

Hot CWAP-404 New Study Notes | Latest CWAP-404: Certified Wireless Analysis Professional 100% Pass

What's more, part of that PDFDumps CWAP-404 dumps now are free: <https://drive.google.com/open?id=1P-UQnrvpY50roN2X5PhskyW68J2iEsIT>

We have to admit that the processional certificates are very important for many people to show their capacity in the highly competitive environment. If you have the CWNP certification, it will be very easy for you to get a promotion. If you hope to get a job with opportunity of promotion, it will be the best choice chance for you to choose the CWAP-404 Study Materials from our company. Because our study materials have the enough ability to help you improve yourself and make you more excellent than other people.

CWNP CWAP-404 Exam Certification Details:

Exam Registration	PEARSON VUE
Recommended Training	CWAP self-paced training kit, Training Class
Exam Name	Wireless Analysis Professional
Sample Questions	CWNP CWAP-404 Sample Questions

CWNP CWAP-404 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Frame Exchanges: The topic evaluates the skills of a wireless network professional in capturing, understanding, and analyzing various frame exchanges, including BSS discovery, joining, roaming, and data frames. The CWAP-404 exam targets the ability of candidates to troubleshoot and resolve issues related to MAC layer operations, ensuring they can maintain robust and efficient WLAN communications.
Topic 2	<ul style="list-style-type: none"> • PHY Layers and Technologies: In the topic, the CWAP-404 exam tests the understanding of a wireless network professional about the Physical (PHY) layer functions and technologies. Wireless analysts need to describe and apply knowledge of PHY headers, PPDU's, and other PHY-related data. This topic ensures that analysts are proficient in interpreting PHY information within protocol analyzers and can select appropriate capture devices for different PHY types.
Topic 3	<ul style="list-style-type: none"> • Protocol Analysis: The topic in the CWNP CWAP-404 Exam evaluates the skill of a wireless network professional to capture and analyze 802.11 frames effectively. Candidates must demonstrate proficiency in configuring protocol analysis tools, interpreting frame captures to diagnose issues, and applying appropriate troubleshooting methods.
Topic 4	<ul style="list-style-type: none"> • MAC Sublayer and Functions: The topic measures the ability of a wireless network professional to understand and analyze the MAC layer operations. Candidates are expected to validate BSS configurations and identify issues like CRC errors and retransmissions, ensuring they can maintain the integrity and performance of the WLAN.
Topic 5	<ul style="list-style-type: none"> • Spectrum Analysis: The topic assesses the ability of a wireless network professional to capture and interpret RF spectrum data. The exam targets the skills in identifying device signatures and RF issues through spectrum analyzers.

Valid CWNP CWAP-404 Practice Materials & CWAP-404 Passguide

If you are still study hard to prepare the CWNP CWAP-404 Exam, you're wrong. Of course, with studying hard, you can pass the exam. But may not be able to achieve the desired effect. Now this is the age of the Internet, there are a lot of shortcut to success. PDFDumps's CWNP CWAP-404 exam training materials is a good training materials. It is targeted, and guarantee that you can pass the exam. This training material is not only have reasonable price, and will save you a lot of time. You can use the rest of your time to do more things. So that you can achieve a multiplier effect.

CWNP Certified Wireless Analysis Professional Sample Questions (Q96-Q101):

NEW QUESTION # 96

Which one of the statements regarding the Frame Control field in an 802.11 MAC header is true?

- A. The Frame Control field is used to communicate the duration value
- **B. The Frame Control field contains subfields, and some 1-bit flags**
- C. Only Control frames have a Frame Control field
- D. The Frame Control field is always set to 0

Answer: B

Explanation:

Explanation

The statement that the Frame Control field contains subfields, and some 1-bit flags is true. The Frame Control field is a 2-byte field in the MAC header that contains information about the type, subtype, and characteristics of a frame. The Frame Control field is divided into several subfields, each with a specific function and length.

Some of these subfields are 1-bit flags, which can be set to 0 or 1 to indicate a certain condition or status. For example, the To DS and From DS subfields are 1-bit flags that indicate whether a frame is destined for or originated from the DS (Distribution System). The other statements are not true, as they do not describe the Frame Control field correctly. All types of frames (management, control, and data) have a Frame Control field, not just control frames. The Frame Control field is not used to communicate the

duration value, which is a separate field in the MAC header. The Frame Control field is not always set to 0, as it varies depending on the type, subtype, and characteristics of each frame. References: [Wireless Analysis Professional Study Guide CWAP-404], Chapter 5: 802.11 MAC Sublayer, page 113-114

NEW QUESTION # 97

Given: There are many differences between analyzing wireless and wired networks. In a wireless network, there is no guarantee that one station can hear another station's transmissions.

If no corrective actions are taken nor corrective mechanisms implemented when a "hidden node" problem exists, which measurable statistics parameter will likely increase in a wireless protocol analyzer?

- A. Contention Window
- B. Authentication Failure
- C. Retransmission Count
- D. ACK Timeout
- E. Duration value
- F. BlockAck Reset

Answer: C

NEW QUESTION # 98

In a Spectrum Analyzer the Swept Spectrogram plot displays what information?

- A. The RF time domain
- B. Wi-Fi Device information
- C. Reductions in frame transmissions
- D. RF power present at a particular frequency over the course of time

Answer: D

Explanation:

Explanation

The Swept Spectrogram plot is a spectrum analysis plot that shows the RF power present at a particular frequency over the course of time. It can help identify trends and patterns in the RF spectrum over a longer period of time. It can also show how the RF environment changes over time and how different sources of RF signals affect each other. The other options are not correct, as they describe different types of plots or information that are not related to the Swept Spectrogram plot. References: [Wireless Analysis Professional Study Guide], Chapter 3: Spectrum Analysis, page 72-73

NEW QUESTION # 99

You are using a Wireless Aggregator utility to combine multiple packet captures.

One capture exists for each of channels 1, 6 and 11.

What kind of troubleshooting are you likely performing with such a tool?

- A. Fast secure roaming problems.
- B. Wireless adapter failure analysis.
- C. Narrowband DoS attack detection.
- D. Interference source location.

Answer: D

NEW QUESTION # 100

In the frame decode shown, there are two sets of supported data rates. 1, 2, 5.5, and 11 Mbps are all shown as "basic" data rates, and 6, 9, 12, 18, 24, 36, 48, and 54 Mbps are shown simply as supported data rates.

No	M	Time	Delta	Length	SS	Source	Destination	BSSID	Summary

What is true of "basic" data rates in this context?

- A. Basic rates are optional data rates for the BSS, often used for assuring connectivity for legacy stations.
- B. Basic rates are only used for multicast traffic, and do not affect unicast traffic.
- **C. The AP requires all client stations to support Basic rates in order to associate to its BSS.**
- D. Basic rates are defined in an AP's service set to specify mandatory data rates for all retry frames.
- E. The highest data rate set to Basic is automatically used to send broadcast traffic such as Beacon frames.

Answer: C
