

# COBIT-Design-and-Implementation완벽한덤프자료 & COBIT-Design-and-Implementation높은통과율덤프공부문제

Itexamdump COBIT-Design-and-Implementation 최신 PDF 버전 시험 문제집을 무료로 Google Drive에서 다운로드하세요: <https://drive.google.com/open?id=1B4aauJ0CnbVLLZkuxiNK3b9d-qTAaLF5>

예를 들어ISACA COBIT-Design-and-Implementation 덤프를 보면 어떤 덤프제공사이트에서는 문항수가 아주 많은 자료를 제공해드리지만 저희ISACA COBIT-Design-and-Implementation덤프는 문항수가 적은 편입니다.왜냐하면 저희는 더 이상 출제되지 않는 오래된 문제들을 삭제해버리기 때문입니다. 문제가 많으면 고객들의 시간을 허비하게 됩니다. Itexamdump는 응시자에게 있어서 시간이 정말 소중한다는 것을 잘 알고 있습니다.

## ISACA COBIT-Design-and-Implementation 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>The Governance System Design Workflow: The exam zeroes in on IT architects, designers, and consultants as the primary audience. This section evaluates their prowess in crafting effective governance systems. These professionals will exhibit their talent for creating streamlined workflow processes, defining clear governance structures, and customizing governance frameworks to perfectly suit the unique needs of their organizations.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>Governance Implementation Lifecycle: In this section, the focus is on assessing the capabilities of IT governance professionals and senior managers in implementing and managing the complex world of enterprise technology governance. They will showcase their comprehensive understanding of the full lifecycle, encompassing planning, design, execution, monitoring, and enhancement of robust governance systems. Their expertise in aligning these systems with strategic objectives is key.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>COBIT Basic Concepts: IT professionals, managers, and those immersed in governance practices will encounter this section, which tests their grasp of COBIT fundamentals. This includes understanding the Control Objectives for Information and Related Technologies framework, along with the core principles that guide effective governance of enterprise IT.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>Key Topics Decision Matrix: IT governance analysts, advisors, and consultants showcase their proficiency in employing a decision matrix as a tool. They exhibit their skill in evaluating and prioritizing key topics, making well-informed choices that ultimately enhance the implementation and ongoing improvement of robust governance systems.</li> </ul>
주제 5	<ul style="list-style-type: none"> <li>Impact of Design Factors: Management consultants, IT strategists, and governance specialists take center stage as they delve into understanding the far-reaching impact of design factors. They assess how these factors influence the effectiveness of governance systems, processes, and the attainment of strategic objectives. Their insight ensures the optimization of governance practices.</li> </ul>

Itexamdump의ISACA COBIT-Design-and-Implementation덤프로ISACA COBIT-Design-and-Implementation시험공부를 하여 시험에서 떨어지는 경우 덤프비용전액을 환불해드릴만큼 저희 덤프는 높은 적응율을 자랑하고 있습니다. 주문 번호와 불합격성적표를 메일로 보내오시면 바로 환불가능합니다. 환불해드린후에는 무료업데이트 서비스가 종료됩니다. ISACA COBIT-Design-and-Implementation 시험을 두려없이 패스하고 싶은 분은 저희 사이트를 찾아주세요.

### 최신 COBIT Design and Implementation COBIT-Design-and-Implementation 무료샘플문제 (Q131-Q136):

#### 질문 # 131

After a bank experienced cyber attacks that severely impacted operations and raised questions from regulators, the board mandated the newly hired CIO to implement global best practices to mitigate this risk. The CIO is using COBIT 2019 to tailor the governance system and has identified high threat landscape as a critical design factor. Which of the following should the CIO identify NEXT?

- A. IT security solutions
- B. Technology personnel
- C. Risk management practices
- D. Security-related processes

정답: D

#### 설명:

After identifying a high threat landscape as a critical design factor, the CIO should next identify security-related processes. This step ensures that the governance system includes robust processes to manage and mitigate security risks.

In a high-threat landscape, focusing on security-related processes is essential to protect the enterprise's information assets and mitigate potential risks. These processes include incident management, vulnerability management, and access control, among others.

