And that too with flying colors and achieving the Tableau Desktop-Specialist Certification on the first attempt. You will identify both your strengths and shortcomings when you utilize Tableau Desktop Specialist Exam practice exam software.

Tableau Desktop Specialist Exam Sample Questions (Q99-Q104):

NEW QUESTION # 99
Suppose I have the following view. What will be the total number of marks if I drag a new measure to the row shelf vs the column shelf?
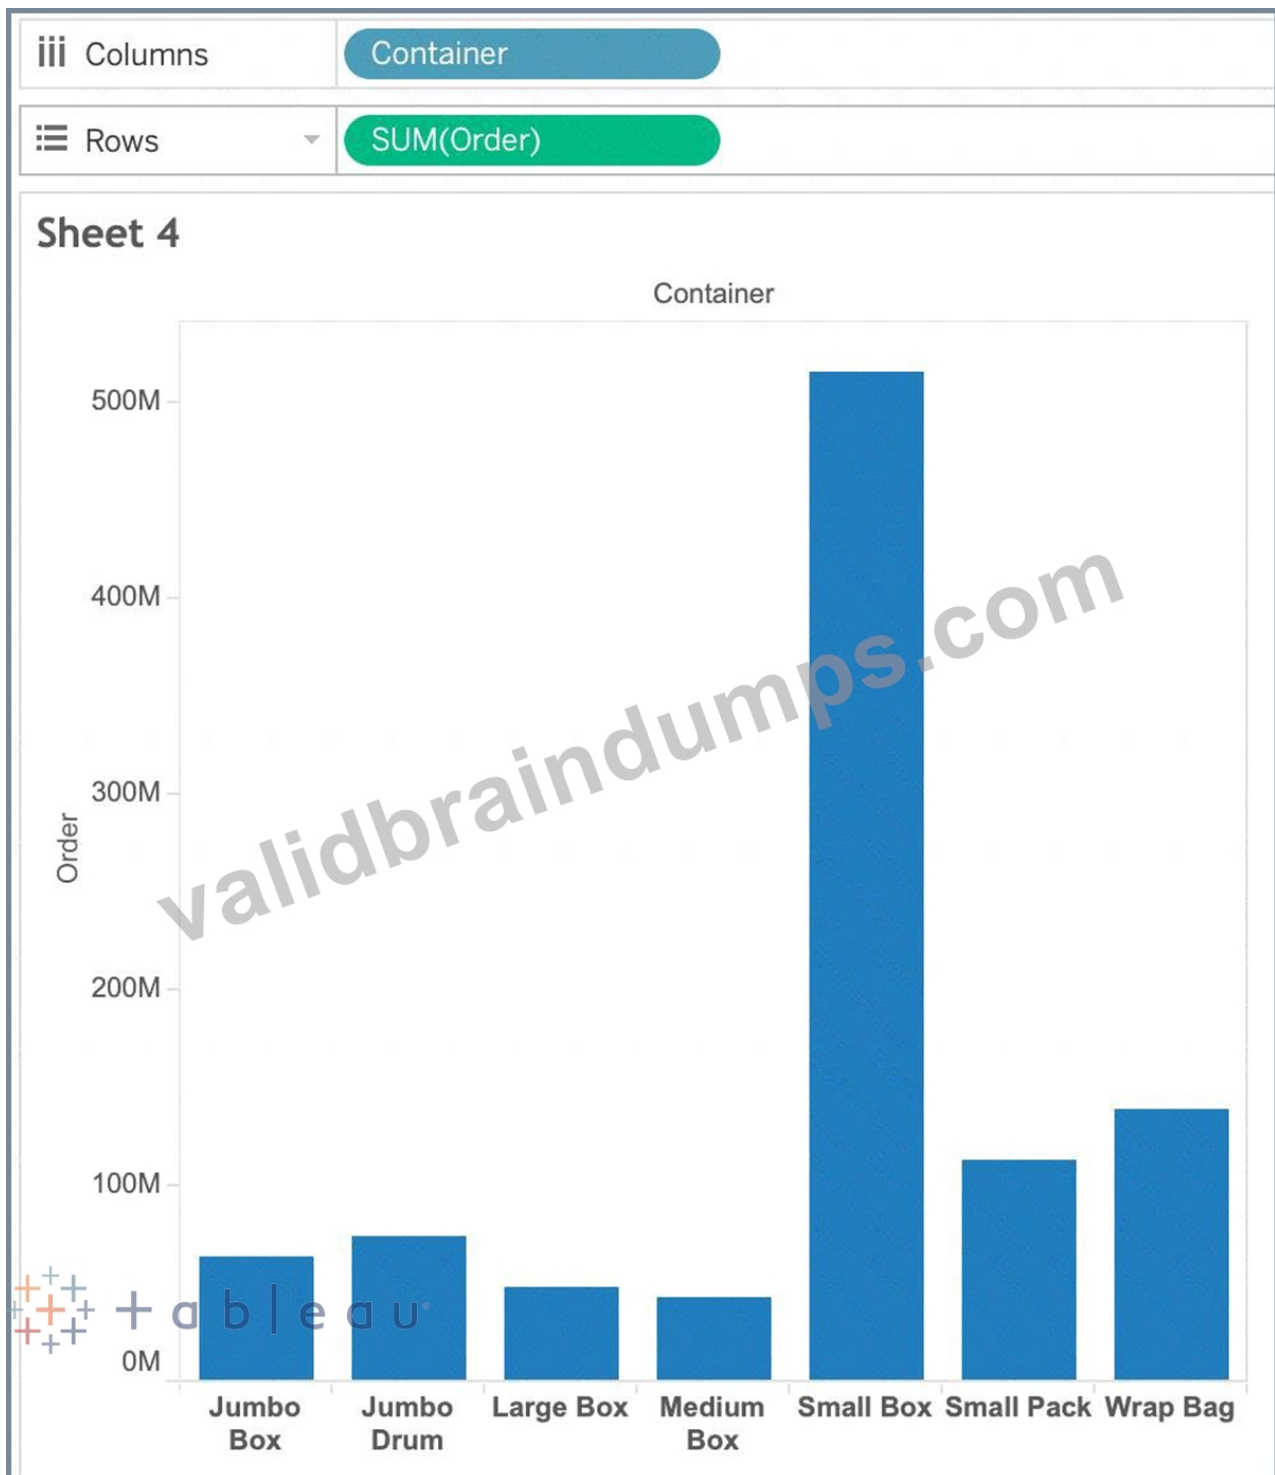

