NEW QUESTION # 56

Exhibit

[edit]

user@router# set interfaces ge-0/1/2 unit 0 family inet address 172.16.101.1/24 [edit] user@router# commit check configuration check succeeds

[edit]

user@router#

You need to configure interface ge-0/1/2 with an IP address of 172.16.100.1/24. You have accidentally entered 172.16.101.1/24 as shown in the exhibit.

Which command should you issue to solve the problem?

- A. [edit] user@router# rollback 0
- B. [edit] user@router# rollback 2
- C. [edit] user@router# rollback 1
- D. [edit] user@router# rollback rescue

Answer: C

Explanation:

If you've committed a configuration and then need to revert to the previous configuration, the rollback command is used. Since the incorrect IP address has not been committed, as indicated by the commit check command being successful, issuing rollback 1 will undo the changes made in the current session, which includes the accidental entry of the IP address.

NEW QUESTION # 57

.....

Our customers receive Juniper JN0-105 questions updates for up to 365 days after their purchase. They can also try a free demo for satisfaction before buying our Juniper JN0-105 dumps. And a 24/7 support system assists them whenever they are stuck in any problem or issue. This Juniper JN0-105 Questions is a complete package and a blessing for candidates who want to prepare quickly for the JN0-105 exam. Buy It Now!
