1z0-1080-25 Valid Learning Materials & 1z0-1080-25 Reliable Learning Materials

If you want to buy our 1z0-1080-25 training engine, you must ensure that you have credit card. We do not support deposit card and debit card to pay for the 1z0-1080-25 exam questions. Also, the system will deduct the relevant money. If you find that you need to pay extra money for the 1z0-1080-25 Study Materials, please check whether you choose extra products or there is intellectual property tax. All in all, you will receive our 1z0-1080-25 learning guide via email in a few minutes.

Our accurate, reliable, and top-ranked Oracle 1z0-1080-25 exam questions will help you qualify for your Oracle 1z0-1080-25 certification on the first try. Do not hesitate and check out ExamcollectionPass excellent Oracle 1z0-1080-25 Practice Exam to stand out from the rest of the others.

Latest Released Oracle 1z0-1080-25 Valid Learning Materials - 1z0-1080-25 Oracle Planning 2025 Implementation Professional

The Oracle 1z0-1080-25 practice exam software of ExamcollectionPass has questions that have a striking resemblance to the queries of the Oracle Planning 2025 Implementation Professional (1z0-1080-25) real questions. It has a user-friendly interface. You don't require an active internet connection to run it once the 1z0-1080-25 Practice Test software is installed on Windows computers and laptops.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 2	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 3	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 4	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.

Topic 5	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 6	• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 7	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 8	• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 9	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 10	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 11	• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 12	• Design business rules and rulesets":his section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 13	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 14	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 15	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 16	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 17	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 18	• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 19	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 20	• Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 21	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 22	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 23	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.

Topic 24	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 25	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 26	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 27	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.

Oracle Planning 2025 Implementation Professional Sample Questions (Q71-Q76):

NEW QUESTION # 71
You want to copy data between two Planning instances. Which three tasks must you complete so you can copy the data?

- A. Define an EPM Connection to the target instance.
- B. Associate the data map with a form.
- C. Define a data map with Remote Cube as the target.
- D. Define an EPM Connection to the source instance.
- E. Enable cross-POD mapping on the Smart Push card.

Answer: A,B,C

NEW QUESTION # 72
Which module should you enable first to track the utilization of employees in Projects?

- A. Projects module before Workforce module
- B. Financials module before Projects module
- C. Projects module before Financials module
- D. Workforce module before Projects module

Answer: D

Explanation:
To track the utilization of employees in the Projects module of Oracle Planning 2024, the Workforce module must be enabled first. Employee utilization in Projects refers to tracking how employees' time and costs (e.g., hours worked, labor expenses) are allocated to specific projects. The Workforce module provides the foundational data-such as employee details, roles, salaries, and hours-required to calculate utilization metrics. Once Workforce is enabled and configured with employee data, the Projects module can leverage this data via integration to track utilization against project tasks and budgets.
* A. Projects module before Financials module: Incorrect. Enabling Projects before Financials does not address employee utilization tracking, as Financials focuses on revenue and expense planning, not employee-specific data.
* B. Financials module before Projects module: Incorrect. Financials provides financial planning capabilities but does not manage employee data or utilization, which is a Workforce function.
* C. Workforce module before Projects module: Correct. Workforce must be enabled first to define employee data, which Projects then uses to track utilization through integration (e.g., via data maps or direct links).
* D. Projects module before Workforce module: Incorrect. Enabling Projects first without Workforce would limit utilization tracking, as Projects relies on Workforce for employee-related data.
The Oracle documentation specifies that Workforce is a prerequisite for detailed employee utilization tracking in Projects, making C the correct sequence.

Oracle Planning 2024 Implementation Study Guide: "Integrating Workforce with Projects" (docs.oracle.com, Published 2024-09-20).
Oracle EPM Cloud Documentation: "Tracking Utilization in Projects" (docs.oracle.com, Published 2023-12-15, updated for 2024).

NEW QUESTION # 73

You want to Input data into Financials. For Financials, there is a predefined navigation flow with cards listed for both Revenue and Expenses. What is the sequence of the cards for Revenue and Expenses?