- A. If dragged to row shelf : 14 marks ; If dragged to column shelf : 7 marks
- B. If dragged to row shelf : 7 marks ; If dragged to column shelf : 14 marks
- C. If dragged to row shelf : 7 marks ; If dragged to column shelf : 7 marks
- D. If dragged to row shelf : 14 marks ; If dragged to column shelf : 14 marks
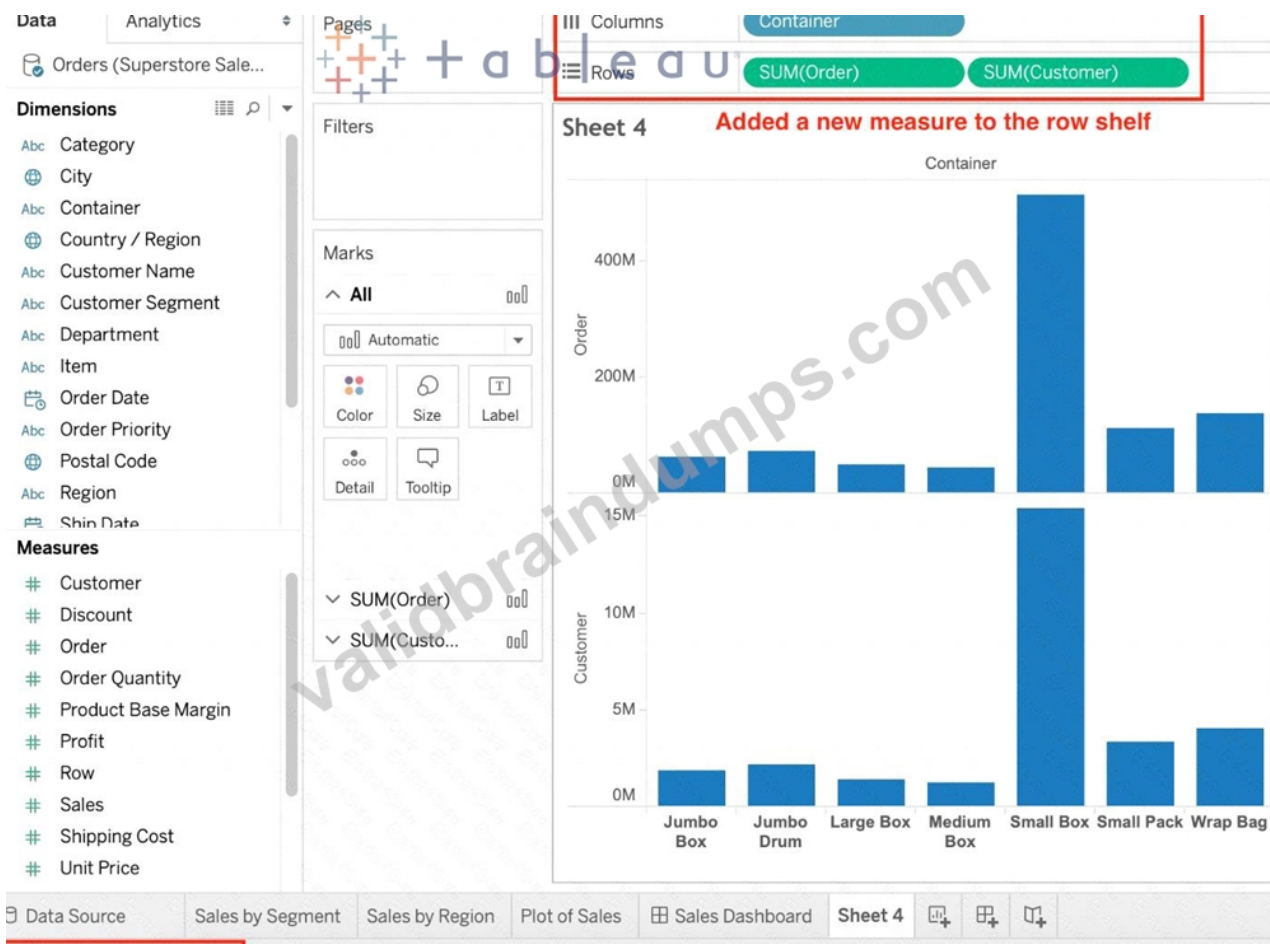

