# 1Z0-931-25 Practical Information & Practice 1Z0-931-25 Engine

P.S. Free & New 1Z0-931-25 dumps are available on Google Drive shared by PassReview: https://drive.google.com/open?id=15QnKOnL8UDd2ghSld__V50LqIVOZ0UCI

If you want to practice the 1Z0-931-25 exam questions with different eletronic devices. We believe our APP version of 1Z0-931-25 training braindump will be very convenient for you. In addition, the online version of our 1Z0-931-25 training materials can work in an offline state. If you buy our 1Z0-931-25 Study Guide, you have the chance to use our 1Z0-931-25 study materials for preparing your exam when you are in an offline state. We believe that you will like the online version of our 1Z0-931-25 exam questions.

Our 1Z0-931-25 practice dumps are so popular that all our customers are giving high praise on its high-quality to help them pass the exams. Numerous of warming feedbacks from our worthy customers give us data and confidence. We have clear data collected from customers who chose our 1Z0-931-25 training engine, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our 1Z0-931-25 exam questions!

>> 1Z0-931-25 Practical Information <<

Practice 1Z0-931-25 Engine, Test 1Z0-931-25 King

Advancement in 1Z0-931-25 information and communications technology generates huge potential for moving business and production up the value-chain, and improving the quality of life of citizens. And there is no doubt that you can get all kinds of information in cyber space now, 1Z0-931-25 Latest Torrent is not an exception. I strongly recommend the study materials compiled by our company for you, the advantages of our 1Z0-931-25 exam questions are too many to enumerate; I will just list three of them for your reference.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q86-Q91):

NEW QUESTION # 86
Which statement is NOT correct when the Autonomous Database is stopped?

- A. User with DWROLE can still access the database.
- B. CPU billing is halted.
- C. Tools are no longer able to connect to a stopped instance.
- D. In-flight transactions and queries are stopped.

Answer: A

Explanation:
When an Autonomous Database is stopped, its operational state changes significantly:
Correct Answer (C): "User with DWROLE can still access the database" is not correct. When the database is stopped, all access is disabled, including for users with roles like DWROLE (a predefined role for Data Warehouse tasks). The database is offline, and no connections or operations are possible until it is restarted.
True Statements:
A: Tools (e.g., SQL Developer, JDBC clients) cannot connect to a stopped instance because the database services are unavailable.
B: In-flight transactions and queries are terminated upon stopping, with any uncommitted changes rolled back to maintain data consistency.
D: CPU billing ceases when the database is stopped, though storage billing continues, reflecting Oracle's pay-per-use model for compute resources.
This behavior ensures resource conservation and cost control while maintaining data integrity.

NEW QUESTION # 87
Which three options do NOT change when enabling auto scaling? (Choose three.)

- A. I/O resources
- B. Parallelism settings
- C. Number of OCPUs displayed in the console
- D. Amount of storage
- E. Level of concurrency

Answer: B,D,E

Explanation:
When enabling auto scaling in an Oracle Autonomous Database, the feature dynamically adjusts resources based on workload demand, but certain configuration elements remain unchanged unless manually altered.
Amount of storage (A): Auto scaling focuses on adjusting CPU and I/O resources to meet performance needs. The storage allocation remains constant because it is a separately provisioned resource that requires manual adjustment via the OCI Console or API. This ensures that storage capacity is not inadvertently reduced or expanded without explicit user intent.
Parallelism settings (B): These settings determine how many parallel processes are used for query execution. Auto scaling does not modify this pre-defined configuration; it adjusts resource usage (e.g., CPU cores) without altering the parallelism framework established for the database.
Level of concurrency (E): Concurrency refers to the maximum number of simultaneous user sessions. While auto scaling can indirectly influence concurrency by adjusting available resources, the concurrency limit itself is a fixed setting that remains unchanged unless explicitly modified by the administrator.
Incorrect Options:
I/O resources (C): Auto scaling directly impacts I/O resources by increasing or decreasing them alongside CPU adjustments to handle workload fluctuations.
Number of OCPUs displayed in the console (D): While the base OCPU count remains static, the effective number of OCPUs in use (up to three times the base) changes dynamically with auto scaling, and this is reflected in the console, making this option subject to change.
This behavior ensures that auto scaling optimizes performance without disrupting foundational database configurations.

NEW QUESTION # 88
You created an Autonomous Database without auto scaling. Which two ways can you enable auto scaling? (Choose two.)

- A. Shut down the instance, click Scale Up/Down and select the Auto Scaling checkbox, then restart the instance.
- B. Click Scale Up/Down and select the Auto Scaling checkbox.
- C. Use a REST call to shut down the instance, then a second REST call to enable Auto Scaling, and a REST call to restart the instance.
- D. Use a REST call to enable Auto Scaling.

Answer: B,D

Explanation:
Enabling auto scaling on an existing Autonomous Database can be done without unnecessary complexity:

Correct Answer (A): "Click Scale Up/Down and select the Auto Scaling checkbox" is the simplest GUI method. In the OCI Console, navigate to the database, select "Scale Up/Down," and enable the auto scaling option, allowing up to 3x the base OCPUs dynamically.

