SPLK-1003 exam dumps, Splunk SPLK-1003 test cost

We become successful lies on the professional expert team we possess, who engage themselves in the research and development of our SPLK-1003 learning guide for many years. So we can guarantee that our SPLK-1003 exam materials are the best reviewing material. Concentrated all our energies on the study SPLK-1003 learning guide we never change the goal of helping candidates pass the exam. Our SPLK-1003 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our SPLK-1003 exam materials, and you won't be regret.

Splunk Enterprise Certified Admin Sample Questions (Q200-Q205):

NEW QUESTION # 200
What conf file needs to be edited to set up distributed search groups?

- A. props.conf
- B. distibutedsearch.conf
- C. search.conf
- D. distsearch.conf

Answer: D

NEW QUESTION # 201
Which of the following enables compression for universal forwarders in outputs. conf ?

- A. 
- B. 

- C. 
- D. 

Answer: A

Explanation:
https://docs.splunk.com/Documentation/Splunk/latest/Admin/Outputsconf
Compression
#
This example sends compressed events to the remote indexer.
NOTE: Compression can be enabled TCP or SSL outputs only.
The receiver input port should also have compression enabled.
[tcpout]
server = splunkServer.example.com:4433
compressed = true

NEW QUESTION # 202
Which Splunk indexer operating system platform is supported when sending logs from a Windows universal forwarder?

- A. Any OS platform.
- B. Linux platform only.
- C. Windows platform only.
- D. None of the above.

Answer: D

Explanation:
Explanation/Reference:
https://docs.splunk.com/Documentation/Splunk/7.3.2/Installation/Systemrequirements#Supported_OSes

NEW QUESTION # 203
When using a directory monitor input, specific source types can be selectively overridden using which configuration file?

- A. outputs . conf
- B. trans forms . conf
- C. sourcetypes . conf
- D. props . conf

Answer: D

Explanation:
When using a directory monitor input, specific source types can be selectively overridden using the props.conf file. According to the Splunk documentation1, "You can specify a source type for data based on its input and source. Specify source type for an input. You can assign the source type for data coming from a specific input, such as /var/log/. If you use Splunk Cloud Platform, use Splunk Web to define source types. If you use Splunk Enterprise, define source types in Splunk Web or by editing the inputs.conf configuration file." However, this method is not very granular and assigns the same source type to all data from an input. To override the source type on a per-event basis, you need to use the props.conf file and the transforms.conf file2. The props.conf file contains settings that determine how the Splunk platform processes incoming data, such as how to segment events, extract fields, and assign source types2. The transforms.conf file contains settings that modify or filter event data during indexing or search time2. You can use these files to create rules that match specific patterns in the event data and assign different source types accordingly2. For example, you can create a rule that assigns a source type of apache_error to any event that contains the word "error" in the first line2.

NEW QUESTION # 204
Which setting in indexes. conf allows data retention to be controlled by time?

- A. frozenTimePeriodlnSecs
- B. moveToFrozenAfter
- C. maxDaysToKeep
- D. maxDataRetentionTime

Answer: A

Explanation:
