Fortinet FCSS_SASE_AD-24 Desktop-Based Practice Program

No study materials can boost so high efficiency and passing rate like our FCSS_SASE_AD-24 exam reference when preparing the test FCSS_SASE_AD-24 certification. Our FCSS_SASE_AD-24 exam practice questions provide the most reliable exam information resources and the most authorized expert verification. Our test bank includes all the possible questions and answers which may appear in the real exam and the quintessence and summary of the exam papers in the past. We strive to use the simplest language to make the learners understand our FCSS_SASE_AD-24 Exam Reference and passed the FCSS_SASE_AD-24 exam.

Fortinet FCSS_SASE_AD-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• SIA, SSA, and SPA" This section focuses on the skills of Security Administrators in designing security profiles for content inspection and deploying SD-WAN and Zero Trust Network Access (ZTNA) using SASE. Understanding these concepts is crucial for securing access to applications and data across the network.
Topic 2	• SASE Deployment: This domain assesses the capabilities of Cloud Security Architects in deploying SASE solutions. It includes implementing various user onboarding methods, configuring administration settings, and applying security posture checks and compliance rules to ensure a secure environment.
Topic 3	• SASE Architecture and Components: This section measures the skills of Network Security Engineers and covers the architecture and components of FortiSASE. It includes integrating FortiSASE into a hybrid network, identifying its components, and constructing deployment cases to effectively implement SASE solutions.
Topic 4	• Analytics: This domain evaluates the skills of Data Analysts in utilizing analytics within FortiSASE. It involves identifying potential security threats using traffic logs, configuring dashboards and logging settings, and analyzing reports for user traffic and security issues to enhance overall security posture.

Latest FCSS_SASE_AD-24 Exam Review - 100% High Pass-Rate Questions Pool

Normally, you will come across almost all of the real test questions on your usual practice. Maybe you are doubtful about our FCSS_SASE_AD-24 training questions. We have statistics to tell you the truth. The passing rate of our products is the highest according to the investigation. Many candidates can also certify for our FCSS_SASE_AD-24 Study Materials. As long as you are willing to trust our FCSS_SASE_AD-24 preparation materials, you are bound to get the certificate.

Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q29-Q34):

NEW QUESTION # 29
How can FortiView in FortiSASE be utilized to enhance network security?
Response:

- A. By disabling non-compliant devices
- B. By displaying user activity in real-time
- C. By providing detailed insights into network traffic
- D. By broadcasting security updates

Answer: C

NEW QUESTION # 30
Which statement best describes the Digital Experience Monitor (DEM) feature on FortiSASE?

- A. It can be used to request a detailed analysis of the endpoint from the FortiGuard team.
- B. It provides end-to-end network visibility from all the FortiSASE security PoPs to a specific SaaS application.
- C. It can help IT and security teams ensure consistent security monitoring for remote users.
- D. It requires a separate DEM agent to be downloaded from the FortiSASE portal and installed on the endpoint.

Answer: B

Explanation:
TheDigital Experience Monitor (DEM)feature in FortiSASE is designed to provideend-to-end network visibilityby monitoring the performance and health of connections between FortiSASE security Points of Presence (PoPs) and specific SaaS applications. This ensures that administrators can identify and troubleshoot issues related to latency, jitter, packet loss, and other network performance metrics that could impact user experience when accessing cloud-based services.
Here's why the other options are incorrect:
* B. It can be used to request a detailed analysis of the endpoint from the FortiGuard team:This is incorrect because DEM focuses on network performance monitoring, not endpoint analysis. Endpoint analysis would typically involve tools like FortiClient or FortiEDR, not DEM.
* C. It requires a separate DEM agent to be downloaded from the FortiSASE portal and installed on the endpoint:This is incorrect because DEM operates at the network level and does not require an additional agent to be installed on endpoints.
* D. It can help IT and security teams ensure consistent security monitoring for remote users:While DEM indirectly supports security by ensuring optimal network performance, its primary purpose is to monitor and improve the digital experience rather than enforce security policies.

NEW QUESTION # 31
A customer needs to implement device posture checks for their remote endpoints while accessing the protected server. They also want the TCP traffic between the remote endpoints and the protected servers to be processed by FortiGate.
In this scenario, which three setups will achieve the above requirements? (Choose three.)

- A. Configure ZTNA tags on FortiGate.
- B. Configure ZTNA servers and ZTNA policies on FortiGate.
- C. Configure private access policies on FortiSASE with ZTNA.
- D. Sync ZTNA tags from FortiSASE to FortiGate.

- E. Configure FortiGate as a zero trust network access (ZTNA) access proxy.

Answer: A,B,E

Explanation:
To meet the requirements of implementing device posture checks for remote endpoints and ensuring that TCP traffic between the endpoints and protected servers is processed by FortiGate, the following three setups are necessary:
Configure ZTNA tags on FortiGate (Option A):
ZTNA (Zero Trust Network Access) tags are used to define access control policies based on the security posture of devices. By configuring ZTNA tags on FortiGate, administrators can enforce granular access controls, ensuring that only compliant devices can access protected resources.
Configure FortiGate as a zero trust network access (ZTNA) access proxy (Option B):
FortiGate can act as a ZTNA access proxy, which allows it to mediate and secure connections between remote endpoints and protected servers. This setup ensures that all TCP traffic passes through FortiGate, enabling inspection and enforcement of security policies.
Configure ZTNA servers and ZTNA policies on FortiGate (Option C):
To enable ZTNA functionality, administrators must define ZTNA servers (the protected resources) and create ZTNA policies on FortiGate. These policies determine how traffic is routed, inspected, and controlled based on device posture and user identity.

NEW QUESTION # 32

When configuring FortiSASE administration settings, which option is critical for ensuring compliance with data protection regulations?
Response:

- A. Setting up geographic restrictions
- B. Disabling encryption
- C. Enabling file sharing
- D. Limiting the number of user sessions

Answer: A

NEW QUESTION # 33

Which FortiOS command is used to verify the health of Zero Trust Network Access (ZTNA) policies in FortiSASE?
Response:

- A. diagnose ztna status
- B. get system ztna status
- C. diagnose debug application ztna
- D. get ztna policy-status

Answer: C

NEW QUESTION # 34
