Salesforce Consumer Goods Cloud Accredited Professional Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which option can be performed by using salesforce Maps with Consumer Goods Cloud?

- **A. Create layers of Retail Stores**
- B. View map images on mobile devices even when GPS is not enabled
- C. Optimize visit sequence in real time automatically during a Field Rep's Day
- D. Update with Google Maps Static API on a single address

Answer: A

Explanation:

Salesforce Maps integrated with Consumer Goods Cloud allows the creation of layers of Retail Stores, aiding in geographical and spatial analysis for field operations.

NEW QUESTION # 42

Which permission set allows end-users to leverage the Einstein Visit Recommendation feature in Consumer Goods Cloud?

- **A. Tableau CRM Plus User**
- B. Lightning Direct Store Delivery
- C. Retail Execution Lightning Plus
- D. Action Plans
- E. Tableau CRM Plus Admin

Answer: A

Explanation:

The Retail Execution Lightning Plus permission set enables end-users to access and leverage the Einstein Visit Recommendation feature in Consumer Goods Cloud, enhancing visit planning and optimization.

NEW QUESTION # 43

Universal Containers (UC) has asked a consultant to migrate all active customers before the go-live. Which two options must the consultant consider for loading customer-related records?

- **A. Business or Consumer Accounts should be loaded before Billing or Service Accounts.**
- B. Contracts should be loaded before Accounts.
- **C. Premises should be loaded before Service Accounts.**
- D. Subscriptions should be loaded before Accounts.

Answer: A,C

Explanation:

For customer migration into Communications Cloud, Salesforce public documentation outlines a specific parent-child dependency order for customer-related data. The objective is to ensure that all parent records exist before loading child or dependent records (Billing Accounts, Service Accounts, Subscriptions, Assets).

(B) Business or Consumer Accounts should be loaded before Billing or Service Accounts Accounts represent the parent customer entity. Billing Accounts and Service Accounts depend on the root customer account. Salesforce clearly emphasizes that Billing Accounts must have a parent Account, and Service Accounts must be tied to either the Billing Account or Consumer/Business Account. Therefore, loading Accounts before Billing/Service Accounts is mandatory.

(C) Premises should be loaded before Service Accounts

In Communications Cloud, Premises represent physical service locations. Service Accounts reference the PremiseId and cannot be created before the premise record exists. This dependency is frequently highlighted in Salesforce migration patterns, especially for broadband, fiber, and fixed-line providers.

Incorrect options:

A (Contracts before Accounts): Contracts depend on Accounts; Accounts must exist first.

D (Subscriptions before Accounts): Subscriptions require Accounts, Billing Accounts, and Service Accounts-therefore cannot be loaded first.

NEW QUESTION # 44

A developer has modified the EPC price amount of one mobile device using the Product Designer from Communications Cloud.

After the price has been changed, the developer wants to check the previous EPC price amount to track pricing metrics and get some forecast metrics.

How can the developer check the previous price amount on the mobile device?

- A. Creating a new custom field on Price List Entry and populating it with a trigger that was created before changing the price
- B. Using EPC project feature checking the changes done for the defaulted project after having enabled the feature
- **C. Using Price List Entry History checking the changes done after having enabled Track Field History on Price List Entry object**
- D. Using the versioning feature and comparing the prices for the versioned product after having enabled the feature

Answer: C

Explanation:

To track pricing changes, Salesforce recommends enabling Field History Tracking on Price List Entry, which logs:

Old price

New price

User

Time of change

This is the simplest way to review previous pricing.

Why others are wrong:

A requires custom triggers-not recommended.

C EPC Project history tracks metadata changes, not price list values.

D Versioning is for product specifications, not PLE prices.

NEW QUESTION # 45

Which two permissions should be enabled for users to view the Tableau CRM for Consumer Goods Cloud app?

- **A. Tableau CRM Plus User**
- B. Tableau CRM Modify All
- C. Tableau CRM Growth
- **D. CG Analytics User**
- E. Tableau CRM View

Answer: A,D
