2026 Nutanix NCP-BC: Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 Authoritative Valid Test Prep

With the Nutanix NCP-BC qualification certificate, you are qualified to do this professional job. Therefore, getting the test NCP-BC certification is of vital importance to our future employment. And the Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 NCP-BC Study Tool can provide a good learning platform for users who want to get the test Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 NCP-BC certification in a short time.

Nutanix NCP-BC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Troubleshoot Business Continuity & Disaster Recovery (BCDR) Failures: Covers diagnosing and resolving DR failures related to network issues, replication errors, third-party backup problems, and misconfigured DR setups.

Topic 2	<ul style="list-style-type: none"> • Interpret and Configure Business Continuity & Disaster Recovery (BCDR) Requirements: Covers planning and configuring DR solutions by evaluating RPO needs, resource limits, security settings, recovery plans, and network • storage requirements across various Nutanix environments.
Topic 3	<ul style="list-style-type: none"> • Test Business Continuity & Disaster Recovery (BCDR) Solutions: Covers validating DR readiness by executing planned and unplanned failovers, testing connectivity and throughput between sites, and verifying recovery plan accuracy.
Topic 4	<ul style="list-style-type: none"> • Perform Business Continuity & Disaster Recovery (BCDR) Tasks: Covers hands-on execution of DR operations including self-service restores, snapshot recovery, failover tasks, post-failover cleanup, and migrating from legacy protection domains to modern protection policies.

Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 Sample Questions (Q63-Q68):

NEW QUESTION # 63

Two AHV clusters are 4 ms RTT apart. The business requires:

0 RPO

Automatic failover

No application performance degradation

Hybrid HCI nodes with 100 TB capacity

What storage configuration must be validated before enabling synchronous replication?

- A. Minimum two SSDs at 10% capacity per node
- B. No SSD requirement for synchronous replication
- C. Only HDD capacity matters
- D. Minimum one SSD per node

Answer: D

NEW QUESTION # 64

An administrator incorrectly used the "Activate" functionality on the PD to test failover of VMs from production to DR cluster. The VMs were successfully restored on the DR side.

What steps are needed to clean up the VMs on the DR side and resume normal operations on the Production cluster?

- A. Deactivate PD and destroy VMs on the DR cluster.
- B. Manually delete the VMs on the DR cluster.
- C. Deactivate PD and destroy VMs on the production cluster.
- D. Use the Activate functionality on the production cluster.

Answer: A

NEW QUESTION # 65

A company's two clusters are part of the same availability zone. Prism Central, which holds the protection policy configuration and recovery plans, is located on Cluster A and protected by the Prism Central Backup and Restore mechanism.

What is the first step to take to execute a disaster recovery plan on the datacenter hosting Cluster A?

- A. Restore the Prism Central instance from Prism Element on the surviving cluster.
- B. Log into Prism Element on the surviving cluster and execute the Recovery Plan.
- C. Deploy a new Prism Central instance on the surviving cluster and register the cluster to it to access the replicated VM snapshots.
- D. Access the Prism Central web interface via its Floating IP to trigger the "Unplanned Failover" workflow for the affected VMs.

Answer: A

NEW QUESTION # 66

A security team has detected a ransomware attack that began encrypting files on the primary site at 2:00 AM. By 2:45 AM, the primary site is still accessible but workloads are compromised. The administrator needs to recover to a known-good state from before the attack.

Which statement shows the action and reasoning that the administrator should consider?

- A. Test Failover, to validate the recovery point in isolation before committing to a full failover.
- B. Planned Failover, as it guarantees zero data loss by capturing the most current state of all VMs.
- C. Planned Failover, as the primary site is still accessible and a clean final snapshot can be created before failing over.
- **D. Unplanned Failover, as it allows the administrator to select a specific recovery point in time.**

Answer: D

NEW QUESTION # 67

An administrator configures a VM-VM Anti-Affinity policy for a web application cluster to ensure high availability. The application is protected by a Protection Policy in Prism Central. A failover occurs, moving the VMs to the recovery site.

What determines whether the VM-VM Anti-Affinity rules are active on the recovery site?

- **A. The rules are inactive because Anti-Affinity policies are not supported in Prism Central-based DR.**
- B. The rules are active only if the corresponding Anti-Affinity Policy exists on the recovery site.
- C. The rules are active only if the "Enforce Anti-Affinity" checkbox is selected in the Recovery Plan.
- D. The rules are automatically active because Anti-Affinity policies are intrinsic to the VM metadata replicated by Cerebro.

Answer: A

NEW QUESTION # 68

.....

If you come to our website to choose NCP-BC study materials, you will enjoy humanized service. Firstly, we have chat windows to wipe out your doubts about our NCP-BC study materials. You can ask any question about our study materials. All of our online workers are going through special training. They are familiar with all details of our NCP-BC Study Materials. Also, you have easy access to our free demo. Once you apply for our free trials of the study materials, our system will quickly send it via email.