Answer: A

Explanation:
This is a tricky question often asked in the exam.
If we drag a new measure to the row shelf, the following happens:
We now have 2 rows, and the same 7 columns for both these rows. Therefore, 2x7 = 14 marks!
Graphical user interface, chart, bar chart Description automatically generated with medium confidence

But if we drag the same measure to the column shelf, we have just 1 row and a chart created for each of the columns. So (1x7) = 7 marks!

Graphical user interface, text, application Description automatically generated

NEW QUESTION # 100

Which of the following are valid ways to trigger actions for a Dashboard?

- A. Select

- B. Menu
- C. Double click
- D. Hover
- E. Click

Answer: A,B,D

Explanation:
Explanation
Whenever we want to add actions to a Dashboard, we can trigger then in the following 3 ways:
1) Select
2) Hover
3) Menu
Hover is best for highlighting, select for filtering. Menu action is added to the tooltip and user can decide whether to run that action or not (best for URL actions)

NEW QUESTION # 101
True or False: We can disaggregate the data, to see all of the marks in the view at the most detailed level of granularity

- A. True
- B. False

Answer: A

Explanation:
Whenever you add a measure to your view, an aggregation is applied to that measure by default. This default is controlled by the Aggregate Measures setting in the Analysis menu.
If you decide you want to see all of the marks in the view at the most detailed level of granularity, you can disaggregate the view. Disaggregating your data means that Tableau will display a separate mark for every data value in every row of your data source.
To disaggregate all measures in the view:
Clear the Analysis >Aggregate Measures option. If it is already selected, click Aggregate Measures once to deselect it.
NEW QUESTION # 102
Which of the following are stored in a .tds file? Choose 3.

- A. Data Connection information
- B. Metadata edits
- C. Visualizations
- D. Data Extracts
- E. Calculated Fields

Answer: A,B,E

Explanation:
If you've created a data connection that you might want to use with other workbooks or share with colleagues, you can export (save) the data source to a file. You might want to do this also if you've added joined tables, default properties, or custom fields-such as groups, sets, calculated fields, and binned fields-to the Data pane.

You can save a data source to either of the following formats:

Data Source (.tds) – contains only the information you need to connect to the data source, including the following:

- Data source type

- Connection information specified on the data source page; for example, database server address, port, location of local files, tables

- Groups, sets, calculated fields, bins

- Default field properties; for example, number formats, aggregation, and sort order

Use this format if everyone who will use the data source has access to the underlying file or database defined in the connection information. For example, the underlying data is a CSV file on your computer, and you are the only person who will use it; or the data is hosted on a cloud platform, and your colleagues all have the same access you do.

Visualisations and Data extracts are NOT saved in a .tds file!

NEW QUESTION # 103
Which of the following is an example of a Date Part?

- A. November
- B. March 2019
- C. Q4 2017
- D. September 2020

Answer: A

Explanation:
All answers except November are examples of Date Values (continuous in nature).
See below:

You can see that the option in Green symbolizes our correct answer, i.e only a Month. In our case that month is November (the correct answer).

All other options are combinations of a year with one other value (like a month, quarter, or day). So this is how by looking at an option you can know if its a date part or date value!
