참고: Itexamdump에서 Google Drive로 공유하는 무료 2026 CIPS L4M7 시험 문제집이 있습니다: <https://drive.google.com/open?id=10fwoOtQRFkApuGmBEw4UFAjk2qOe-JLS>

우리 Itexamdump에는 아주 엘리트 한 전문가들로 구성된 팀입니다 그들은 끈임 없는 연구와 자기자신만의 지식으로 많은 IT관련 덤프자료를 만들어 냄으로 여러분의 꿈을 이루어드립니다. 기존의 시험문제와 답과 시험문제분석 등입니다. Itexamdump에서 제공하는 CIPS L4M7 시험자료의 문제와 답은 실제시험의 문제와 답과 아주 비슷합니다. Itexamdump 덤프들은 모두 보장하는 덤프들이며 여러분은 과감히 Itexamdump의 덤프를 장바구니에 넣으세요. Itexamdump에서 여러분의 꿈을 이루어 드립니다.

CIPS L4M7 인증 시험을 준비하기 위해 응시자는 학습 가이드, 온라인 교육 과정 및 실습 시험을 포함하여 CIPS가 제공하는 다양한 연구 자료를 활용할 수 있습니다. 응시자는 또한 자산 관리에 대한 실질적인 경험을 가지고 있으며 업계 모범 사례 및 표준에 익숙해야 합니다. 전반적으로 CIPS L4M7 인증 시험은 자산 관리와 관련된 전문가에게 귀중한 인증이며 현장에서 경력 전망을 향상 시킬 수 있습니다.

CIPS L4M7 (CIPS 전 생애 자산 관리) 인증 시험은 전 세계적으로 인정 된 인증 프로그램으로 전문가에게 전체 수명 주기 동안 자산을 효과적으로 관리하는 데 필요한 지식과 기술을 갖추도록 설계되었습니다. 인증은 자산의 인수, 운영, 유지 보수 및 폐기에 관여하는 전문가에게 적합합니다.

인기자격증 L4M7유효한 인증덤프 시험대비자료

IT인증 시험덤프자료를 제공해드리는 사이트는 너무나도 많습니다. 그중에서 대부분 분들이 Itexamdump제품에 많은 관심과 사랑을 주고 계시는데 그 원인은 무엇일까요? 바로 Itexamdump에서 제공해드리는 덤프자료 품질이 제일 좋고 업데이트가 제일 빠르고 가격이 제일 저렴하고 구매후 서비스가 제일 훌륭하다는 점에 있습니다. Itexamdump 표 CIPS인증 L4M7덤프를 공부하시면 시험보는데 자신감이 생기고 시험불합격에 대한 우려도 줄어들 것입니다.

최신 Level 4 Diploma in Procurement and Supply L4M7 무료샘플문제 (Q110-Q115):

질문 # 110

Decommissioning, removal and disposal of assets may have impact on the environment. An organisation should have policies and procedures in place to enhance its environmental performance. Which standard family provides the guidance on environmental policies and procedures?

- A. ISO 14000 family
- B. ISO 22000 family
- C. ISO 27000 family
- D. ISO 9000 family

정답: A

설명:

The ISO 14000 family of standards are developed by ISO Technical Committee ISO/TC 207 and its various subcommittees. For a full list of published standards in the series see their standards catalogue. ISO 14001 provides requirements with guidance for use that relate to environmental systems. Other standards in the family focus on specific approaches such as audits, communications, labelling and life cycle analysis, as well as environmental challenges such as climate change.

ISO 27000 family of standards concerns information technology, with the goal of improving security and protecting company assets. Started in 2005, the two most popular standards are ISO 27001:2013 and 27002:

2013. 27001 is management-based system, whereas 27002 is a technical document, focused on the individual and putting a code of conduct in place. Organizations can choose either standard; ISO 27001 has over 22,000 certifications worldwide. It is a broad standard, and for this reason the certification can be customized to fit the needs of the organization, and is not mandatory.

