Salesforce Certified Experience Cloud Consultant Sample Questions (Q59-Q64):

NEW QUESTION # 59

Universal Containers' (UC) Salesforce org uses SAML 550 with a third-party identity provider for internal user authentication. UC now wants to extend this capability for Experience Cloud site users as well.

What should the UC administrator ensure in order to successfully implement SAML 550 for the Experience Cloud site?

- A. Create a Connected App with custom attributes before configuring SAML settings.
- B. Use the site login URL as an endpoint where SAML assertion is made.
- C. Create a Visualforce page that receives and validates the SAML assertion.
- D. Register the Experience Cloud site as an Identity Provider in SAML settings.

Answer: B

NEW QUESTION # 60

Ursa Major Solar would like its Experience Cloud site's guest users to benefit from the suggestions that come from autocomplete on search terms.

How should the administrator configure this?

- A. In the Search component property editor, open the Autocomplete section and click desired objects to appear in autocomplete. Select "publicly available".
- B. In the Hero component property editor, open the Search Results section and click desired objects to appear in autocomplete. Select "publicly available".
- C. Use the Developer Console to add code to allow for autocomplete functionality.
- D. In Salesforce Setup, type "support settings" in the quick find box. Under the Autocomplete header, select the objects to appear in autocomplete for guest users.

Answer: A

Explanation:

To enable autocomplete for guest users, the administrator should use the Search component property editor, open the Autocomplete section, and click desired objects to appear in autocomplete. Select "publicly available". Autocomplete is a feature that suggests search terms based on what users type in the search box. The Search component property editor is a tool that allows you to customize the settings and behavior of the Search component on your Experience Cloud site. By selecting "publicly available", you can make autocomplete suggestions visible to guest users who are not logged in.
