#### NEW QUESTION # 90

A Storage Administrator is adding an appliance into an existing Dell PowerStore T cluster.

What is different about the management network configuration for the new appliance compared to configuring an initial appliance for the cluster?

- A. All the needed management IP addresses for the new appliance are auto-generated by the cluster
- B. Additional appliance inherits all its management IPs from the existing appliance
- C. All the needed management IP addresses for the new appliance must be pre-configured on the cluster
- D. Additional appliance does not require a cluster management IP address

**Answer: C**

Explanation:

Each appliance must have Management and Storage networks configured. Management networks connect the cluster to management services such as DNS, NTP, and vCenter. The management network also enables external clients to access the cluster. The Storage network connects the cluster to an existing storage network or establishes a new network within the cluster. It also enables external clients to access the storage in the cluster. Both the Management and Storage networks require at least three IP addresses
