C_BCBAI_2502日本語版問題集 & C_BCBAI_2502ソフトウェア

PassTestはお客様の要求を満たせていい評判をうけたいします。たくさんのひとは弊社の商品を使って、試験に順調に合格しました。そして、かれたちがリピーターになりました。PassTestが提供したSAPのC_BCBAI_2502試験問題と解答が真実の試験の練習問題と解答は最高の相似性があり、一年の無料オンラインの更新のサービスがあり、100%のパス率を保証して、もし試験に合格しないと、弊社は全額で返金いたします。

SAP C_BCBAI_2502 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">Business AI Solutions Positioning: Covers how to effectively position SAP's Business AI offerings within the SAP Business Suite to support intelligent enterprise goals.
トピック 2	<ul style="list-style-type: none">Integration with SAP Ecosystem: Highlights how SAP AI integrates with solutions like SAP S/4HANA, SAP Customer Experience, and SAP BTP for end-to-end process optimization.
トピック 3	<ul style="list-style-type: none">Understanding SAP AI Value Proposition: Explains the core benefits and strategic impact of SAP's AI technologies on business efficiency and innovation.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite 認定 C_BCBAI_2502 試験問題 (Q59-Q64):

質問 # 59

Which SAP AI solution enables companies to analyze and predict employee attrition rates? Please choose the correct answer.

- A. SAP SuccessFactors AI
- B. SAP Intelligent RPA
- C. SAP Predictive Maintenance
- D. SAP Conversational AI

正解: A

解説:

SAP SuccessFactors AI is the primary solution for analyzing and predicting employee attrition rates, leveraging AI to enhance HR processes. The correct answer is SAP SuccessFactors AI, as it is specifically designed to provide predictive workforce analytics and talent management insights.

SAP documentation highlights: "AI in human resources involves using artificial intelligence to streamline and enhance HR processes such as recruitment, employee engagement, and performance management. It automates repetitive tasks, analyzes large volumes of data for better decision-making, and offers personalized experiences for employees." Within SAP SuccessFactors AI, predictive analytics are used to "predict employee attrition rates" by analyzing factors like engagement, performance, and career progression. The solution's "talent intelligence hub" enables organizations to identify at-risk employees and implement retention strategies. FC Bayern's use of SAP SuccessFactors AI illustrates how it elevates HR processes by predicting talent needs and improving employee retention.

The incorrect options are not relevant to employee attrition prediction. SAP Intelligent RPA focuses on automating repetitive tasks, not HR analytics. SAP Conversational AI handles natural language interactions, such as chatbots, not attrition analysis. SAP Predictive Maintenance is designed for equipment maintenance in manufacturing, not HR. SAP SuccessFactors AI is the clear choice based on its documented HR-specific AI capabilities.

質問 # 60

Drag and drop the elements at the bottom to the architecture layers of the SAP LeanIX meta model.

□

正解:

解説:

□

質問 # 61

(What are some characteristics of trustworthy business AI? Note: There are 3 correct answers to this question.)

- A. Responsibility
- B. Reusability
- C. Relevance
- D. Reliability
- E. Resourcefulness

正解: A、C、D

解説:

Comprehensive and Detailed Explanation From Exact Extract: Characteristics of trustworthy business AI include responsibility through ethical governance and accountability, reliability via accurate and secure operations, and relevance by grounding in business data and contexts. These ensure AI is human-centered, transparent, and beneficial for enterprise use.

Exact extracts supporting this:

"These three "R"s - relevance, reliability, responsibility - are the cornerstones of trustworthy AI for the business

world."news.sap.com Responsibility: "SAP Business AI is... responsible."learning.sap.com Reliability: "Reliable: built on best

technology and partnerships."news.sap.com Relevance: "Relevant: grounded in business data."news.sap.com Other options are incorrect because:

Option B: Resourcefulness is not a defined characteristic; focus is on the three R's.

Option C: Reusability may apply to models but is not a core trustworthiness trait; emphasis is on ethics and accuracy.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from SAP News "Trustworthy AI Can Reinvent Companies" and SAP Learning "Introducing SAP Business Artificial Intelligence," which define trustworthy AI via relevance, reliability, and responsibility, aligned with C_BCBAI_2502 certification.

質問 # 62

What is the role of SAP AI Core in Business AI solutions?

Please choose the correct answer.

Response:

- A. It is used for HR management exclusively.
- **B. It provides an infrastructure for developing and running AI models.**
- C. It is a hardware-based AI computing solution.
- D. It replaces all manual business processes.

正解: B

質問 # 63

How does SAP AI contribute to personalized marketing campaigns? Note: There are 2 correct answers to this question.

- A. Automated payroll processing
- **B. AI-driven customer segmentation**
- C. Manual campaign execution
- **D. Predictive analytics for targeted marketing**

正解: B、D

解説:

SAP AI enhances personalized marketing campaigns by leveraging data-driven insights and predictive analytics to tailor customer experiences. The correct answers are AI-driven customer segmentation and predictive analytics for targeted marketing, as these are core contributions of SAP AI to marketing.

SAP documentation states: "AI in sales and marketing helps automate and enhance tasks such as customer segmentation, lead generation, and personalized advertising. It uses data analysis to predict customer behavior, optimize campaign performance, and improve decision-making." AI-driven customer segmentation, part of SAP AI for Marketing within SAP Customer Experience, enables "sophisticated campaigns by segmenting customers based on behavior, preferences, and lifecycle stages," ensuring personalized outreach.

Predictive analytics for targeted marketing supports "predicting customer behavior" by analyzing historical data to optimize campaign targeting, as seen in SAP Sales Cloud's ability to "turn prospects into customers using instant account insights." Miele Professional's use of AI in SAP Commerce Cloud illustrates personalized marketing through tailored customer experiences.

The incorrect options-manual campaign execution and automated payroll processing-are not relevant.

Manual campaign execution contradicts SAP's automation focus, and automated payroll processing is an HR function, not marketing-related. SAP's emphasis on AI-driven marketing solutions confirms the selected contributions.