ISO 22000 sets out the requirements for a food safety management system and can be certified to it. It maps out what an organization needs to do to demonstrate its ability to control food safety hazards in order to ensure that food is safe. It can be used by any organization regardless of its size or position in the food chain.

ISO 9001 is a family of quality management standards, there are fourteen in total. Of these, ISO 9001:2015 is the only one that can be certified to. It was first published in 1987, and has since been updated about every 7 years. The standard details how to put a Quality Management System (QMS) in place to better prepare your organization to produce quality products and services. It is customer focused, and places an emphasis on continuous improvement and top management processes that extended throughout the organization.

LO 3, AC 3.3

질문 # 111

What are the contents of master production schedule in MRP system?

- A. The investment required for production
- B. The total number of labour required to produce the final product
- C. What components and materials are and when to purchase them
- D. How many final products will be made and when to make them

정답: D

설명:

A master production schedule (MPS) is a plan for individual commodities to be produced in each time period such as production, staffing, inventory, etc.[1] It is usually linked to manufacturing where the plan indicates when and how much of each product will be demanded.[2] This plan quantifies significant processes, parts, and other resources in order to optimize production, to identify bottlenecks, and to anticipate needs and completed goods. Since a MPS drives much factory activity, its accuracy and viability dramatically affect profitability. Typical MPSs are created by software with user tweaking.

질문 # 112

A supplier delivers large quantities of inventory to its customer's store, but only charges for the goods as and when they are used. This can be described as...?

- A. Components inventory
- B. **Consignment stock**
- C. Multi-echelon stock
- D. Multi-stage inventory

정답: B

설명:

Consignment stock is stock legally owned by one party, but held by another, meaning that the risk and rewards regarding to the said stock remains with the first party while the second party is responsible for distribution or retail operations. Ownership of consignment stock is passed only when the stock is used (issued or sold in the case of a shop). Unused stock in a warehouse may be returned to the supplier when it concerns standard manufactured products. With customer specific items, agreements concerning returning products, should be negotiated.

질문 # 113

A manager who is concerned about the environmental impact of packaging should do which of the following?

- A. Not use the packaging materials at all
- B. Purchase the packaging materials in bulk
- C. Try to reduce the costs of packaging
- D. **Adopt international environmental packaging standards**

정답: D

설명:

In principle, use of any materials involves an environmental cost. Some packaging materials use a lot of natural resources and energy to produce. The journey taken by packaging from raw material to manufacturing and then to the initial user also incurs a 'carbon footprint'. The weight of packaging contributes to the fuel usage of vehicles while the volume used can add up to additional journeys or the use of larger vehicles. Finally, the reuse, return, disposal or recycling will also involve additional to the environmental cost.

In this question:

- 'Purchase

the packaging materials in bulk' may incur additional fuel and carbon footprint in delivering these materials

- 'Try to reduce the costs of packaging' may prompt the organisation to use less eco-friendly and cheap materials like polystyrene chips

- 'Not use the packaging materials at all' can increase the environmental performance of packaging activities, but it also harms the products to be delivered and may cause other environmental problems (i.e. spillage of toxic chemicals into the environment) So the correct answer should be: 'Adopt international environmental packaging standards'. The International Standards Organisation (ISO) has published several standards regarding packaging and environment, namely ISO 18601, ISO 18602, ISO 18603, ISO 18604, ISO 18605, ISO 18606.

질문 # 114

For which of the following is the 'delphi method' used?

- A. Valuing stock
- B. Controlling products
- C. Classifying products
- D. **Forecasting demand**

정답: D

설명:

Delphi method is a structured forecasting technique using a panel of experts and a number of rounds of questioning. Responses are shared after each round and the experts encouraged to reconsider their own responses. It is intended to achieve a consensus view. Reference: CIPS study guide 109-111
