Salesforce OmniStudio-Developer Exam is designed to test a candidate's knowledge of Salesforce's low-code development tools and their ability to use these tools to build custom applications. OmniStudio-Developer exam covers a range of topics, including building and customizing Lightning components, creating and managing Flows, and designing and implementing custom interfaces

using Lightning App Builder. Candidates will also be tested on their knowledge of Apex code and how to integrate custom code with Salesforce's low-code tools.

Salesforce Certified OmniStudio Developer Sample Questions (Q36-Q41):

NEW QUESTION # 36
What is the reason for this? Refer to the exhibit below.

- A. Both parent and embeddedOmniScripts have the same element name for the Set Values element.
- B. The WLC PubSub Messge flag in the Set Values action of the parent OmniScript has not been set.
- C. A developer failed to include a Navigate Action Element to pass data from the parent OmniScript.
- D. The flag passData.JSON in the parent OmniScript in not configured correctly.

Answer: C

NEW QUESTION # 37
You have a FlexCard with five FlexCard states. Four of the states have a condition. Two of the states have true conditions. Which state will be displayed?

- A. The state that has the higher priority
- B. The state that is closer to the top in the FlexCard canvas
- C. The state that is closer to the bottom in the FlexCard canvas
- D. The state that has no condition

Answer: B

NEW QUESTION # 38
You are building a DataRaptor Load for an Integration Procedure used in an OmniScript.
Based on best practices, how should you configure the Input JSON?

- A. Build the Input JSON node by node in the DataRaptor Designer.
- B. Copy the Input JSON from the DataRaptor Action Debug node.
- C. Build the Input JSON node by node in an editor.
- D. Copy the Input JSON from the OmniScript {Data} modal.

Answer: D

NEW QUESTION # 39
Which two fields in an Integration Procedure or Data Mapper can execute a function like CONCAT or DATEDIFF?
Choose 2 answers

- A. In a Data Mapper in an Output Tab Output JSON Path
- B. In a Data Mapper Action in an Input Parameters value field
- C. In a Set Values Action in a Value field
- D. In a Remote Action in an Additional Output value field

Answer: B,C

Explanation:
Functions like CONCAT, DATEDIFF, and IF are supported in value fields where expressions can be parsed at runtime.
* B. In a Set Values Action in a Value field - Correct. The Set Values element supports expression functions in its Value field, allowing for real-time evaluation during IP execution.
* C. In a Data Mapper Action in an Input Parameters value field - Correct. Input Parameters to DataRaptors in Integration Procedures can use expression logic to dynamically compute and pass values.
Incorrect Options:
* A. Output JSON Path in DataRaptor is for structural mapping, not function execution.
* D. Remote Action Output fields typically receive data, not compute it.

Salesforce OmniStudio Developer Guide # Expression Functions in Integration Procedures

NEW QUESTION # 40
Refer to the exhibit below. What JSON from the DRGetContactDeteils action would display all six values correctlyshown?
BlkCases is a Repeat Block, and the names of the elements are the same as the label names without spaces.

- A.
- B.
- C.
- D.

Answer: A

Explanation:
Explanation
According to the OmniScript Data JSON page, the OmniScript structure JSON defines the data elements and their properties that are used in an OmniScript. The exhibit shows an OmniScript structure JSON with six elements: ContactName, ContactPhone, ContactEmail, CaseNumber, CaseSubject, and CaseStatus. The DRGetContactDetails action is a DataRaptor Extract action that retrieves data from the Contact and Case objects in Salesforce. The BlkCases element is a Repeat Block that displays a list of cases related to the contact. Therefore, the JSON from the DRGetContactDetails action that would display all six values correctly shown is option A, which has the following structure:
The other options have different structures that do not match the OmniScript structure shown.