- A. Assumptions, Allocations, Detailed Bottom Up, Strategic Top-Down, Direct Input, Overview, Summary
- B. Overview, Assumptions, Allocations, Detailed Bottom-Up, Driver and/or Trend based. Direct Input
- C. Overview, Driver and Trend Based, Rolling Forecast, Direct Entry, Income Statement
- D. Assumptions, Direct Input, Driver and/or Trend Based, High Level Overview, Detailed Overview, Summary

Answer: C

Explanation:

In Oracle Planning 2024, Financials provides a predefined navigation flow for entering data, organized into cards that guide users through the planning process for Revenue and Expenses. The navigation flow is designed to streamline data input and analysis, starting with high-level views and moving into detailed entry methods. According to the Oracle documentation, the default sequence of cards for Revenue and Expenses in Financials is: Overview, followed by Driver and Trend Based, Rolling Forecast, Direct Entry, and concluding with Income Statement.
* Overview: Provides a high-level summary of financial data, setting the context for planning.
* Driver and Trend Based: Allows users to input data based on drivers (e.g., units sold) or trends (e.g., historical patterns), a key method for revenue and expense planning.
* Rolling Forecast: Enables continuous forecasting over a defined period, integrating with driver-based inputs.
* Direct Entry: Permits manual data input for specific accounts or line items, offering flexibility.
* Income Statement: Consolidates all inputs into a financial statement view for review.
Option A accurately reflects this sequence as outlined in the Oracle Planning 2024 predefined navigation flow for Financials. Option B includes irrelevant cards like "Allocations" and "Strategic Top-Down," which are not part of the default Financials Revenue and Expenses flow. Option C introduces "High Level Overview" and
"Detailed Overview," which are not standard card names in this context. Option D includes "Allocations" and
"Detailed Bottom-Up," which are more aligned with custom flows or other modules, not the default Financials sequence.
This sequence is part of the out-of-the-box Financials navigation flow, ensuring users follow a logical progression from overview to detailed input and final reporting.

NEW QUESTION # 74

With Machine Learning, which type of prediction would you define to predict revenue using several input variables such as price, promotions, industry market size, and climate?

- A. Source Prediction
- B. Dimension Prediction
- C. Forecast Prediction
- D. Multivariate Prediction

Answer: D

Explanation:

In Oracle Planning 2024's Machine Learning capabilities, particularly with the "Bring Your Own ML" feature, predictions can be defined based on the type of analysis required. To predict revenue using multiple input variables such as price, promotions, industry market size, and climate, the appropriate prediction type is:
* A. Dimension Prediction: Incorrect. This type is not a standard term in Oracle's ML framework for Planning; it suggests predicting across dimensions, which isn't specific to multi-variable revenue prediction.
* B. Source Prediction: Incorrect. This is not a defined prediction type in Oracle Planning's ML documentation; it might imply source data analysis, but it's not applicable here.
* C. Forecast Prediction: Incorrect. While forecasting involves predicting future values, "Forecast Prediction" is not a specific ML type in Oracle, and it doesn't emphasize the use of multiple variables.
* D. Multivariate Prediction: Correct. Multivariate prediction involves using multiple input variables (e.
g., price, promotions, market size, climate) to predict an outcome (e.g., revenue). Oracle's ML integration supports importing

PMML models that handle multivariate analysis, aligning with this scenario.
The Oracle documentation confirms that Multivariate Prediction is the type suited for complex predictions with several input variables, making D the correct answer.

NEW QUESTION # 75

Which two operations can be performed on the Default navigation flow?

- A. Rename
- B. Delete
- C. Copy
- D. Deactivate

Answer: C,D

NEW QUESTION # 76

......

Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the 1z0-1080-25 test certification can make them become that kind of people and if you are one of them buying our 1z0-1080-25 study materials will help you pass the 1z0-1080-25 test smoothly with few efforts needed.
