JN0-253 Latest Braindumps - New JN0-253 Dumps Sheet
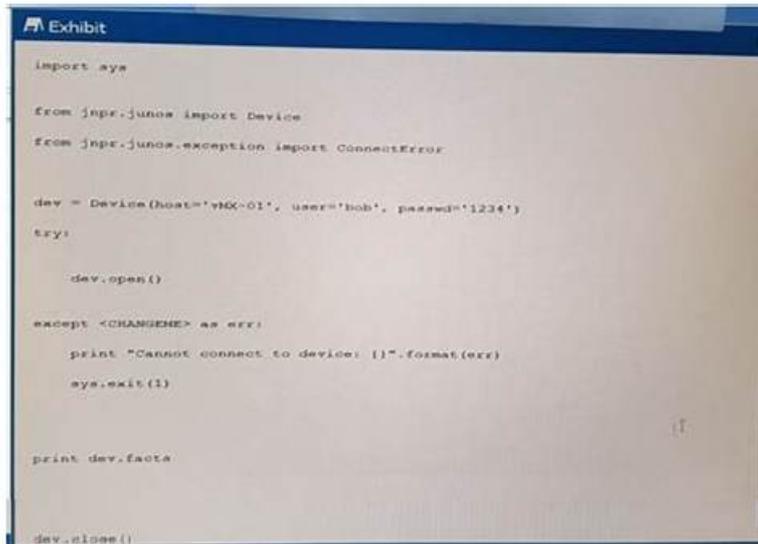

P.S. Free & New JN0-253 dumps are available on Google Drive shared by Pass4training: https://drive.google.com/open?id=1Vgdlkz_tKzxFYnCXeAzxj1nZUcVflIh3

Before the clients purchase our JN0-253 study materials, they can have a free trial freely. The clients can log in our company's website and visit the pages of our products. The pages of our products lists many important information about our JN0-253 study materials and they include the price, version and updated time of our products, the exam name and code, the total amount of the questions and answers, the merits of our JN0-253 Study Materials and the discounts. You can have a comprehensive understanding of our JN0-253 study materials after you see this information. Then you can look at the free demos and try to answer them to see the value of our JN0-253 study materials and finally decide to buy them or not.

Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	• Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.
Topic 2	• Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.
Topic 3	• Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.
Topic 4	• Juniper Mist Configuration Basics: This domain addresses initial setup including user accounts, device onboarding, organizational structures, subscription licensing, certificate management, and automated provisioning with labels and policies.

Pass Guaranteed Quiz Juniper - Reliable JN0-253 - Mist AI, Associate (JNCIA-MistAI) Latest Braindumps

We would like to make it clear that learning knowledge and striving for certificates of JN0-253 exam is a self-improvement process, and you will realize yourself rather than offering benefits for anyone. So our JN0-253 training guide is once a lifetime opportunity you

cannot miss. With all advantageous features introduced on the website, you can get the first expression that our JN0-253 Practice Questions are the best.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q16-Q21):

NEW QUESTION # 16
Which three categories of alert types are available in Juniper Mist? (Choose three.)

- A. Users
- B. Marvis
- C. Site
- D. Infrastructure
- E. Security

Answer: B,D,E

Explanation:
Alerts represent network and device issues that are ongoing. Juniper Mist™ categorizes them as follows:
* Infrastructure Alerts-Repeated events involving servers and protocols that can potentially affect a large number of clients. For example, an event during which a Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), or RADIUS server is unreachable can affect many clients.
Similarly, if a power supply on a switch is in alarm state, a large number of clients and a large amount of traffic could be affected.
* Marvis Alerts-Repeated events that Marvis tracks on the Marvis Actions dashboard. For example, if an access point (AP) regularly fails health checks, you'll see a Marvis alert for it.
* Security Alerts-Repeated events that could dramatically affect network security. For example, these alerts appear if a rogue AP is detected and clients start connecting to it.
* Certificate Alerts-Notification for expired, and soon-to-expire, user-added digital certificates. These include RadSec (configured at Organization > Settings > RadSec Certificates and AP RadSec certificate), SSO (configured at Organization > Settings > Single Sign-On), and PSK Portal IDP certificates (configured at Organization > Client Onboarding). Certificate alerts appear on the Alerts page and begin 30 days before the certificate's expiry date, then the notification repeats 15, 7, 3, and 1 day before expiration unless the certificate is renewed. .