Correct Answer (C): "Use a REST call to enable Auto Scaling" leverages the OCI REST API to update the database configuration with the isAutoScalingEnabled parameter set to true. This is ideal for programmatic control.

Incorrect Options:

B: Shutting down the instance is unnecessary; auto scaling can be enabled while the database is running.

D: Multiple REST calls, including shutdown and restart, overcomplicate the process when a single API call suffices.

These methods ensure minimal disruption and efficient resource management.

NEW QUESTION # 89

How many Network Security Groups (NSGs) can you configure for an Autonomous Database?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

Network Security Groups (NSGs) in OCI control network traffic to Autonomous Database instances:

Correct Answer (D): You can configure up to 5 NSGs for an Autonomous Database. This limit allows sufficient flexibility to define multiple security rules while maintaining manageability. NSGs can be assigned during provisioning or updated later via the OCI Console or API, restricting access to specific IP ranges or VCNs.

Incorrect Options:

A, B, C: The values 3, 9, and 7 are not documented limits for NSGs in Autonomous Database; the official limit is 5.

This capability supports secure network configurations tailored to organizational needs.

NEW QUESTION # 90

As a database architect, you are tasked with configuring a high concurrency, production OLTP (EXAM) application to connect to an Autonomous Transaction Processing database with a requirement to have some reporting queries run in parallel mode. Which connection service is appropriate for such a workload?

- A. HIGH
- B. TPURGENT
- C. TP
- D. MEDIUM

Answer: A

Explanation:

Autonomous Transaction Processing (ATP) provides predefined connection services to optimize different workload types. For a high-concurrency OLTP application with parallel reporting queries, the appropriate service is:

HIGH (C): The HIGH connection service in ATP is designed for workloads requiring high concurrency and throughput, making it ideal for a production OLTP application like "EXAM" that handles many simultaneous transactions (e.g., user requests). Additionally, HIGH supports parallel query execution, which is critical for running reporting queries efficiently during off-peak times. It allocates more resources (e.g., OCPUs and I/O) compared to other services, ensuring performance for both transactional and analytical tasks. For example, the OLTP app might use HIGH to process thousands of concurrent user requests, while a nightly report leverages parallel processing to aggregate data quickly. In the wallet's tnsnames.ora, the HIGH service might look like exam_high = (DESCRIPTION=...), offering the best balance for this mixed workload.

The incorrect options are:

TPURGENT (A): The TPURGENT service prioritizes low-latency, time-critical transactions (e.g., sub-second response times for single-user actions). It's optimized for latency-sensitive operations, not high concurrency or parallel reporting, and would underperform for the broader OLTP and reporting needs here. For instance, it's better suited for a single critical transaction than a multi-user system.

TP (B): The TP (Transaction Processing) service is a general-purpose option for OLTP workloads, offering moderate concurrency and latency. However, it's not optimized for high concurrency or parallel query execution, making it less suitable for a production app with reporting demands. It's a middle ground, not a top-tier performer like HIGH.

MEDIUM (D): The MEDIUM service balances performance and resource usage for moderate workloads. It supports some concurrency but lacks the resource allocation and parallel execution capabilities of HIGH, making it inadequate for a high-concurrency OLTP system with reporting requirements.

The HIGH service's ability to handle both high transactional volume and parallel reporting aligns perfectly with the scenario's strict performance needs, all within ATP's zero-maintenance framework.

NEW QUESTION # 91
......

If you have your own job and have little time to prepare for the exam, you can choose us. 1Z0-931-25 exam bootcamp of us is high quality, and you just need to spend about 48to 72 hours, you can pass the exam. In addition, 1Z0-931-25 exam bootcamp contains most of knowledge points of the exam, and you can also improve you professional ability in the process of learning. We offer you free update for 365 days after you buy 1Z0-931-25 Exam Dumps. The update version will be sent to your email automatically.

Practice 1Z0-931-25 Engine: https://www.passreview.com/1Z0-931-25_exam-braindumps.html

The high quality product like our 1Z0-931-25 study quiz has no need to advertise everywhere, and exerts influential effects which are obvious and everlasting during your preparation, Start Learning Actual Oracle 1Z0-931-25 Exam Questions for Best Results, You don't have to face any problems when you are using our Oracle Practice 1Z0-931-25 Engine pdf questions and you will be able to get the desired outcome, If you want to pass exam and get the related certification in the shortest time, the 1Z0-931-25 1Z0-931-25 study materials from our company will be your best choice.

Successful Affiliate Marketing for MerchantsSuccessful 1Z0-931-25 Affiliate Marketing for Merchants, The underlying services that take care of security, persistence, and dissemination Test 1Z0-931-25 King of data are explored so that you'll understand what services Groove provides.

Fantastic 1Z0-931-25 Practical Information Provide Prefect Assistance in 1Z0-931-25 Preparation

The high quality product like our 1Z0-931-25 study quiz has no need to advertise everywhere, and exerts influential effects which are obvious and everlasting during your preparation.

Start Learning Actual Oracle 1Z0-931-25 Exam Questions for Best Results, You don't have to face any problems when you are using our Oracle pdf questions and you will be able to get the desired outcome.

If you want to pass exam and get the related certification in the shortest time, the 1Z0-931-25 1Z0-931-25 study materials from our company will be your best choice.
