Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, C-S4PM2-2507 test answers will be your best choice. For office workers, C-S4PM2-2507 test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but C-S4PM2-2507 Study Materials will help you to solve this problem perfectly.

## SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q24-Q29):

#### NEW QUESTION # 24

Which of the following connectivity options can you use to connect to a customer's SAP S/4HANA Cloud Private Edition environment?

- A. Remote Desktop Protocol (RDP) access to the migration server.
- **B. VPN connection to the customer's network.**
- C. SSH connection to the application server.
- D. Direct access to the HANA database server's operating system.

**Answer: B**

#### NEW QUESTION # 25

What is the most granular level of the methodology you can view in the SAP Roadmap Viewer?

- A. Activities
- B. Workstream
- **C. Task**
- D. Deliverable

**Answer: C**

#### NEW QUESTION # 26

What are capabilities of the RISE with SAP Methodology Dashboard? Note: There are 3 correct answers to this question.

- A. Monitor System Performance using real-time system metrics
- **B. Access a detailed overview of system adherence.**
- **C. Manage system extensibility to identify deviations from SAP's recommendations.**
- D. Establish direct Integration with Change Management Ticketing Systems
- **E. Analyze detailed insights on the clean core status of your systems.**

**Answer: B,C,E**

#### NEW QUESTION # 27

Which of the following elements should be included in the solution design to ensure alignment with business requirements? Note: There are 3 correct answers to this question.

- **A. System landscape blueprint detailing the technical architecture**
- **B. Integration design specifications for connecting SAP and non-SAP systems**
- C. Test plan focusing on validating functionality
- D. Business case including project goals, cost estimates, expected ROI!
- **E. Data migration strategy and approach for transitioning to the new solution**

**Answer: A,B,E**

Explanation:

Step 1 - Understanding the question

This question asks which elements should be included in a solution design to ensure alignment with business requirements during SAP S/4HANA Cloud, Private Edition implementation.

A complete solution design defines how the system will fulfill business needs, covering architecture, data, and integration perspectives.

Step 2 - Evaluate each option

Option A: System landscape blueprint detailing the technical architecture Correct.

A detailed system landscape ensures that the technical setup (systems, interfaces, environments) supports the business solution.

Option B: Test plan focusing on validating functionality

Incorrect.

While test plans are essential for validation, they are not part of the solution design itself. They are developed later during testing phases.

Option C: Business case including project goals, cost estimates, expected ROI Incorrect.

A business case supports project justification and approval but is not a direct part of the solution design.

Option D: Data migration strategy and approach for transitioning to the new solution Correct.

Data migration strategy ensures that all legacy data is transitioned accurately and supports the designed business processes in the new system.

Option E: Integration design specifications for connecting SAP and non-SAP systems Correct.

Integration design defines how data flows between SAP and external systems, which is critical to achieving end-to-end business process alignment.

### NEW QUESTION # 28

When doing a new implementation on premise or private cloud, which system is recommended to demonstrate standard functionality in the Explore phase?

- A. Trial
- B. Sandbox
- C. Development
- **D. Starter**

**Answer: D**

Explanation:

During a new implementation project of SAP S/4HANA—whether on-premise or in a private cloud environment—the Explore Phase of the SAP Activate methodology focuses on validating standard SAP Best Practices processes through Fit-to-Standard workshops. The system used to demonstrate these standard processes should contain activated best practice content and be preconfigured for demonstration.

D). Starter system

The Starter system is specifically designed for this purpose. It comes preloaded with SAP Best Practices content, including configuration, sample master data, and transactional data. It allows project teams to explore standard functionality, perform Fit-to-Standard workshops, and validate requirements before system configuration begins.

Other options:

\* A. Trial system: Used for learning and exploration but not suitable for formal project phases.

\* B. Development system: Used later during configuration and realization, not for initial demonstrations.

\* C. Sandbox system: Used for testing or practice, not the recommended system for Explore workshops.

### NEW QUESTION # 29

.....

The great advantage of our SAP C-S4PM2-2507 study prep is that we offer free updates for one year long. On one hand, these free updates can greatly spare your money since you have the right to free download SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects real dumps as long as you need to. On the other hand, we offer this after-sales service to all our customers to ensure that they have plenty of opportunities to successfully pass their C-S4PM2-2507 Actual Exam and finally get their desired certification of C-S4PM2-2507 practice materials.