NEW QUESTION # 17
Where do reminders about subscription expiration appear in the Juniper Mist portal?

- A. In Marvis Actions
- B. In the device's insights section
- C. In the dashboard alerts
- D. In a banner message at the top of the Juniper Mist portal

Answer: D

Explanation:
Juniper Mist Cloud provides visual and automated notifications to alert administrators about subscription status and expiration for services such as Wireless Assurance, Wired Assurance, WAN Assurance, Premium Analytics, and Marvis AI.
According to the Juniper Mist Cloud Administration and Licensing Guide, the system:
"Displays subscription and license expiration warnings in a banner across the top of the Mist portal interface when licenses are within their renewal window." This banner typically appears in yellow or red, depending on urgency, and includes direct links to the Subscriptions page for renewal actions.
While subscription status information can also be viewed manually under Organization # Subscriptions, the real-time reminders and notifications appear as banner messages at the top of the Mist Portal.
Options B, C, and D are incorrect because:
* Dashboard alerts focus on network events, not licensing.
* Marvis Actions highlights operational or performance issues.
* Device insights report performance metrics, not subscription data.
Therefore, the correct answer is A. In a banner message at the top of the Juniper Mist portal.

NEW QUESTION # 18

When browsing the Marvis Actions page, you notice that something has triggered the "AP Offline" Marvis Action. You click on that action.

What information will you see displayed? (Choose two.)

- A. Marvis Action status
- B. recommended action
- C. resolved action
- D. Mist support ticket status

Answer: A,B

Explanation:
When browsing the Marvis Actions page and you click on the "AP Online" Marvis Action, you will see:
Marvis Action Status: This indicates the current state of the action, whether it is in progress, resolved, or another status.
Recommended Action: Marvis will provide a suggested course of action to resolve the issue. This could include steps like configuration changes or other remedial actions.

NEW QUESTION # 19

What are two ways that Juniper Mist Wireless Assurance enhances troubleshooting capabilities? (Choose two.)

- A. by employing dynamic packet capture
- B. by alerting administrators of subscription options through e-mail
- C. by using Predictive Analytics and Correlation Engine (PACE)
- D. by monitoring congestion uplink as a percentage of gateway bandwidth

Answer: A,C

Explanation:
Juniper Mist Wireless Assurance revolutionizes network troubleshooting by implementing Predictive Analytics and Correlation Engine (PACE) and dynamic packet capture. According to the official Mist documentation, PACE applies advanced data science and machine learning to analyze real network events and classify them for root-cause identification. The Mist PACE engine proactively identifies issues by correlating over 150 client and AP state changes, enabling the system to surface recommendations and automate root- cause resolution. This allows IT teams to move beyond reactive troubleshooting towards predictive and automated network operations, reducing time-to-resolution and minimizing user impact.
Additionally, dynamic packet capture significantly streamlines troubleshooting efforts. Mist Wireless Assurance automatically detects anomalies or failures in user and network behavior and instantly initiates a packet capture. These packet captures are contextually tagged to the affected event, stored in the cloud, and are readily accessible for analysis. This process eliminates the need for on-site technicians with sniffers, as now every major incident already has an associated packet capture, captured at the right moment. This capability greatly reduces troubleshooting time and ensures that issues can be reproduced and isolated accurately.

NEW QUESTION # 20

How are Mist Alerts sent?

- A. using Slack
- B. using a text message
- C. using e-mail
- D. using Skype

Answer: C

NEW QUESTION # 21

......

The website pages list the important information about our JN0-253 real quiz, the exam name and code, the total quantity of the questions and answers, the characteristics and merits of the product, the price, the details and the guarantee of our JN0-253 Training Materials, the contact methods, the evaluations of the client on our product and the related exams. You can analyze the information the website pages provide carefully before you decide to buy our JN0-253 exam questions.