COBIT 2019 Framework References:

\* COBIT 2019 Framework: Governance and Management Objectives, APO13 Managed Security:

This objective

#### 질문 # 132

When considering the sourcing model for IT factor, and the design factor value is outsourcing, which of the following should be a management objective priority?

- A. Managed relationships (APO08)
- B. Managed enterprise architecture (AP003)
- C. Managed performance and conformance monitoring (MEA01)
- D. Managed security services (DSS05)

정답: A

#### 설명:

According to the COBIT 2019 Design Guide:

"When outsourcing is selected as the sourcing model, managing relationships with external vendors becomes a top governance and management priority to ensure service quality, compliance, and accountability." This makes APO08 Managed Relationships the essential management objective for ensuring outsourcing success. While security and performance are important, managing relationships is the core requirement in an outsourced model.

Reference: COBIT 2019 Design Guide, Section 4.4.7

#### 질문 # 133

The PRIMARY purpose of including assurance and compliance auditors during the planning phase of an IT implementation initiative is to:

- A. Obtain an independent perspective.
- B. Ensure all risks have been considered.
- C. Validate completeness of the initiative.
- D. Determine if requirements are achievable.

**정답: A**

**설명:**

"Boards and executive management seek independent advice and opinions regarding critical I&T functions and services."

#### **질문 # 134**

In which of the following phases should quick wins be implemented in order to build credibility?

- A. Where do we want to be?
- B. How do we get there?
- C. Where are we now?
- D. What needs to be done?

**정답: B**

**설명:**

In the COBIT 2019 implementation lifecycle, quick wins are essential for demonstrating early success and building credibility for the governance initiative. Implementing quick wins provides tangible results that can help secure stakeholder support and buy-in for the ongoing governance program. The appropriate phase for implementing quick wins is during the phase where the organization outlines and starts to execute the plan for achieving its governance objectives.

Detailed Explanation with References:

\* What needs to be done? (Option A):

\* This phase involves understanding the governance requirements, identifying gaps, and determining the necessary governance components. While important for planning, this phase is more about identifying needs rather than implementing solutions.

\* Where do we want to be? (Option B):

\* This phase focuses on defining the target state of the governance system, setting goals, and envisioning the desired outcomes. It is more strategic and future-oriented, outlining what the organization aims to achieve but not yet focusing on implementation.

\* How do we get there? (Option C):

\* This phase is about developing and executing the implementation plan to reach the desired state. It involves detailing the actions, resources, and timelines required to achieve the governance objectives. Implementing quick wins during this phase is crucial because it helps to demonstrate progress, build momentum, and validate the approach taken. Early successes in this phase can boost confidence and support for the broader governance initiative.

\* According to the COBIT 2019 Implementation Guide, achieving and demonstrating quick wins during this phase is critical to maintaining stakeholder engagement and demonstrating the value of the governance improvements.

\* Where are we now? (Option D):

\* This phase involves assessing the current state of the governance system, identifying existing issues, and understanding the baseline. It is more diagnostic and evaluative, laying the groundwork for planning but not yet focusing on implementation.

Conclusion: The correct answer is C. How do we get there?. Implementing quick wins during this phase helps to build credibility and support for the governance program by showing early, tangible improvements and demonstrating the feasibility and benefits of the proposed governance changes.

#### **질문 # 135**

When assessing the current state of I&T, a continual improvement task includes:

- A. identifying key enterprise and supporting alignment goals.
- B. identifying potential process improvements.
- C. raising executive awareness of IT and the value of EGIT.

- D. developing metrics to monitor I&T performance.

정답: B

설명:

When assessing the current state of I&T, a continual improvement task includes identifying potential process improvements. This task is essential for ensuring that IT processes remain efficient, effective, and aligned with business goals.

References in COBIT 2019 Design and Implementation:

\* COBIT 2019 Framework: Governance and Management Objectives, BAI10 (Managed Continuous Improvement): This objective focuses on the importance of continually assessing and improving IT processes to enhance performance and value delivery.

\* COBIT 2019 Implementation Guide, Chapter 5: This chapter discusses the need for continuous improvement initiatives, including the identification of potential process improvements to optimize IT performance.

By continually identifying and implementing process improvements, enterprises can ensure that their IT functions remain competitive and capable of supporting evolving business needs.
