P.S. Free & New C\_CPI\_2506 dumps are available on Google Drive shared by TestPDF: [https://drive.google.com/open?id=1nb3ZPxvUtC36RM\\_fmG7J0YDs0XHfJ1](https://drive.google.com/open?id=1nb3ZPxvUtC36RM_fmG7J0YDs0XHfJ1)

C\_CPI\_2506 certifications are one of the most popular certifications currently. Earning C\_CPI\_2506 certification credentials is easy, in first attempt, with the help of products. TestPDF is well-reputed brand among the professional. That provides the best preparation materials for C\_CPI\_2506 Certification exams. TestPDF has a team of C\_CPI\_2506 subject experts to develop the best products for C\_CPI\_2506 certification exam preparation.

### SAP C\_CPI\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.</li> </ul>

## C\_CPI\_2506 Upgrade Dumps & C\_CPI\_2506 Reliable Exam Price

latest SAP Certified Associate - Integration Developer C\_CPI\_2506 exam sample questions and exam material help you pass SAP Certified Associate - Integration Developer exam easily. SAP provides latest SAP Certified Associate - Integration Developer C\_CPI\_2506 test. You can download free practice exams to learning and practice. SAP Certified Associate - Integration Developer C\_CPI\_2506 Exam is true and effective. The SAP Certified Associate - Integration Developer price is benefit. reliable C\_CPI\_2506 test camp materials make you success in your career.

## SAP Certified Associate - Integration Developer Sample Questions (Q43-Q48):

### NEW QUESTION # 43

What authentication method does the Service Key use to grant access when you generate a Service Key for an SAP Integration Suite Event Mesh message client?

- A. API Key authentication
- B. Basic Authentication
- C. auth 2.0 client authentication
- D. 509 client certificates

**Answer: C**

Explanation:

When generating a Service Key for an SAP Integration Suite Event Mesh message client, the credentials contain details required for authentication and connection.

Event Mesh uses OAuth 2.0 client credential flow for secure access.

The Service Key includes:

Client ID

Client Secret

OAuth Token URL

These values are used by applications to authenticate and obtain tokens before accessing Event Mesh queues or topics.

Other methods (Basic Authentication, API Keys, X.509 certificates) are not used by default for Event Mesh service keys.

### NEW QUESTION # 44

You want to build an integration architecture that is largely asynchronous. Which design do you use to exchange notifications between the partners involved?

- A. Request-driven design
- B. Hexagonal design
- C. Serverless design
- D. Event-driven design

**Answer: D**

Explanation:

For an asynchronous integration architecture, the best design pattern is Event-Driven Architecture (EDA):

Events (notifications) are published by producers and consumed by interested partners asynchronously.

Enables decoupled, scalable, and resilient communication.

Other options:

Serverless design # A runtime execution model, not a messaging pattern.

Request-driven design # Synchronous, not asynchronous.

Hexagonal design # A software architecture pattern, not messaging-driven.

Thus, for exchanging asynchronous notifications between partners, the correct design is Event-driven design.

#### NEW QUESTION # 45

Which combination of SAP BTP role collections allows a user to manage queues and topic subscriptions in SAP Event Mesh, and monitor its usage and resources?

- A. SecurityAdmin and SecurityDevelop
- B. IntegrationAdmin and IntegrationDevelop
- C. ApplicationAdmin and ApplicationDevelop
- D. EventMeshAdmin and EventMeshDevelop

**Answer: D**

Explanation:

In SAP BTP, SAP Event Mesh provides messaging capabilities (queues, topics, and subscriptions) that require specific role collections to enable developers and administrators to perform tasks. SAP delivers two dedicated role collections for Event Mesh: EventMeshDeveloper:

Manages queues and topic subscriptions

Monitors Event Mesh and its queues

Performs testing of queues and message flows

EventMeshAdmin:

Includes all developer capabilities

Provides additional administration rights for lifecycle management of Event Mesh instances and configurations When a user is assigned these role collections, they gain the ability to:

Create and manage queues and topic subscriptions.

Monitor usage and resources such as queue depth, consumers, connections, and spool size within Event Mesh.

Other provided options are incorrect:

ApplicationAdmin/ApplicationDevelop # These are not SAP Event Mesh role collections, they do not provide queue or topic subscription access.

SecurityAdmin/SecurityDevelop # These roles are tied to security configurations and do not allow Event Mesh operations.

IntegrationAdmin/IntegrationDevelop # These roles belong to SAP Integration Suite (Cloud Integration) capability, not Event Mesh.

Therefore, the correct and verified answer according to SAP Integration Developer documentation is:

B). EventMeshAdmin and EventMeshDevelop

#### NEW QUESTION # 46

On which standards is OData based?

- A. TCP, AtomPub, and JSON
- B. HTTP, AtomPub, and JSON
- C. SOAP, AtomPub, and JSON

**Answer: B**

Explanation:

OData (Open Data Protocol) is a REST-based protocol standardized by OASIS and adopted widely in SAP systems.

It builds on HTTP as the communication protocol.

It uses AtomPub (Atom Publishing Protocol) and JSON as payload representation formats.

SOAP is not used for OData; instead, OData relies on REST principles.

TCP is the underlying transport layer, but OData is explicitly defined over HTTP.

Thus, the correct basis for OData is HTTP, AtomPub, and JSON.

### NEW QUESTION # 47

You download the Performance-Traceability policy from the SAP Business Accelerator Hub and implement it in an API proxy. What can you use to view the data covered by the policy?

- A. A third party monitoring tool
- B. SAP Cloud ALM
- C. SAP Analytics Cloud
- **D. The API monitor under Monitor # Integration APIs**

**Answer: D**

Explanation:

When you implement the Performance-Traceability policy in API Management:

It enables detailed monitoring of API calls, including latency, performance metrics, and message traces.

This data is available in the API Monitor (Monitor # Integration APIs) within the SAP Integration Suite cockpit.

Other options:

SAP Cloud ALM # General monitoring, not API trace-specific.

Third-party monitoring # Possible but not where SAP policy data is viewed.

SAP Analytics Cloud # For analytics, not direct monitoring of API proxy performance.

Thus, the correct monitoring location is API monitor under Monitor # Integration APIs.

### NEW QUESTION # 48

.....

SAP Certified Associate - Integration Developer (C\_CPI\_2506) practice exam went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form. The SAP C\_CPI\_2506 Exam Dumps are similar to real exam questions. Our C\_CPI\_2506 practice test TestPDF is suitable for computer users with a Windows operating system.
